GENERAL ELECTRIC

SLAVES

In a quarter-century the General Electric Company has produced electric motors, having a total of more than 350,000,000 man-power. Electric light, heat, and transportation have also contributed their part to the freeing of men. These are America's slaves. Through their service American workers do more, earn more, and produce quality goods at lower costs than anywhere else in the world.

The college-trained man is the first to grasp these facts which raise man from a source of physical power to be a director of power, thus realizing the true economic value of the human mind.
