Public Events

To Speak March 18

Two prominent educators will speak on the campus of the University of Idaho March 18 as part of the Campus Lecture Series.

Edward M. Morgan, President of the University of Montana, will present the annual "Brigden" Lecture at 8 p.m. in the Kibbie Dome. Mr. Morgan was President of the American Association of State Colleges and Universities from 1964 to 1967 and has served as President of Idaho State College and as Director of the National Center for the Education of the Gifted.

Harry L. Smith, President of the University of Oregon, will present the second annual "Brigden" Lecture at 8 p.m. in the Kibbie Dome. Mr. Smith has served as a consultant to the U.S. Office of Education and as a member of the faculty of the University of Michigan. He is also a former member of the faculty of the University of Idaho.

Records and Money Duty

For Student Area Directors

Last week the Student Activities Council held a meeting to discuss the various aspects of the student area director's job. The council is made up of 15 students who are elected by the student body to serve as area directors. The council meets weekly to discuss problems and issues that arise in their areas. The council is responsible for the financial and personnel decisions for each area. The council is also responsible for the scheduling of events and the promotion of the areas. The Golden Fleece

By Jason No. 78—Leo W. Jefreys

Speaking of Odds & Ends

Off-Campus Housing
Still An Issue

The Goldn Fleece was a weekly and biweekly student newspaper published by the Associated Students of the University of Idaho. The newspaper covered campus, local, and national news, as well as events and issues relevant to the university community. The Golden Fleece was a student publication, and its contributors were often involved in various campus activities and organizations.

"Miss Collette calls "Andorra" Intense"

"Andorra" was intense is the term used by Interior Design Professor Richard Collette to describe the course for which he was teaching this year. The course is open to all students.

"Kappas Celebrate Big 50th Year"

Omega Pi chapter of Kappa Gamma Chapter celebrated 50 years on the University campus with alumni activities this weekend. Over 83 alumni and 46 active members attended a Friday evening and Saturday morning banquet honoring Dr. Ellis Woodbridge, who served as president of the University of Iowa for 30 years.

"We've Got the Weekend"

The week ends with a bang when TRW Systems, which participate in 9 out of every 10 U.S. space launches and has built and operated more spacecraft than any other company, offers the following opportunities in Los Angeles and Houston, with members of TRW Systems' Computing Center when they visit your campus.

"Join the Action!"

With TRW Systems, which participate in 9 out of every 10 U.S. space launches and has built and operated more spacecraft than any other company, opportunities exist for BS/MS graduates desiring Computer-Oriented professional positions. You are invited to discuss these opportunities in Los Angeles and Houston, with members of TRW Systems' Computing Center when they visit your campus.

BS/MS degree candidates in Computer Science, Mathematics, Physics, Chemistry, and Engineering are invited to investigate careers at the Computer and Data Reduction Center (CDRC) of TRW Systems' new ultra-modern facilities in Redondo Beach, California (Los Angeles International Airport) and in Houston, Texas.

GROWTH has been the keynote of TRW Systems since its founding over a decade ago. Having established standards of technical excellence, in addition to adequate space, TRW has now set and important objective for the future: to become an employer of choice for computer-oriented specialists.

At TRW Systems space, scientists in basic programming are actively developing the applications of computer technology to understand complex systems. Geologists and meteorologists, for example, use continuous flow data analysis, advanced ballistic missile studies, advanced space probes, Marx solid and space communications systems. Our more than 250 programmers and scientists are altering their background and computer science in mathematics, engineering, physics, chemistry, and biology to understand the unique requirements of space operations and to further advance the capability of computers and the computer scientist.

Vital to the nation's major space programs, TRW Systems provides its personnel in space technology and business operations an advanced GE 635 system is dedicated.

Please make arrangements with your Placement Office for interview appointment. Or, write College Relations, TRW Systems, One Space Park, Redondo Beach, California. TRW is an equal opportunity employer, man and women.
