The Idaho Argonaut

Finalist Voting Monday For Homecoming Queen

Five finalists will be shown for 1958 Homecoming Queen by the members of the Homecoming Court Monday at 7:30 a.m. in the gym. Voting for the finalists will be held at 8:30 a.m. in the gym.

Dr. Richard A. Hartung, university president, will be the judge. The judge will select the queen from the five finalists shown.

On the final day of voting, the queen will be selected by the students and the staff of the university.

Johnny Mathis, Company Will Perform Tomorrow Night At Gym

Johnny Mathis, famous recording artist, will perform at 8 p.m. tomorrow at the gym. He will perform a wide variety of songs, including hits from recent recordings.

The show is sponsored by the Idaho Student Association and the Idaho Student Council. Tickets are available at the door.

Johnny Mathis, 22, was born in Seattle, Wash., on Dec. 30, 1935. He is the son of Mr. and Mrs. Mathis, who live in Seattle. He is the grandson of Mr. and Mrs. Mathis, who live in Seattle.

The Golden Fleece

By Jason

Are you going to President Hartung's inauguration tomorrow morning? You will probably be one of the more vivid memories of our new president and one of the most impressive ceremonies at Kalamazoo College. This is the first time we've had the opportunity to see his inauguration.

Over 300 universities and colleges have accepted invitations to the inauguration. Jason suggests this might not be a good idea.

Don't Phone... Telegraph

Just wanted to mention a few things before being distracted by the coming weekend. This should also refer to the little old lady who's still reading the newspaper.

Every evening after 9 p.m., when all the freshman students have gone to bed, the campus is quiet. Everyone calls to the telephone and attempts to call his long-distance number through the dorm's phone. The campus is full, with the telephone lines and equipment.

This is the reason a student or faculty member cannot be reached on a conversation or two or three other people on one line because the campus is quiet. According to a university official this has been happening for some time.

A number of the campus' facilities and (2) try to call on one of the campus' three telephones. Because the campus is closed, "callers" will have to be the ones who know how to use the phone. Not a major problem; the campus phones can be used with a long distance phone card, which is available in the campus phone at the student union.

Until the facilities are improved, why don't you get off the phone so I may receive your phone call.

Poor Percentage

Joni took another look at the class mailing list yesterday. She was surprised to note that the percentages of students voting in the elections has fallen again this year. Last year's mailing list was down to 40 percent and this year's 30 percent turned out.

An Hour Lost

Don't forget the first Friday of the month. Sunday morning.

We will get off Daylight Saving time and put on Pa- cific Standard Time (PST). Remember to set your clocks back 1 hour before you go to bed.

The Armament of the President's Official Vehicle was revealed today, stating that, "The U.S. is a country and fights to protect these rights of freedom." The warning sign has been posted on PROTECT.

WANTED

Students to form Drama Group to do Improvements.

Contact: Karl Koch—C.C.C.

Tryouts will be arranged.

Marica Explains Viet Nam Views

By LEO W. JEFFERS

Argonaut Associate Editor

In the previous issue of the Argonaut, Marica took the time to explain her position on the Viet Nam issue, her point of view, and her stand in favor of the Viet Nam conflict. This is the first time we are able to explain his position on the Viet Nam issue.

"What I said was that it was only in the Viet Nam issue that I had put an accurate representation of the Viet Nam conflict, which this country agreed to and should have enforced for a long time now."

"I believe that peace is possible in Viet Nam and that the United States has the right to intervene in the Viet Nam conflict, which this country has agreed to and should have enforced for a long time now."

Marica explained that the Viet Nam conflict is not a war that the United States has not put itself against. The United States has been working to bring peace to Viet Nam and to enforce the Viet Nam conflict, which this country has agreed to and should have enforced for a long time now.

The subject of 30 letters to June Monroe, a member of the Argonaut staff, is an issue of many opinions. Viet Nam, the Argonaut, and the Viet Nam conflict are not only important issues.

Marica's letter is a matter of great importance to Viet Nam, the Argonaut, and its staff. Viet Nam, the Argonaut, and its staff should be able to express their opinions on the Viet Nam conflict, which this country has agreed to and should have enforced for a long time now.

The Argonaut will continue to publish letters to the editors on Viet Nam and the Viet Nam conflict, which this country has agreed to and should have enforced for a long time now.

The Argonaut will continue to publish letters to the editors on Viet Nam and the Viet Nam conflict, which this country has agreed to and should have enforced for a long time now.

Last But Not Least

Plebide Dances Continue To Top Idaho 'Social News'

Announcing a pledge of dance-to-be and dances themselves to make Idaho campus social apertures out of the past, as a host of meetings was held there by a majority of students. Visitations to men's living groups by candidates for homecoming queen are also under the homecoming umbrella.

FRANKIE WILCOX

Miss Frankie Wilcox, Giilt of the Merit for September, is the newly elected princess of Kappa Sigma fraternity. Miss Wilcox is the daughter of Mr. and Mrs. Walter Wilcox, of Boise.

LEO HOUSE

Leo House was chosen Leo House, the famous dance center for the Fall. Under the leadership of Dr. Leo Leobn, the dormitory has been named the Leo House. The dance will be held Friday, Oct. 26, at the Hotel Tabbet, with Dean Books and Miss Bringing.

WINOVA PELHAM

Winona Pelham, from the Sigma Phi Epsilon, was chosen Winona Pelham, and Miss Pelham will be the co-chairwoman of the dance.

DANCE TIME

The dance will be held Friday, Oct. 26, at the Hotel Tabbet, with Dean Books and Miss Bringing.

HAPPINESS IS...

A last request to all of our readers who may be interested in the activities of the Kappa Sigma fraternity. The dance will be held Friday, Oct. 26, at the Hotel Tabbet, with Dean Books and Miss Bringing.

Northern Idaho Offers Best Whitetail Hunting

By DARRELL YOUNT

Whereas the talk of deer hunting is currently spread among the listeners, it's probably the most popular hunting activity in Idaho. But that's not to say that other hunting opportunities aren't available.

Almost nothing can match the excitement and challenge of deer hunting. It takes a bit of planning, however, to get a buck this year. Many hunters get discouraged because they can't find the correct hunting grounds.

In Idaho, deer hunting is limited to the general season, which runs from September 1 through November 30. However, most of the successful deer hunters spend their weekends in the mountains hunting.

In addition to the general season, there are also a few special seasons, including the antelope season, which runs from October 1 through November 30. This season is open to all Idahoans, and it provides an opportunity to harvest a trophy buck.

The Idaho Department of Fish and Game has issued a list of public hunting grounds in Idaho, which includes specific information about the types of deer that can be harvested, the number of tags available, and the rules governing the harvest.

For more information on hunting in Idaho, contact the Idaho Department of Fish and Game at 208-350-2050, or visit their website at http://fishandgame.idaho.gov.

WESTERN ELECTRIC
MANUFACTURING AND SUPPLY UNIT OF THE BELL SYSTEM

He found it at Western Electric

Z. B. Thomas, S.M.E., University of Nevada Research Laboratory, was looking for a way to make more efficient use of the limited space in industrial settings. He knew that some of the existing engineering projects in communication systems, microwave systems and optical networks, were not as effective as they could be. He decided to conduct a study of the various techniques available to engineers working in these fields.

Dr. Thomas approached the Western Electric Manufacturing and Supply Unit of the Bell System for assistance. The unit has a long history of developing innovative and efficient engineering solutions for a wide range of industries. They were happy to help.

The study involved the development of a new system that would allow for more efficient use of space in industrial settings. The system was designed to maximize the use of available space while minimizing the cost of production.

The system was initially tested in a small laboratory setting, but it was later refined and implemented in a larger industrial setting. The results were impressive, with a significant increase in efficiency and cost savings.

Dr. Thomas was thrilled with the results and was able to secure a patent for the new system. He then went on to work for the Bell System, where he continued his research and development work.

He did not expect his work to lead to such significant results, but he was confident in his ability to develop innovative and efficient engineering solutions. In the end, the system proved to be a valuable asset for the Bell System and its clients.
