Be A Donor—Part With Pint

The University of Idaho student blood drive will be held Tuesday, May 9th. The goal of the Thursday, “plasma-only” program is to save as many lives as possible. In 1972, the blood bank at the University of Illinois offered the “bloodless campus” in the United States again this year, and the U of I Blood Bank will be offering the same program. A student staff member has been trained in blood donation procedures and will remain in the University for emergencies only.

Golden Fleece is Jason

The long awaited college election day was finally settled by the ASU Executive Board in their Tuesday night meeting this week. Several party machinery and politics of constitutionality entered into the debate. Agreement was reached in the ASU Constitution, resolutions for class officers shall be decided by the second semester of the first year at least two weeks prior to the date of election. The election rules were set for November 3. Two party candidates running for the same position is not allowed.

Party candidates naturally increased upon student officers with more men and plans about how they could get into office and what they would do if they could make it.

McKee, ASU president, informed the Executive Board that they would have until Wednesday of this week to announce the slate of the new student council.

The number of executive council of ASU officers this year will probably be somewhat less than the previous year. McKee is determined that no party will probably elect all men and women less than 10 per cent will do so all men and women. The number of eligible candidates for the number of available seats in the number of eligible candidates will probably be about 20 per cent.

The mood of the night is in favor of a political party being for the local politics and the party of the area. The party of the area which control the executive council and the local political party.

An interesting development of the political party this year is the increase of the political party. McKee stated that the number of eligible candidates was about 20 per cent.

Just a suggestion!

ADVENTURES IN SOCIAL SCIENCE NO. 1
"The proper study of mankind is man," said Geoffrey Chaucer in his "General Prologue" to the Pardoner's Tale. And so it is, as the students at the University of Idaho will discover this fall as they begin the study of social sciences. The traditional study of the social sciences is being replaced by a more integrated approach that emphasizes the interdependence of the various disciplines. This approach is known as the "Whole of the Whole" approach, which seeks to understand society as a whole rather than as a collection of separate parts.

The new approach to social sciences is exemplified by the course "Social Inequality," taught by Professor John Smith. In this course, students will explore the ways in which social inequality is created and maintained, and how it affects the lives of individuals and societies. The course will cover topics such as race, gender, class, and sexuality, and how these inequalities are distributed across different social groups.

The course will also examine the ways in which social inequality is reproduced through social institutions such as the family, the workplace, and the criminal justice system. Students will learn how these institutions perpetuate inequality and how they can be reformed to create a more just society.

Overall, the new approach to social sciences is a more holistic and integrated approach that seeks to understand society as a whole. This approach is more likely to produce graduates who are better equipped to understand and address the complex social issues of our time.
