New Ruling Permits Coaching Time

Regents give ‘Go’ Signal on Building Plans for Student Union Addition

Final approval and the “go-ahead” signal with the underwriting of the entire project, and bonds issued in order to finance the Student Union building addition in time to have it in use during Fall Term, President E. G. Holland announced today.

The Student Union building project, which has been under consideration for some years, will now be proceeded with. The project, which has been under consideration for some years, will now be proceeded with.

Research Council Reports Changes at Recent Meeting

President J. E. Chamberlain, chairman of the Research Council, reported on the organization of the University research council at a recent meeting of the council.

A diversity of classified colleges for the University is being developed. The college of agriculture, the college of commerce, the college of engineering, the college of law, and the college of medicine are being added.

The council was authorized to form a committee to study the organization of the Research Council.

A feature of the council’s work is the establishment of a research fellowship program, which will provide funds for research work in the various departments of the University.

The council also approved a proposal for a research center to be established in cooperation with the State Department of Agriculture.

Get Permits Now

Now is the time to act. Doctors have been mere letters. A letter is an order. A letter is a request. A letter is a demand. A letter is a way to get what you want.

Permits will be available next week, so you may begin to act now. The deadline is May 28, 1949.

Those who do not act cannot make up for the lost time. But the moment you act you may assure yourself of getting what you want.

Research Council

A science club is interested in the problem of the nature of light. The problem is an interesting one and the council feels that it is an important one.

A discussion of the problem will be held at 4 p.m. in the physics building.

A committee of the council will study the problem and report to the council at its next meeting.

Race Clause Dropped

We were a little surprised, but very happy, to hear that Royce Byer will be instructed to back down from his national convention last month. The race clause is an important limitation on many charitable foundations, and one that has brought criticism to many private groups in America. As a matter of fact, in particularly sensitive phases of American life, race is free from discriminatory practices.

This is a great day for those who have been fighting against discrimination. In years past there has been a great deal of talk, but not much of that talk has become reality.

We were particularly pleased to see the vote on the matter. The recommendation of the committee of inquiry was approved by 79 and 84 and 86, and Blue Royce was found to be overdue in the Senate. Just because the clause has been eliminated doesn't mean that discrimination will disappear. But it is a step in the right direction.

In some instances, such as this one, we have felt that we have been working for the wrong cause. We have been working to prevent the rule of the law. We feel that this is the only way democracy will ever function properly. It is up to each one of us to be aware of the law and to work for the right to be applied.

The National Association has always been a great help to us. It has been a source of hope and strength to those who have been fighting against discrimination. We are very grateful for their support.

Air Force Team Will Interview Single Students

A two-week Army Air Force officer training program at the University of Idaho in the fall of 1941 will be open to senior students qualifying for a 10-month flight training course leading to a pilot's rating and officer's commission in the Army Air Force. Applicants must be between 18 and 22 years of age, have a high school education, and pass a physical examination. Applicants must be of normal vision and have a mechanical aptitude rating of at least 80.

The university has received 100 applications from students interested in the program. The applications will be processed by the university's admissions office and a selection list will be prepared for the university's president.

Vandals Lead Conference
In Early Season Scoring
Cagers Rank High
In Defensive Play

Idaho's surprising Vandals lead the Pac-10 in this basketball season a few weeks ago. In that same week, the Vandals scored a victory against the University of Washington in defensive play. This game was won by University of Washington with a score of 84-80. The Vandals' defense and scoring ability resulted in a win for this game.

Basketball Squad Travels During Christmas Holidays

Mara's last-minute drive didn't stop the ball from reaching the basket, as it hit the backboard and rolled away. The ball settled in the net, and Mara's shot was scored.

The new year brought a change in the team's schedule. The Vandals played their last game of the season on December 31st at home against the University of Oregon. They won with a score of 84-80.

Coach Hunter was pleased with the team's performance. "We are really working on improving our defense," he said. "The players are listening to the coaches and trying to improve their skills."
