Behind the Curtain:

‘China Report’ Sets Wednesday

By JOHN BLAIR

One of the last of the ABC American visit from China has been to Washington, D.C. to testify before the House Subcommittee on Intelligence and Foreign Affairs. The subcommittee, which has jurisdiction over the China Trade and Development Corporation (CTDC), held a hearing to discuss the future of the corporation.

The hearing was held in the Longworth House Office Building in Washington, D.C. and was attended by representatives from the CTDC, as well as members of Congress from both parties. The subcommittee was chaired by Rep. James Sensenbrenner (R-WI), who is also the chairman of the Committee on Homeland Security and Governmental Affairs.

During the hearing, Sensenbrenner noted that the CTDC has been operating under the same mandate since its establishment in 1993 and that it has been providing economic and political assistance to China.

However, he also expressed concerns about the continued support for the CTDC, stating that it is not in the best interests of the United States to continue providing assistance to a country that has been accused of human rights violations.

Sensenbrenner also asked the representatives from the CTDC to provide information on the specific projects that the corporation has been funding in China, and whether the funds have been used for the intended purposes.

The representatives from the CTDC indicated that the corporation has been supporting projects in areas such as education, health, and economic development, and that the funds have been used for the intended purposes.

The hearing continued with questions from other members of Congress, who expressed similar concerns about the continued support for the CTDC.

However, several members also noted that the CTDC has been providing valuable assistance to China, and that it has been instrumental in improving the lives of many Chinese people.

The hearing concluded with a vote to conduct a further investigation into the operations of the CTDC, and to consider the possibility of repealing the mandate.
The Idaho Argonaut

The Idaho Argonaut, published weekly, is the oldest student newspaper in Idaho and is one of the oldest student newspapers in the United States. It covers news, events, and activities at the University of Idaho and the surrounding community.

Some Distasteful Trout Cutting

Developments last week proved divisive for many students just as well as the Pacific Coast Conference will soon be calling a truce at the end of the month.

Washington State, one of the northern members of the fiberglass group, is not planning to cut any of its seven best trout streams for the benefit of out-of-state anglers.

Josephine, a powerfully built man, is a fisherman and has been an avid fan of the sport for many years. He has been fishing in the region for more than 20 years and is a member of the local fishing club.

"It's a great sport," he said. "I love being out in the water and catching fish."

The Washington State Department of Fish and Game has been monitoring the effects of fish cutting on the local population and has found that the sport has a positive impact on the local economy.

"The economic impact of fishing in this region is significant," said a spokesperson for the department. "It brings in money for local businesses and provides a source of income for many people."

70th Anniversary Observed
By Tri-Delt Sigma Women

by SHARON COX

Miss Autoyn's Editor

Tri-Delt Sigma women will celebrate the 70th anniversary of the Chi Delta Sigma chapter at the Phi Sigma Sigma meeting on Dec. 7. The current chapter members will have the opportunity to learn about the history of the organization starting with the Delta Xi chapter. The meeting will include a presentation on the historical significance of the Chi Delta Sigma chapter and how it has evolved over the years. The event is open to all interested members and will provide an opportunity to celebrate the rich history of the organization.

Concrete Dec.

Northwestern University, Chicago, Illinois

The annual concrete conference is scheduled for Dec. 4 and 5 at Northwestern University, Chicago, Illinois. The conference will cover topics such as concrete technology, sustainability, and innovation in the construction industry. This event is a great opportunity for professionals to network and learn about the latest developments in the field. Attendees can register online through the conference website.
