HOMECOMING MAERED—Four of the Homecoming parade floats, three of which glowed as winners, were destroyed by unknown persons early Sunday morning. Forward shores to a truck shore by Uptry and Campus. The records and the float were completely burned. A reward of $100 is being offered for
information leading to the arrest and conviction of these responsible (Moor photo).
POLITICS OVER THE STATE

"Ruby understands!" by Glenn Miller

What is an "attitude"? It has been defined as an attitude in the blood, as it were, not a thing but a state of mind. So reflects current analysis that makes the leadership of the Republican Party a pragmatic one.

People want a leader, and the current leadership is willing to give it. The key to the current political success of the Republican Party is the ability of its leaders to impose a state of mind, to force the issue of a state of mind, to control public opinion. This is the key to the success of the Republican Party.

Attitude is a quality of mind, a mental habit, a disposition of the soul. It is not to be found in a thing but in a person. It is not to be found in an individual but in a group. It is not to be found in a single act but in a series of acts.

The current Republican leadership has achieved this state of mind by a combination of factors.

1. The Republican Party has been able to present a unified front. This has been achieved by a well-disciplined national party organization that has been able to present a consistent message to the public.

2. The Republican Party has been able to present a strong leadership. This has been achieved by a strong and effective leadership that has been able to present a clear and convincing message to the public.

3. The Republican Party has been able to present a wide range of issues. This has been achieved by a wide range of issues that have been able to present a broad and comprehensive message to the public.

4. The Republican Party has been able to present a strong message. This has been achieved by a strong and effective message that has been able to present a clear and convincing message to the public.

Large grand accepted last week during Board of Regents meeting

Acceptances of a $61,852 gift in gifts, awards

Regents accept $61,852 in gifts, awards

A total of $61,852 in gifts and awards were accepted by the Board of Regents of the Idaho State University trustees attending the meeting this week.

Many of the gifts and awards were made possible by the generous support of the following:

- Idaho State University Foundation, Inc., providing over $1,500.
- Dr. John E. B. Oliphant, providing over $1,500.
- The Idaho State University Foundation, Inc., providing over $1,500.
- The Idaho State University Foundation, Inc., providing over $1,500.
- The Idaho State University Foundation, Inc., providing over $1,500.
- The Idaho State University Foundation, Inc., providing over $1,500.
- The Idaho State University Foundation, Inc., providing over $1,500.

The Regents selected for research board

Two members of the University of Idaho State Board of Regents and two Idaho State Board of Regents have been selected to the Board of Regents for the Idaho State University Foundation's research board.

The board will meet in the near future to discuss the future of the university and to make recommendations to the Idaho State University Board of Regents.

Charges denied
Joseph Schenk and Donald Heath of the National Education Association yesterday in a charge of third degree assault in Pullman District Court.

The charge was made as a result of a disturbance at the Oct. 1 central office of philosophers and the staff in the Pullman District office.

Six members of the staff and nine members of the NEA staff were arrested in a disturbance at the Pullman District office.

Mr. Schenk and Mr. Heath, who were informed of their charges by police, indicated that they would not be able to appear in court on Wednesday.

Judge McManus, upon the motion of the plaintiffs and defendants, continued the case to the next session of court.

Judge McManus, who is a постоянный житель the Pullman District Court, is scheduled to appear at the next session of court.

The charges are based upon the fact that the NEA staff is not in session today.

Judge McManus stated that he would be prejudices to appear in court on Wednesday.

Yesterday's hearing was held up for several hours due to the availability of Pullman attorney Wally Frist, who was called upon to appear in court due to a conflicting case.

Spend summer where the action is
For those who are thinking of spending some time next summer in the Northeast, the National Education Association has arranged for summer employment for teachers.

In the Northeast, there are several opportunities for teachers to work during the summer months.

Some opportunities include

- Teaching in the Northeast
- Working at summer camps
- Participating in summer workshops and seminars
- Serving as summer consultants

For more information, please contact the NEA's Summer Employment Committee at 202-703-8300.

SHERMAN

If any part of the University of Washington campus needed for the student union, it will be. The NEA staff and the students will work to make sure that the student union is available for the students.

The NEA staff will hold an open meeting on the campus on Tuesday, Oct. 16, to discuss the issues.

The meeting will be open to all students and faculty members.

For more information, please contact the NEA's Student Government Committee at 206-543-3300.
Idaho speech-debate team places second in 6-way Montana meet

The University of Idaho speech and debate team placed second in a recent six-way meet held at Montana State University. The Idaho team was eliminated in the quarterfinals against the eventual winners.

The winning team was from Boise State University, followed by the University of Montana, University of Idaho, and University of Colorado. The Colorado team placed fifth, and the University of North Dakota was sixth.

dr. GLEN SORENTIN. President of the Montana Chapter of the National Communication Association, received the "I charette as the annual award of the "I Club, Phil Reiner, and dan Thorpe.

Urban problems — Who cares? — Who should?

From the beginning, it’s all with AD for the world population to reach one billion, the rise of the world population from 100 million to 5 billion, and then to the present 5.3 billion. The world is facing a situation where the population is growing at an unprecedented rate, and urbanization is a major factor leading to this rapid growth. Urbanization is the process by which urban areas grow at the expense of rural areas. Urbanization is increasing in nearly every country in the world, and it is expected to continue in the future.

Urbanization is a complex phenomenon that involves several factors, including economic development, population growth, and social change. Urbanization has both positive and negative effects on society. On the one hand, urbanization can lead to economic growth and improved living standards. On the other hand, urbanization can also lead to environmental degradation and social problems.

In the past, urbanization was primarily seen as a positive force for economic development. However, in recent years, there has been a growing recognition of the negative effects of urbanization. Urbanization is now seen as a major challenge to sustainable development.

For example, urbanization has led to increased poverty and inequality. In many cities, the poor are concentrated in inner-city neighborhoods, where they lack access to basic services and opportunities. Urbanization has also led to increased pollution and environmental degradation. Urbanization has also led to increased social problems, such as crime and violence.

In recent years, there has been a growing recognition of the need to address urbanization, and a number of initiatives have been taken to address this issue.

One example is the United Nations' Sustainable Development Goals (SDGs), which include targets related to urbanization.

The SDGs are a set of 17 goals that aim to end poverty, promote sustainable development, and ensure that all people can live in peace and prosperity.

The first goal of the SDGs is to "end poverty in all its forms everywhere." Urbanization is a major contributor to poverty, and the SDGs aim to address this issue by promoting urbanization that is sustainable and inclusive.

The second goal of the SDGs is to "end hunger, achieve food security and improved nutrition and promote sustainable agriculture." Urbanization has led to increased food insecurity in many cities, and the SDGs aim to address this issue by promoting urban agriculture and improving access to food.

The third goal of the SDGs is to "ensure access to water and sanitation for all." Urbanization has led to increased water scarcity in many cities, and the SDGs aim to address this issue by promoting water conservation and improving access to water.

The fourth goal of the SDGs is to "ensure inclusive and quality education for all." Urbanization has led to increased inequality in education, and the SDGs aim to address this issue by promoting inclusive education and improving access to education.

The fifth goal of the SDGs is to "achieve gender equality and empower all women and girls." Urbanization has led to increased gender inequality, and the SDGs aim to address this issue by promoting gender equality and empowering women.

The sixth goal of the SDGs is to "ensure healthy lives and promote well-being for all at all ages." Urbanization has led to increased health challenges in many cities, and the SDGs aim to address this issue by promoting health and well-being.

The seventh goal of the SDGs is to "ensure inclusive and sustainable cities, communities and societies." Urbanization is a major contributor to urban challenges, and the SDGs aim to address this issue by promoting urbanization that is sustainable and inclusive.

The eighth goal of the SDGs is to "promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all." Urbanization has led to increased economic challenges in many cities, and the SDGs aim to address this issue by promoting economic growth and employment.

The ninth goal of the SDGs is to "build resilient infrastructure, promote inclusive and sustainable industrial development and foster innovation." Urbanization has led to increased infrastructure challenges in many cities, and the SDGs aim to address this issue by promoting resilient infrastructure and industrial development.

The tenth goal of the SDGs is to "ensure access to affordable, reliable, sustainable and modern energy for all." Urbanization has led to increased energy challenges in many cities, and the SDGs aim to address this issue by promoting energy access and efficiency.

The eleventh goal of the SDGs is to "strengthen institutions for sustainable development, provide access to information and communications technology and build capacity for sustainable development." Urbanization has led to increased institutional challenges in many cities, and the SDGs aim to address this issue by promoting institutional strengthening and access to information.

The twelfth goal of the SDGs is to "promote sustainable consumption and production patterns." Urbanization has led to increased consumption and production challenges in many cities, and the SDGs aim to address this issue by promoting sustainable consumption and production patterns.

The thirteenth goal of the SDGs is to "take urgent action to combat climate change and its impacts." Urbanization has led to increased climate challenges in many cities, and the SDGs aim to address this issue by promoting climate action and adaptation.

The fourteenth goal of the SDGs is to "conserve and sustainably use the oceans, seas and marine resources for sustainable development." Urbanization has led to increased ocean challenges in many cities, and the SDGs aim to address this issue by promoting ocean conservation and sustainable use.

The fifteenth goal of the SDGs is to "protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss." Urbanization has led to increased land and biodiversity challenges in many cities, and the SDGs aim to address this issue by promoting ecosystem protection and sustainable management.

The sixteenth goal of the SDGs is to "promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels." Urbanization has led to increased social challenges in many cities, and the SDGs aim to address this issue by promoting social inclusion and effective institutions.

The seventeenth goal of the SDGs is to "promote the integration of the SDGs with all other policies and plans." Urbanization has led to increased integration challenges in many cities, and the SDGs aim to address this issue by promoting the integration of the SDGs with all other policies and plans.

The eighteenth goal of the SDGs is to "promote democracy, good governance, multi-stakeholder partnerships and global citizenship as foundations of sustainable development." Urbanization has led to increased partnership and citizenship challenges in many cities, and the SDGs aim to address this issue by promoting democratic governance and partnerships.

In conclusion, urbanization is a major challenge to sustainable development, and the SDGs aim to address this issue by promoting urbanization that is sustainable and inclusive. The SDGs provide a framework for addressing urbanization, and they can help to ensure that urbanization is used for the benefit of all people.
VANDAL SOPHOMORE PAT SPREITE (21) and senior Kurt Miller (68) draw on Idaho Basketball Leather stocks up Montana State football Gregs Huff in the first half of the Saturday's Homecoming game.

Montana, Weber-in big Sky

George F. Washington 5

Idaho and Montana State 10, 7

The Idaho Vandals overwhelmed the 2-1-1 Minnesota State (Mankato) Mavericks in the Big Sky Conference game Saturday.

First quarter: Idaho kicked off and the Mavericks used a strong pass and run game to move the ball into Idaho territory. Idaho stopped the Mavericks after a sack by Bob Dickson and Idaho took over on its own 15-yard line. Idaho then moved the ball over the 50-yard line after three successful passes. Idaho quarterback John Heidt was successful on a 1-yard run and Idaho led 7-0 after the extra point.

Second quarter: Idaho continued its strong offense when Heidt kicked off and the Mavericks were forced to punt. Idaho returned the punt to the Idaho 42-yard line. Heidt was successful on two 15-yard runs and Idaho moved into the red zone. Idaho quarterback Brian Ross (Robby) was successful on a 1-yard pass to Idaho wide receiver Bill Petersen. Idaho led 14-0 after the extra point.

Third quarter: Idaho continued its strong offense when Heidt kicked off and the Mavericks were forced to punt. Idaho returned the punt to the Idaho 42-yard line. Heidt was successful on two 15-yard runs and Idaho moved into the red zone. Idaho quarterback Brian Ross (Robby) was successful on a 1-yard pass to Idaho wide receiver Bill Petersen. Idaho led 14-0 after the extra point.

Fourth quarter: Idaho continued its strong offense when Heidt kicked off and the Mavericks were forced to punt. Idaho returned the punt to the Idaho 42-yard line. Heidt was successful on two 15-yard runs and Idaho moved into the red zone. Idaho quarterback Brian Ross (Robby) was successful on a 1-yard pass to Idaho wide receiver Bill Petersen. Idaho led 14-0 after the extra point.

The Idaho Vandals won 20-0 against Minnesota State and moved to 2-1-1 in the Big Sky Conference.

VANDAL TRIO JUGGLED this pass momentum, then held on in the end zone to give the ATC three touchdowns and all the margins they needed to defeat TMA 46-0 and capture the intramural football championship.

ATO's edge TMA 6-0: win campus trophy

Saturday, Oct. 10

Run Two's leaps of a Jerry Springer pass in the TMA and new pass grant the ATC a 6-0 victory over the TMA in the Homecoming intramural football game Friday afternoon.

The game was a defensive battle throughout. In the first half the ATC put together four good drives on screen and pass plays and short bootlegs, but were unable to take advantage of the TMA defense.

The TMA defense was again unable to move in the ball to the ATC 6-0 line and quarter and the defense successfully intercepted several passes.

The second half was the same story as the TMA defense was able to intercept the ball and the TMA offensive line was unable to make any progress.

The extra point attempt to Jim Thomas' pass was intercepted, but the TMA defense was successful in its first quarter.
Glennis Conner named 1969 Homecoming Queen

by Amy LaMarche

"I was really happy and proud to represent the Vandals and the University of Idaho," Glennis Conner said when asked her feelings about being crowned 1969 Homecoming queen.

Glennis was at the University of Idaho for three years, having transferred from Rockland, Idaho to majoring in elementary education and minor in social sciences and physical education.

"I was surprised it worked out so easily," Glennis commented about her triple crown.

Glennis will be student tracking another three weeks in Boise at Langdon Green.

During her stay in Boise, she will live with several other girls from the university who are being studied by the tracking center.

Among Glennis' hobbies are skiing, swimming and horseback riding. Even though the news report of her occupancy, Glennis still finds time for her horse whose name she asked not to be revealed because it was embarrassing to her.

Whenever she wanted to go skiing at home, she would just go to the San Valley or Bogus Basin. Her dad does not even have a driver's license or a car, but he is a ski area. So we always had to get out of town for everything.

A transfer from the College of Idaho where she attended school for two years and was a math prep pupil, Glennis belongs to Daughters of Idaho on the 1969 Homecoming court.

"I really hoped to win the Homecoming queen," Glennis said. "I felt like I had a good chance, but I never thought I would win.

"I was surprised it worked out so easily," Glennis commented about her triple crown.

In the past, Glennis has attended summer school at Boise State College for six weeks. At the completion of summer school, Glennis and her parents traveled to Hawaii by ship.

The trip never took place, but it was something Glennis enjoyed.

The Conners spent another two days in Hawaii and returned home to Idaho.

When asked what she liked best about Idaho, Glennis said, "Everything! I really want to go back someday soon.

The memory of Glennis' memory was spent working for Boise Cascade in San Valley. Her job included picking up the morning newspaper and delivering it to the doorstep of the confections Boise Cascade was holding.

"The job wasn't really too bad," Glennis said. "Sometimes we made mistakes that were too bad."
