An Open Invitation To Mom

This weekend our Associated Women Students and Mortar Board ladies are having a big party. Offhand, I think that they are planning fun times in your honor. If you are able to come.

The weekend’s activities will include Saturday night (May 20) at the Clovis军 and Sunday morning (May 21) at the University Center. The Clovis army will follow with choral singing, dancing, the traditional Mortar Board presentation by the Associated Women Students, and music by Mortar Rank, Silver Laces, and Spand. Sunday morning will include a free breakfast, room for the annual spring fling, free music and free ladies’ groups will ring the changes of the morning right into the afternoon. Come on down and see what’s going on and help yourselves to a big breakfast. It will be just the ticket for Mother’s Day.

Open house of all the campus for the entire weekend is planned as that you, Mom, can see what we have been up to on the campus this past year. We cannot wait to see you and to have you to join us in the fun.

Sincerely,

Dancing Is An Expression Of Responses To Impulses.

From the first beat of a tom-tom in the jungles of Africa to the latest dance一步 of a million dollar entertainer, there has developed dance forms of many types. Virginia has its Virginia reel; the west has its Square Dance. We are all learning to dance as we express our emotions to the music of nature and our environment. We are all learning to dance as we express the emotions of our hearts, minds and spirit. This is true of all people and it has been true of all people for ages past.

From the earliest days of Humankind there has been dance. It is the first art form. It is the first art form because it is the first expression of thought, emotion, and spirit. It is the first art form because it is the first expression of the individual. It is the first art form because it is the first expression of the group. It is the first art form because it is the first expression of the world. It is the first art form because it is the first expression of the universe.

Modern Dance

Modern dance, also known as contemporary dance, is the dance created by the human body as it moves freely and naturally. Modern dance is a movement of the body as it moves freely and naturally. Modern dance is a movement of the body as it moves freely and naturally. Modern dance is a movement of the body as it moves freely and naturally.

This dance is a form of expression of the individual. It is a form of expression of the group. It is a form of expression of the universe. It is a form of expression of the spirit. It is a form of expression of the mind. It is a form of expression of the heart. It is a form of expression of the soul.

Thanks

I would like to thank all the students who worked on the previous issue, whose efforts made it possible for us to have this issue. I would like to thank all the students who worked on the campus for their support, their help and their patience.
