Dear Reader:

Contrary to the myth that per cent of Idahoans believe that smoking is harmful, the smoking rate in Idaho is 19%. In 1983, the state of Idaho passed an anti-smoking bill that went into effect on January 1, 1984.

Let me explain. Below are some of the reasons that people believe smoking is harmful:

- It can cause cancer.
- It can cause heart disease.
- It can cause respiratory problems.
- It can cause lung disease.
- It can cause birth defects.

These are just a few of the reasons why people believe smoking is harmful. However, the truth is that the only way to truly determine whether smoking is harmful is to conduct a thorough scientific study.

Dear Reader:

The state of Idaho has passed a smoking ban that went into effect on January 1, 1984. This ban prohibits smoking in public places, including restaurants, bars, and workplaces.

However, the law is not always enforced. In fact, there have been reports of smokers being allowed to smoke in restaurants and bars.

Note, as the college year approaches its midpoint, that there is more to life than classes and books.

There are less, 7 things you can do to stay sane.

1. Eat something besides cereal.
2. Read something besides your textbooks.
3. Sleep something besides your pillow.
4. Listen to something besides your radio.
5. Laugh something besides your jokes.
6. Relax something besides your muscles.

The signatures will be checked against the office list of officers. All signatures will be checked with the students present.
