3 U of I law students attend national moot court competition

Three University of Idaho law students were the only Idahoans among the 54 students who competed in the 33rd National Moot Court Competition in New York City. The regional competition held at the University of Idaho in Moscow last semester. The regional and national competitions are similar. Each team must draw a case and prepare an oral argument, a brief for their position and for the position they are arguing against. The teams are judged on their ability to present the case effectively. In the regional competition, the Idaho team was eliminated during the first round. Each team is permitted two judges for the regional competition. The team is eliminated after the first round.

Professor of law Robert J. Proctor, an Idaho bar member, is accompanying the team. Because of the cost of travel, only the law students able to raise money themselves are going to New York. They are using this trip to raising money for their trip. The law students are the only Idahoans among the 54 students who competed in the 33rd National Moot Court Competition in New York City. The regional competition held at the University of Idaho in Moscow last semester. The regional and national competitions are similar. Bullseye sport function well

About 150 guns have been rented and processed by Nightline, a pay-a-telephone service in the social welfare center of the Idaho Student Center. Mrs. Carolyn J. Bush, the program coordinator, said she is very pleased with the operation. Nightline is one of the best programs of the Idaho Student Center.

The service is particularly needed with the reaction of the Idaho State Fair. The fair is scheduled to be held in the middle of August. The Idaho State Fair is the largest state fair in the United States.

According to Bullseye personnel, the number of calls received by the Idaho Student Center during the past year, due to the service, is unexpected. The service has been a great success.

The Nightline service is open every day of the year except for the following:

Monday through Friday:

12:00 noon to 6:00 p.m.

Saturday:

9:00 a.m. to 6:00 p.m.

Sunday:

Closed

The service is available to anyone who needs a gun. The service is open every day of the year except for the following:

A case of special interests

The Senate enacted to turn $150 million for water and sewage treatment on Dec. 30. Monday. It voted to appropriate $110 million to the state to begin work on a sewage plant.

While this may sound like a true, it is the exact same situation as it was last year. A sewage plant is needed in the area to provide adequate sewage treatment for the community. The money is needed to provide employment for the area.

In addition, the sewage plant will be used by the University of Idaho and other local institutions. The sewage plant will provide jobs for the local labor force and will help to increase the economy of the area.

The sewage plant is also expected to provide clean water for the local community. The plant will help to reduce the amount of sewage discharged into the environment, which will help to protect the local waterways.

The sewage plant will also provide a source of revenue for the local government. The plant will generate income from the sale of treated sewage water, which can be used for irrigation or other purposes.

In conclusion, the sewage plant is a necessary project for the area. It will provide employment, help to protect the environment, and provide a source of revenue for the local government.

Good and bad

Christmas meanings varied

By James Rugg

Managing Editor

Christmas means different things to different people. In some cultures, it is a time of family gathering and celebration, while in others it is a time of introspection and reflection.

In the United States, Christmas is a time of gift-giving and feasting. It is a time to come together with family and friends to share in the joy of the holiday season.

However, in some parts of the world, Christmas is not celebrated in the same way. In some cultures, it is a time of mourning and reflection, and in others it is a time of fasting and prayer.

In conclusion, Christmas means different things to different people. It is a time to come together and celebrate, but it is also a time to reflect on our own beliefs and values.

Reader's response

Writers comment on Y.A.F., unrest

Editor, the Argonaut:

I read your editorial in the true spirit of Y.A.F., and felt that the reader should know that I feel strongly about it. I recently met with the President of Y.A.F., and I was very impressed with his ideas and his passion for the cause. I believe that Y.A.F. is a great organization, and I am proud to be a part of it.

Y.Y.

Dear Editor,

I am writing to express my concern about the recent unrest on campus. I believe that this is a serious issue, and that it is important for the university to address it in a timely and effective manner.

I recently spoke with several students who expressed their frustration about the situation. They feel that the administration is not doing enough to address their concerns, and that the university is not providing a safe and welcoming environment.

I believe that the administration should take action to address this issue. They should meet with the students to discuss their concerns, and work to find a solution that is acceptable to both the administration and the students.

Sincerely,

Y.Y.
For a good time, call 743-2697 and ask for D.V.

Why doesn't General Electric sell new ideas to the cities instead of new gadgets to the suburbs?

After thirty years or more of neglect, there's no suggestion of civic renewal.

But what kind of help?

Will another thousand solution merely mean the above activity started? Would doubling the police force locally bring it under control?

Can new rent laws feed landlording to provide more low-income housing?

But all old, obvious ideas have been tried. What's needed are new ideas and new technological developments.

General Electric has been working on the problem for a number of years now. And in that time we've come up with some things that will help.

Garbage

General Electric's research has come up with what is probably the most revolutionary idea in garbage disposal in years. Our scientists are working toward a process by which a special team of bacteria convert garbage into a high-protein food for cattle.

The process is still something of a "laboratory trick", but it could be in the clipper plant stage by as little as three years.

The company has a series of pilot plants in operation now in various parts of the country. And several cities have expressed interest in the idea.

Crime

You might not expect a company like General Electric to be doing anything about crime.

But the facts are, GE has been working with the Syracuse police in a new approach to the problem. Our scientists there came up with a whole new concept in police organization called "Comet Control System." In their first year, these teams were credited with cutting crime 25% in large, representative neighborhoods of Syracuse. And the concept has since been adopted by a number of other cities.

Housing

To meet the critical need for new low-income housing, General Electric is participating in the Department of Housing and Urban Development's Operation Humboldt.

While GE has no intention of constructing a conventional housing building, we do hope to supply the budding developer with new products needed to improve its efficiency. Our new products include design prototypes of advanced, modular homes that can be assembled in a matter of hours.

The company is now a part of the new ideas General Electric has come up with to help cities in the same time that we continue to improve "gadgets" for people.
Space limited
Campus parking said acute problem

On campus parking has become an acute problem for students, faculty, and staff. The recent shortage of parking areas is a result of areas now exist and the problem could get worse.

An Ad hoc Traffic Committee report is currently being compiled under the Committee on Campus Affairs. Dean Newman is the chairman of the committee and he expects the report to be helpful in figuring out the use of U of I’s complex parking problems.

The current shortage of parking spaces is a result of areas not in use in the Firestone parking lot.

The committee plans to use the Firestone parking lot for student parking only.

1. There is no problem that more state enforcement will not solve.

2. The parking problem is serious for persons walking, living, commuting or visiting in or near campus (close to no more/least than everyone).

a. Administration Building
b. Forestry

3. Assume the need for additional parking facilities and continuous maintenance, these should be hired for parking lots as necessary/possible.

a. Gravel/Asphalt
b. Concrete/Asphalt

c. Gravel/Concrete

4. Funds for development and maintenance of parking lots, whatever is best for the parking problem.

a. Data report/due to the university within annual budget.

b. Minimum, best paid to maintainer, staff, and faculty with regular access to cars on a regular status.

5. Parking lots are essential to the campus's survival and the university needs to invest in them.

6. Drivers should be aware and follow the rules of the road.

7. The minimum distance from a parking facility to place of work or class, assuming service drives for the affiliated students.

a. 1 block (on 2nd St.)

b. 2-4 blocks

c. 5-8 blocks

8. Vehicles other than service vehicles, no money or parking should be allowed in the inner campus. Parking lots in this area should be eliminated and the areas used for other purposes.

9. Comments.

YAF urges participation

Today is Appreciation Day, an event sponsored by the University Committee for Responsible Participation intended to be a day of unity and to demonstrate the resolve of the student body.

Plans for the day include a nation-wide demonstration of support as a show of all the people who understand the situation. Negative actions will be avoided and efforts to do this will be made.

The faculty and students are invited to show their support and to demonstrate the unity of the nation.

YAF asks all students to take part in the appreciation of the student body, according to Roger Newman, YAF chairman.

Mountaineers to meet

Snow, winding slick roads

Idaho College & Radio TV

Snow, winding slick roads await student travelers

By Kim

Idaho College & Radio TV

"The trip to Isk and Isk to I'm so excited," said YAF member Mike Crandall. "I'm looking forward to being home in time to catch the snow-covered mountains."

YAF members are planning on leaving on Thursday, Dec. 10th, for the trip to Isk and Isk to I'm. The trip will take about 20 miles and will include a stop at Idaho College & Radio TV. The members are planning to spend the night in Isk and Isk to I'm and return on Saturday, Dec. 12th.

The area is known for its beautiful mountains, which are covered in snow throughout the winter months. The members are looking forward to the opportunity to see the snow-covered mountains and the natural beauty of the area.

YAF is planning on making a stop in Isk and Isk to I'm to see the college and the surrounding area. The members are hoping to meet with the students and faculty at the college and to see the facilities and the campus.

The trip to Isk and Isk to I'm is a popular destination for YAF members, who are looking forward to the opportunity to spend time in the beautiful mountains. The members are excited about the trip and are planning to make the most of the time they spend in the area.

Vandals lose to Cougars

The Idaho Vandals lost a 1-1 record and dropped to third place in the Mountain West Conference. The Cougars defeated the Vandals 53-45 Saturday.

In the first half, the Cougars led 25-21 before going into the half with a 33-32 lead. The Cougars built up a 37-34 lead in the final minutes of the game to keep Idaho from catching up.

Stressing both offense and defense, the Cougars played their second straight game against the Vandals. The game was played in front of 3,285 spectators at the Kibbie Dome.

New ski school being started by Tamarack and North South

Tamarack and North South have announced plans to start the first ski school in the region. The school will be located in the North South area and will offer ski lessons to kids and adults.

The ski school will be open to members of the community. It will offer lessons in freestyle, alpine, and cross-country skiing. The school will also have a team that will compete in regional and national competitions.

Holiday hangings trim Idaho campus

By Isaac Shoup
Augusta Campus Editor

Bright blinking lights, fragrant pine, and a blanket of snow... the Christmas season is stealing away all across the college.

Every in December, the president's portrait in President Ernest Shoup's office in the Liberal Arts building is the only thing that is the same. The portrait is a reproduction of a work by a famous artist, and is a loving portrait to the University president. The original portrait is the same.

Living rooms all across campus have been decorated and windowed for the holidays. Christmas lights, evergreen, and pine trees are placed in the windows, adorning many of the dormitories, sororities, and fraternities.

The Sigma Nu's have covered the floors of their house with tinsel and pine. Also, the house has been decorated with lights.

The Sigma Chi's office is decorated with Christmas lights, evergreen, and pine trees. The office has been made to look like a living room, and the decorations are in harmony with the season.

The tow's office has been decorated with Christmas lights, evergreen, and pine trees. The office has been made to look like a living room, and the decorations are in harmony with the season.

The Development office has been decorated with Christmas lights, evergreen, and pine trees. The office has been made to look like a living room, and the decorations are in harmony with the season.

The Development office has been decorated with Christmas lights, evergreen, and pine trees. The office has been made to look like a living room, and the decorations are in harmony with the season.
