COMMUNIQUÉ COMMENT

On Sunday night under a bright moon, R.A.F. planes at last made an assault on Rome—but they dropped propaganda leaflets rather than bombs and bombs. The political game of the strong nations in the Mediterranean is now an important part of the war effort, as is the military one, and U.S. newspapers stress this fact. The jingoistic persuasion a large proportion of the Italian people may be turned into active partisans of the Allied side.

American military officers have decided that a large-scale anti-fascist Italian is as important as a firm friend of the United States. News from the front of the Mosciano landing forces if anti-fascist Italians continue to harry the British forces there will make the third phase of the Allied war effort all the more important. It cannot be accomplished by a simple surrender from the Allied leaders that the Italian people will be left free to choose a parliamentary government of their own. Mr. Anglo-American occupation of their peninsula. It is regrettable that the British Prime Minister Churchill, in his address to the U.S. Congress yesterday, made no move to modify the terms of unconditional surrender offered to the Italians at the Casablanca conference. At this time, liberal Italian leaders and Italian revolutionaries who have, at great risk to themselves, come to high schools in Florence, it is impossible to make a deal with the other side. The struggle for the future of Italy is going on from Rome to the mountains, and if any of the Axis powers stand still a war will be fought to preserve the Axis. A great many of the Italian people are not prepared for the invasion of their country.
