Tri-Service Review to be brief this year

This year's Tri-Service Review Service will be brief and to the point—the point being the review of the university's ROTC programs. The Tri-Service Review is for the benefit of the University of Idaho ROTC program and is not open to the general public.

This is the reason for the distinct lack of background information in this year's review. Instead of providing historical background information, the review will consist of a brief statement by each of the individual services involved with the university's ROTC program: the Army, the Navy, and the Air Force.

The three services will present a brief statement on their programs and how they are conducted at the University of Idaho. These statements will be followed by a discussion of the university's ROTC program as a whole.

The review will also cover the current status of the university's ROTC program and its future plans. The review will be concluded with a brief summary of the university's ROTC program and its goals for the future.

The Tri-Service Review will be held in the University Union and is open to the public. Attendees are encouraged to attend and learn more about the university's ROTC program.
Student Bill of Rights goes to General Faculty on Thursday

Editor's note: The Student Bill of Rights will be under consideration Thursday by the General Faculty. If in its next step toward final approval, Faculty Council has approved four students. Jim McManus, a junior, and Roger Totten and Jim Willis to act as spokesmen for the students at the meeting. The general faculty will hear the students' three presentations, to allow these students to act as spokesmen, the Board of Regents of the University of Idaho said. The Board of Regents of the University of Idaho also has been approved by the General Faculty. Before they are admitted as spokesmen to Thursday's meeting.

Section I Freedom of Association

1. Students shall be free to organize and engage in associations to promote their common interests.

2. University approval shall not be required for the organization of any student association.

3. The University shall be obligated to recognize the student association as a legal entity and to provide all opportunities for the student association, including but not limited to, participation in the Board of Regents and the University of Idaho University Council.

4. The University shall not discriminate against any student organization on the basis of race, sex, or national origin.

5. The University shall provide all necessary opportunities for student activities that are consistent with the policies of the Board of Regents and the University of Idaho University Council.

Section II Freedom of Inquiry and Expression

1. Students shall be free to engage in inquiry and expression, such as public and private discussion, debate, or writing, whether or not such inquiry or expression may be approved by the University or the Board of Regents.

2. University approval shall not be required for the organization of any student association.

3. The University shall be obligated to recognize the student association as a legal entity and to provide all opportunities for the student association, including but not limited to, participation in the Board of Regents and the University of Idaho University Council.

4. The University shall not discriminate against any student organization on the basis of race, sex, or national origin.

5. The University shall provide all necessary opportunities for student activities that are consistent with the policies of the Board of Regents and the University of Idaho University Council.

Section III Discretionary Regulations

1. Discretionary regulations may be enacted only as the conduct of students on campus which interfere with the academic and social life of the University. Discretionary regulations are those that are not mandatory or non-discretionary or any other regulations that the University may enact in order to maintain the academic and social life of the University.

2. Discretionary regulations are not mandatory or non-discretionary or any other regulations that the University may enact in order to maintain the academic and social life of the University.

3. Discretionary regulations are those that are not mandatory or non-discretionary or any other regulations that the University may enact in order to maintain the academic and social life of the University.

Section IV Disciplinary Hearings and Procedures

1. "Disciplinary action" is defined as any penalties imposed on students, including suspension, expulsion, and disqualification from future enrollment or participation in University activities, that are not in accord with the procedures set forth in the student disciplinary procedures of the University. Disciplinary action is defined as any penalties imposed on students, including suspension, expulsion, and disqualification from future enrollment or participation in University activities, that are not in accord with the procedures set forth in the student disciplinary procedures of the University.

2. "Disciplinary action" is defined as any penalties imposed on students, including suspension, expulsion, and disqualification from future enrollment or participation in University activities, that are not in accord with the procedures set forth in the student disciplinary procedures of the University. Disciplinary action is defined as any penalties imposed on students, including suspension, expulsion, and disqualification from future enrollment or participation in University activities, that are not in accord with the procedures set forth in the student disciplinary procedures of the University.

Schorr explains pollution problem

By Carolyn Goss

There are four keys to any solution to the pollution problem, according to CBS news commentator Daniel Schorr. First, people ignore the problem; the second is that they dramatize the problem, thereby driving people away from its reality. The third is that they believe they can't do anything about it, and the fourth is that they blame someone else for it.

Speaking at the first ever forecasting meeting of the Symposium on Human and the Environment, Schorr said that too many people are and talk on the pollution problem for the wrong reasons. "You're doing this," he said, "for the right reasons. That's why you're here." And he went on to say that in order to solve the problem, you must first stop ignoring it, dramatizing it, believing you can't do anything about it, and blaming someone else for it.

"In order to solve the problem," Schorr said, "you have to ignore the problem, and then you have to dramatize the problem, and then you have to believe you can do something about it, and then you have to blame someone else for it. But the problem is that you can't do any of these things in the wrong order. If you do, you're going to be in trouble."

Earth resources termed infinite by James Boyd

James Boyd, president of the Copper-Capitol Co., and director of the U.S. Bureau of Mines, said that for all intents and purposes, the earth's resources are infinite. Boyd said that "we have been discussing the finite character of the earth's resources, but it is not true."

He went on to say that the use of some of the earth's resources has been "the by-product of the demand for other resources." He said that "the finite nature of the earth's resources has been overstated." Boyd also said that "the overuse of some of the earth's resources has been "the by-product of the demand for other resources." He said that "the finite nature of the earth's resources has been overstated." Boyd also said that "the overuse of some of the earth's resources has been "the by-product of the demand for other resources." He said that "the finite nature of the earth's resources has been overstated." He said that "the finite nature of the earth's resources has been overstated."
Hessel says population is solution

By Valerie Harper

Population control is key to the ultimate solution of worldwide overpopulation, noted Dr. Kirk N. Hessel in his talk at the Symposium this weekend.

"Population growth per se never does anything. Only what happens when population grows that matters," he said.

Worldwide population is doubling every 30 years, and if mankind continues along this trend, the world should double in size every 30 years. Even if we stop doubling in size in the next 50 years, population growth will double in size every 30 years. Even if we stop doubling in size in the next 50 years, population growth will continue to double in size every 30 years.

It is clear that without some sort of population control, the world will become uninhabitable, he said.

"We can't get to the point where the life of the individual is not so much limited by the population as the population is not so much limited by the life of the individual," he said.

The cost of population increase is not only in terms of resources but also in terms of human suffering and degradation of the environment, he said.

When population growth is slowed, the individual can once again enjoy the fruits of the earth, he said. "The only way to avoid this is to stop population growth," he said.

Hessel emphasized that population control is a key to world peace, and that without it, the world will continue to be a battleground for the survival of the fittest.

"There are so many frontier," he concluded. "We've got a wonderful problem ahead of us if we're going to survive, we've got to go right in to it."
Idaho Vandals track team shows
courage in win over Simon Fraser

by Chuck Malloy

The Idaho track team may not be the host athlete in the program, but they probably have earned the respect of their opponents. The Vandals have shown that they are capable of competing with the best in the nation this season.

The Idaho Vandals have had an extended two-week trip as they played in a few early-season tournaments in Idaho. After a disappointing fourth finish in the NAIA Indoor National Meet in Billings, Montana, the Vandals traveled back to Pullman to participate in the NAIA West Regional Meet.

The Vandals finished second in the meet, and Dan Hrdlicka of the Vandals was named the NAIA West Regional Meet's Most Outstanding Performer.

After the final run of the season, the Vandals had a chance to relax and enjoy the two-day trip. They played against each other in a friendly game of golf.

The Vandals showed that they are capable of competing with the best in the nation.

Golfers return home for dual meet today

Idaho State Golf Team will return home today from a trip to Washington, D.C. The team was able to win their first dual meet of the season.

The team is playing at the NAIA Indoor National Meet in Billings, Montana. After a disappointing fourth finish in the NAIA Indoor National Meet in Billings, Montana, the Vandals traveled back to Pullman to participate in the NAIA West Regional Meet.

The Vandals finished second in the meet, and Dan Hrdlicka of the Vandals was named the NAIA West Regional Meet's Most Outstanding Performer.
