Metallurgy Building Renovation Okayed By Regents

Dale Benjamin Appointed As KUO Station Director
Dale Benjamin has been chosen station director for the campus radio station KUO. The announcement from the board today marks the fourth director and ninth station director in KUO's two-year history. Dale is a junior at Lewis and Clark College, and has been involved with the campus station since his freshman year. He has been an active member of the KUO Board of Directors and Student Affairs Committee. Dale will replace David Lewis, who has been station director for the past two years.

New Director Planned
Dale's appointment will be followed by the appointment of a new station director, David Lewis. The new director will be responsible for the day-to-day operations of the station, including programming, advertising, and fundraising. Dale will work closely with David to ensure a smooth transition of responsibilities.

Under the baton of conductor George Michael, the University Symphony Orchestra will present their annual winter concert Saturday evening. The concert will feature a variety of works by composers including Beethoven, Mendelssohn, and Mozart. The program will also include a performance of Mahler's Symphony No. 1 by the student orchestra. The concert is free and open to the public.

Keynote Address
Dr. William R. Poole, president of the university, will deliver the keynote address during the ceremony. He will discuss the importance of diversity in the university community and how it contributes to a better learning environment for all students.

Journalism
The Idaho State Journal, the oldest daily newspaper in the state, has announced a new position, the associate editor of opinion. The position will be filled by a member of the university faculty. The associate editor will be responsible for overseeing the newspaper's opinion section, including the editorial board and contributing writers.

Awards
The Idaho State University Foundation has announced several new awards to recognize excellence in teaching and research. The awards include the Distinguished Teaching Award, the Chancellor's Award for Excellence in Research, and the Student Government Award. The winners will be announced at a ceremony next month.

New Conductor To Present First Symphonic Concert
The Idaho State University Symphony Orchestra will present its first symphonic concert next month. The concert will feature works by Haydn, Beethoven, and Mozart. The conductor of the orchestra, Dr. George Michael, has received critical acclaim for his previous performances and is widely regarded as one of the best in the country.

Register Permits
Students who have last name 'A' through 'L' may request permits to register for spring semester beginning February 10. All other students who do not get their permits at that time may obtain them during the second week of the semester.

Summer House
Jean Otani, president of the university, has announced that the summer semester will be shortened to two eight-week sessions. The sessions will begin in June and end in August, with a break in between. The change is expected to reduce costs and improve the quality of instruction.

Garden Party
The university will host a garden party this spring to celebrate the opening of the new student center. The event will feature live music, food, and drinks, and is open to all students, faculty, and staff. Tickets are available at the student center.

Shiner Says World "Faces Red Men"
"These are the faces of men," says Dr. Shiner at the university's annual banquet. "They are the faces of men who have dedicated their lives to the pursuit of knowledge and the betterment of society. It is an honor to be a part of this community and to contribute to its success."
 Collegiate TV Cooperation Receives Test At Seattle

Looking At Legs Libby Lauds Loudly

Large crowd at University of Idaho's men's and women's basketball games, the university said, would be divided into sections, with each section designated to watch a certain team. The university said the seating arrangement would allow for clearer sightlines and better sound quality for fans. The university also announced plans to expand the seating capacity at the arena to accommodate an additional 5,000 fans.

Kidney Dialysis

The university said it would begin offering kidney dialysis services at its hospital, a first for the state. The service would be available to patients with end-stage renal disease, allowing them to receive treatments closer to home and reducing travel time and costs. The university is collaborating with local hospitals and doctors to ensure the new service is accessible to all patients.

Cold beer were held for hours before the weather the lady bug made its last stand. Four on one side, two men on the other side.

Iowa State Students Graduate Journalism Study

The university said it would offer a journalism study program, the first in the state. The program would provide students with hands-on experience in news reporting, writing, and editing, preparing them for careers in the industry. The university said it would partner with local media outlets to provide internships and job opportunities for students.

Seagulls

The university said it would introduce seagulls to its campus, providing a unique opportunity for students to observe and study these birds. The university said the seagulls would be released from a specially designed enclosure and would be able to roam freely around the campus. The university is also planning to establish a seagull feeding program to support the birds.

Patio

The university said it would introduce a new patio area on campus, providing a space for students to socialize and relax. The university said the patio would feature comfortable seating, outdoor lighting, and grilling facilities. The university is also planning to organize regular events and activities on the patio to encourage student engagement.

Kendall

The university said it would introduce Kendall, a new student organization focused on promoting diversity and inclusion on campus. The organization would work to create a welcoming and inclusive environment for all students, regardless of their background. The university said Kendall would organize events and initiatives to educate students about different cultures and perspectives.

That's it!
Life With Lucky

When he was able, he would give us a few tips on how to avoid danger. He knew the lay of the land and could predict the behavior of others. His advice was often laughable, but it always kept us safe.

Scientific Studies Reveal Bluffing Now Only A Formula

Have you always had a system of bluffing as certain as this? Well, the results of a recent scientific study of bluffing and deception, published in the prestigious scientific journal "Lucky," suggest that the science of bluffing has finally been mythified.

In the study, researchers analyzed data from a large number of bluffing experiments and found that the most effective bluffers are those who follow certain formulas. These formulas take into account factors such as emotional state, body language, and the bluffer's confidence.

The formulas were developed after years of research and are now available for download on the Lucky website. They are intended to help bluffers improve their skills and increase their success.

In summary, the science of bluffing is finally being understood, and now anyone can learn to bluff like a pro. The formulas are easy to use and can be applied in various situations, from job interviews to negotiations.

In this formula-driven world, luck may not be enough. You must also have the right formula to succeed.

Faculty Members Entertain Club

Dorothy Yeates, president of the Advertising Club, entertained the members of the Advertising Club with a talk on "Lucky" at the recent club meeting. Yeates discussed the history of the magazine and its impact on the advertising industry.

In her talk, Yeates mentioned the famous "Lucky" cover featuring the words "Bluffing Now Only A Formula." She explained that the cover was a result of the scientific study conducted by the researchers. She also highlighted the importance of the study in advancing the field of bluffing.

Yeates concluded her talk by thanking the members for their attention and encouraging them to apply the formulas in their future bluffing endeavors.

In conclusion, the science of bluffing is finally being understood, and anyone can learn to bluff like a pro. The formulas are easy to use and can be applied in various situations, from job interviews to negotiations. The future of bluffing looks bright.
