US In A Great Revolution Of Blame-Fixing, Says Writer

There is a great deal of worry today (finally) about the overwhelming failure of the leadership of the American people. This is not an unhealthy or cowardly concern, but a necessary one. The American people are some of the most successful in the world, but the success has come at a great price. Our leaders have been focused on the short term, and the result has been a failure of leadership.

Deborah Jones

Dear Jason —

The way the 2016 election season played out was a disaster for the American people. The candidates were more interested in the short term and the polls over the long term, which led to a failure of leadership.

Government, of course, is another story. In our capital cities, the politicians are driven by polls and the polls are driven by the market. This is a cycle that has been going on for a long time. It is easy to blame the politicians, but it is also easy to blame the voters. The voters are the ones who choose the politicians, and they are the ones who are responsible for the failure of leadership.

Pointless and meaningless words are all over the place. We could have all benefited from some constructive criticism, but instead we have been subjected to a barrage of meaningless words. This is a failure of leadership.

We have spent the last few years trying to fix the economy, but the economy has not improved. This is a failure of leadership.

Our leaders have been focused on the short term and the polls over the long term, which led to a failure of leadership.

In our capital cities, the politicians are driven by polls and the polls are driven by the market. This is a cycle that has been going on for a long time. It is easy to blame the politicians, but it is also easy to blame the voters. The voters are the ones who choose the politicians, and they are the ones who are responsible for the failure of leadership.

The voters are the ones who have elected the politicians, and it is up to them to hold the politicians accountable. They have the power to make the politicians do what is right, and they have the power to remove them from office.

In the end, the failure of leadership is a failure of the American people. It is up to us to make the changes that are necessary to fix the problems that we have created.

Sincerely,

Bill Jones
