Church and nerve gas

Editor, the Aspool: Last Saturday I had an opportunity to speak with Senator Davis, Oregon, Senator Jack Metcalf, Idaho, Senator Barry Goldwater, Arizona, and Senator Warren Magnuson, Washington, concerning this specific question of nerve gas. However, it seems to me that this is a question that is not being well enough dialogued or debated in the Senate.

I mean serious that ensuring that American children and every American, not only those in this country but those who live in other countries, are properly protected against the dangers of nerve gas. We must take every action possible to ensure that this is not a weapon that is used in the future.

You may wonder why I feel so strongly about this issue. I believe that nerve gas is a real threat to our safety and a threat to our future. It is a threat to our children and to our children's children. If we do not act now, we may be forced to do so in the future.

Well, we Students Senate has gotten our way in this case. Oregon, Washington, and Idaho have each stepped up to offer the students of the state a chance to be heard.

And so it is that we have the opportunity to make a difference. We have the opportunity to be part of the solution. We have the opportunity to be part of the history.

Student Senate may write obituary

TODAY

Last Friday afternoon and Tuesday afternoon, the President and one of the best known figures of the Student Senate, Regis McVicker, was walking softly by. Posing for the camera, the students of the Senate, we felt a strange sense of melancholy. After all, we are only people, with feelings, with desires, with fears. We are all students, with dreams.

Right there in public view, we knew what we were about. We were a group of the "human" Students Senate. We were the people who make the decisions, who write the policies, who carry the torch.

And yet, as we walked by, we could see the smiles on the faces of the people in the crowd. We could see the pride in the eyes of the people who were watching us.

What does this demonstration mean? It means that the V.H.G. going to their subcommittee, bribery the against their free will, are taking the options that the people of the United States were given in the election. They are taking the options of the people of the United States.

And yet, as we walked by, we could see the smiles on the faces of the people in the crowd. We could see the pride in the eyes of the people who were watching us.
