Regents approve visitation proposal; living groups to make final decision

A proposal which provides study and recreation within certain facilities in residence halls, hospitality and athletics was approved by the board of regents Friday.

The project was voted as part of an effort to reorganize the Board of Regents. The new group will assume the position of the board at the beginning of each academic term. Other regulations in the plan specify that each living group shall have control of its own subcommittees to change the institution in any minor way. The new group will be elected by students who are not willing to live in existing housing units.

Regent Studnits approval

The board of regents approved a new program to be initiated by the University of Idaho, according to the board of regents who approved the plan.

The board of regents was founded in 1941 to provide a new program for the University of Idaho in 1941 and 1951.

And many other things

Regents consider budgets

The board of regents approved a new program to be initiated by the University of Idaho, according to the board of regents who approved the plan.

The board of regents was founded in 1941 to provide a new program for the University of Idaho in 1941 and 1951.

Bookstore name change

The bookstore was named after the University Idaho Bookstore, the store will now officially be called the University Idaho Bookstore, according to the board of regents who approved the plan.

Munson installed

Dr. J.P. Munson, a University of Idaho professor, was instated Thursday as the new president of the Idaho State University and the Board of Regents for the University of Idaho at the Board's meeting.

Calendar revised

This year's calendar at the University of Idaho for 1971 will begin with an inventory of fresh new students and is expected to provide a new program for the University of Idaho in 1941 and 1951.

Rules, regulations on agenda for senate consideration

Tule and regulations regarding the way the Senate will operate will be submitted for consideration by the Senate in early May.
**University gift checkbook is a rip-off**

**Mikes Kirk**

Upon close examination of the instrument at interest honors presents features presented...

“You're being ripped-off!”

Once again, the infamous merchants of Moscow have again been caught in a severe consumer offensiveness feature that has long been a hallmark.

"You're being picked-off!" Only once again the infamous merchants of Moscow have again been caught in a severe consumer offensiveness feature that has long been a hallmark.

In their recent advertisement, the merchants have presented a deal where you can save $67 worth of services on the bill.

Two Idaho students killed over break

The University of Idaho students were reported to have been found dead in a third floor residence student on campus. The two individuals were identified as students. One of the students, a 19-year-old resident of Moscow, Idaho, and the other, a 20-year-old resident of Pocatello, Idaho, were found dead in their respective residences on campus.

George M. Glodet, 19, Spokane, a yoga instructor at the University of Idaho, was killed in the accident which occurred Thursday at 10:30 a.m. in the student residence on the 13th floor of the university. The富贵大学 of the student residence on the 13th floor of the university, who was...
Microteaching course initiated for chemistry graduate students

Graduate students have long been accused of dismal teaching skills. And university students they teach a great deal less, which to their credit, they teach to their students. But the chemistry department at the University of Idaho

"We find that at least highly and university students they teach a great deal less, which is to their credit. They teach to their students. But the chemistry department at the University of Idaho

Vandals slate opener

The Idaho Vandals will open their basketball season today at 3 p.m. when they host Montana at the Kibbie Dome. The game will be televised locally by KTVB Ch. 7. This also marks the final home game for seniors Gary Allen, Rick Benbow, Ken Hooper and Steve Webber, who have been starters.

Seattle and Boise State round out the non-conference schedule. All three games will be at 7 p.m. Kuldell Field in Seattle and Kibbie Dome in Boise.

The Vandals will be looking for consistent play from several key starters. Gary Allen will be expected to provide leadership. He is a senior who has proven that he can handle the responsibilities of being a senior leader. Gary Allen is expected to bring his usual energy and enthusiasm to the game.

The game will be a battle between two teams with different styles of play. Seattle will rely on their defense and hustle while Boise State will try to wear the Vandals down with their ability to run the floor and put pressure on the Vandals.

The Vandals will need to play well in order to win. They will need to be able to control the game and limit the opportunities for the other team to score.

It will be interesting to see how the Vandals handle the pressure of being the home team and playing in front of a large crowd.

Overall, this game should be a good test for the Vandals as they try to get their season off to a good start.

In conclusion, the Vandals will face a challenging opponent in the Seattle Redhawks. Given their experience, they should be able to handle the pressure of being the home team and win this game. However, they will need to be on top of their game in order to come out on top.

The game will be a good indicator of how the Vandals will perform in the upcoming season. If they play well, they will have a good chance of making a playoff run. If they struggle, they may have to work harder to get to where they want to be.
Waterbeds beneficial for backs, circulation; have disadvantages

By John Foley

There is a lot of advertising out these days for the benefits of using a waterbed, and this is no surprise. In itself, the exaggerated nature of such advertising would be tolerable if it were not so often the case that waterbeds are being sold by people who don't know what they are doing. There are certainly instances of fraud and deceit involved.

Waterbeds have been around for a very long time. They were popular in the 19th century, and there are several books written about the subject. Unfortunately, many of these books are quite outdated, and some of the information is outdated or incorrect.

There are many problems with waterbeds, but one of the most common is the amount of water used. One problem is the amount of water used, which can be as much as 1,000 gallons. The water is heated and the bed is sealed, and the water is then allowed to circulate through the bed. This can be very expensive, as well as being difficult to maintain.

Another problem is that waterbeds are not very comfortable. The water is too cold or too hot, and the bed is often too hard. Also, the water can get into the bed and make it uncomfortable to use.

There is also the issue of the water being contaminated. The water used in waterbeds is often not cleaned and can contain bacteria and other harmful substances.

There are also concerns about the safety of waterbeds. Some people have reported that the water has caused burns and other injuries.
