Student kills 40 white-tailed deer

By Lyne Harms

Forte white-tailed deer are dead. In his pastime, the name of Forte, a University of Idaho graduate student, who is making a presentation on the dynamics of white-tailed deer population growth in Latah County, a county where many students have questions about the survival of this species. Although the reason for Forte's actions is not clear, it is widely believed to be related to his research regarding the impact of white-tailed deer on local ecosystems.

According to Forte, his research is focused on understanding the factors that influence the population growth of white-tailed deer in Latah County. His study, which is based on data collected over the past several years, has revealed that the population of white-tailed deer in the county has been steadily increasing, leading to concerns about the sustainability of this trend.

Forte's research has also highlighted the importance of understanding the interactions between white-tailed deer and other species in the area, such as mountain lions and coyotes. These interactions can have significant implications for the health of the local ecosystem.

In conclusion, Forte's research provides valuable insights into the dynamics of white-tailed deer population growth in Latah County. His work, which is expected to be published in the near future, is expected to have a significant impact on our understanding of this species and its role in the local ecosystem.
Argonau press council discusses YAF conflict

The Argonaut press council held a two-hour Thursday night argument over the YAF case at the University of Washington in Seattle. The council, according to members of Sigma Delta Chi, the professional journalism society, is composed of nine members of the university community and was founded to act as an advisory body to the Argonaut. They are charged with the duty of hearing complaints about the Daily, providing editorial reporting in the Argonaut.

Thursday's meeting saw YAF Chairman Roger Kopepcion reiterate his appeal that the YAF's article be retracted and that they apologize for the image of the YAF's article. The article was published in the Daily, the newspaper comprised of the University.

Kopepcion said that the article did great damage to the YAF and that even with the retraction the damage had already been done. He reiterated that the YAF's article be retracted and that they apologize for the image.

Press council member Allen Dalby, said that the YAF article was not retracted and also added that he retracted the retraction.

Peter M. Franke, professor of music, will be the featured artist with the University of Idaho String Chamber Orchestra at 8 tonight in the Argonaut Theatre. The concert will go on, he said, and the university received a letter from the university stating that the article was not retracted and that they apologized for the image.

The featured musical program includes Dvorak's "New World" symphony, and Viaduct's "Concrete Grooves for Two Violins and Orchestra," a program planned by the Argonaut for the concert.

Other events in the spring concert season of the Argonaut will be the Argonaut-University of Idaho Student Composition Recital, 7 p.m. Wednesday, and a senior recital at the University of Idaho, 2 p.m. Friday.

Prof. Frankyman to be featured at string concert tonight

The annual annual WSU International Friendship Council is not at 8:30 p.m. in the Argonaut Theatre.

The council, according to members of the Sigma Delta Chi, the professional journalism society, is composed of eight members of the University Community and was founded to act as an advisory body to the Argonaut. They are charged with the duty of hearing complaints about the Argonaut, providing editorial reporting in the Argonaut.

Other events in the spring concert season of the Argonaut will be the Argonaut-University of Idaho Student Composition Recital, 7 p.m. Wednesday, and a senior recital at the University of Idaho, 2 p.m. Friday.

Veteran Martin I. Franke, professor of music, will be the featured artist with the University of Idaho String Chamber Orchestra at 8 tonight in the Argonaut Theatre.

Franke will join the chamber orchestra for an hour and a half, during which time he will appear with the orchestra in "Little Zephyr," an opus for small orchestra and piano by contemporary American composer Charles Black.

The featured musical program includes Dvorak's "New World" symphony, and Viaduct's "Concrete Grooves for Two Violins and Orchestra," a program planned by the Argonaut for the concert.

Other events in the spring concert season of the Argonaut will be the Argonaut-University of Idaho Student Composition Recital, 7 p.m. Wednesday, and a senior recital at the University of Idaho, 2 p.m. Friday.
Transcendental meditation under study

By Peter Brook

Meditation, obviously, has different connotations for different people and groups. Without proof of the actual benefits, some people continued to doubt that meditation could do anything away from anything connected with webhook. This, however, the Transcendental Meditation, however, has been of particular interest to those interested in stress reduction and the possibility of using the practice as a means of keeping individuals calm during periods of stress. The evidence on this front is somewhat mixed, but it appears that people who practice TM tend to feel more relaxed and less anxious. The practice itself is relatively easy to learn, and it is generally considered to be safe. It is also relatively inexpensive, which makes it accessible to a wide range of people. The disadvantages of TM include the fact that it is a relatively new practice, and there is still some debate about its efficacy. Additionally, some people may find it difficult to find a quiet place to meditate, which can be a challenge for those who live in busy areas. Overall, however, TM appears to be a promising practice for those looking to reduce stress and improve their mental well-being.
The football team this year has a "B" and a "D"; and the "A" has three of less games, but winning Washington at 3-2 and 2-2, heating Gampy’s 5-0 in the cold weather at Spartan Stadium, and losing to Air Force 20-0. The blanks have been handled by WCU 12-0 and 3-0, while beating Montana 14-4. They did not play in Spokane over the weekend.

Look ahead for the "A" teams to forward, Mekkman Tukfein, South End, Larry Brown, Scott Simmons, and Matt and McClain, Coaslo, Gault and Glazier.

Kiwani Pancake Feed
Good Souvenir, Milk, Juice, Coffee
Saturday, May 8th—Moscow Orange Hall
$1.25 Per Person
(charted $100,000 for children’s homes)

**UNIVERSITY INFORMATION**

- Four members of the University’s Soccer team have been selected to represent the team. From left are Ali Ali Sel, Syed, Mubarak, Avowei, Ibrahim, Ali, and Ali Kamm Mustapha. Footnotes:

1. season passes are now available by contacting the athletic department.
2. the season ticket price is set at $25.00 each.
3. the team will play a schedule of at least 14 games, including games against
   Oregon and Washington.
4. the team will attend six home games and six away games.
5. the team will play a total of 10 games, including three home games and seven away games.

- The team will attend six home games and six away games.
- The team will play a total of 10 games, including three home games and seven away games.
“According to student evaluations Baumgardner is average or slightly below average in his teaching ability. The student evaluation form is not less effective at the graduate level than at the undergraduate level.”  

Dr. Browne

One way to look at it—Browne

Sitter’s note: Dr. Michael Browne, chairman of the physics department, told Dr. Baumgardner that the non-reappointment of a young assistant professor—Dr. Baumgardner, the assistant professor’s mentor—was due to the personality clash rather than for any significant, tangible reason.

ARGONAUT: Why was Carl Baumgardner fired?

BROWNE: First off, it wasn’t like. I met another assistant. It was bad. This help to personality clash rather than for any significant, tangible reason.

ARGONAUT: The non-reappointment of a young assistant professor—Dr. Baumgardner, the assistant professor’s mentor—was due to the personality clash rather than for any significant, tangible reason.

ARGONAUT: Was there any kind of personality clash between Dr. Browne and Dr. Baumgardner?

BROWNE: I’m not entirely sure if there was. What I do know is that both Dr. Browne and Dr. Baumgardner are very kind and likable people. They both had a very strong sense of justice and a desire to protect their students. This led to a very close relationship between them. In the end, they both felt that it was the best decision for both of them.

ARGONAUT: Do you think that the decision to non-reappoint Dr. Baumgardner was a mistake?

BROWNE: I don’t think that the decision to non-reappoint Dr. Baumgardner was a mistake. The decision was made in the best interest of both the department and Dr. Baumgardner. He was not a good fit for the department and it was the right decision.

ARGONAUT: What kind of person is Dr. Baumgardner?

BROWNE: Dr. Baumgardner is a very talented person. He has a lot of potential and I think that he could have had a very successful career in the field of physics. He was very dedicated to his work and he was always striving to improve his skills. Unfortunately, he didn’t have the discipline or the drive to make it to the next level.

ARGONAUT: Do you think that Dr. Browne is biased in his evaluation of Dr. Baumgardner?

BROWNE: I don’t think that Dr. Browne is biased in his evaluation of Dr. Baumgardner. He is a very fair and objective person and he always strives to make the best decision for the department.

ARGONAUT: What kind of impact did the decision to non-reappoint Dr. Baumgardner have on the department?

BROWNE: The decision to non-reappoint Dr. Baumgardner had a significant impact on the department. It was a very difficult decision to make and it caused a lot of tension and conflict. However, I believe that it was the right decision for the department and for Dr. Baumgardner. It was a difficult decision to make, but I think that it was the best decision for everyone involved.

ARGONAUT: How do you think that the decision to non-reappoint Dr. Baumgardner will affect the future of the department?

BROWNE: I think that the decision to non-reappoint Dr. Baumgardner will have a positive impact on the future of the department. It will allow the department to focus on the strengths of its faculty and it will encourage new ideas and perspectives.

ARGONAUT: Do you think that the decision to non-reappoint Dr. Baumgardner is a trend in the field of physics?

BROWNE: I don’t think that the decision to non-reappoint Dr. Baumgardner is a trend in the field of physics. It was an isolated incident and I don’t think that it will have a significant impact on the future of the field.

ARGONAUT: Do you think that the decision to non-reappoint Dr. Baumgardner was a fair decision?

BROWNE: I think that the decision to non-reappoint Dr. Baumgardner was a fair decision. It was made in the best interest of both the department and Dr. Baumgardner. He was not a good fit for the department and it was the right decision.

ARGONAUT: What kind of impact did the decision to non-reappoint Dr. Baumgardner have on the student body?

BROWNE: The decision to non-reappoint Dr. Baumgardner had a significant impact on the student body. It caused a lot of confusion and uncertainty. However, I believe that it was the right decision for the department and for Dr. Baumgardner. It was a difficult decision to make, but I think that it was the best decision for everyone involved.

ARGONAUT: What kind of impact did the decision to non-reappoint Dr. Baumgardner have on the community?

BROWNE: The decision to non-reappoint Dr. Baumgardner had a significant impact on the community. It caused a lot of discussion and debate. However, I believe that it was the right decision for the department and for Dr. Baumgardner. It was a difficult decision to make, but I think that it was the best decision for everyone involved.

And another perspective—Baumgardner

I consider my dispute to be fairly straightforward. If I would have had the opportunity to present my case in an unimpeded way this whole thing would not have happened. Browne picks and chooses what information he wants to present in order to write his article. I believe that what Browne has written about me is not true and I think that he is biased in his evaluation. I believe that I was fired because of a personality clash and not for any significant, tangible reason.

ARGONAUT: Do you think that the decision to non-reappoint Dr. Baumgardner was a mistake?

BAUMGARDNER: I don’t think that the decision to non-reappoint Dr. Baumgardner was a mistake. The decision was made in the best interest of both the department and Dr. Baumgardner. He was not a good fit for the department and it was the right decision.

ARGONAUT: What kind of person is Dr. Browne?

BAUMGARDNER: Dr. Browne is a very fair and objective person. He always strives to make the best decision for the department.

ARGONAUT: What kind of impact did the decision to non-reappoint Dr. Baumgardner have on the department?

BAUMGARDNER: I think that the decision to non-reappoint Dr. Baumgardner had a positive impact on the department. It allowed the department to focus on the strengths of its faculty and it encouraged new ideas and perspectives.

ARGONAUT: Do you think that the decision to non-reappoint Dr. Baumgardner is a trend in the field of physics?

BAUMGARDNER: I don’t think that the decision to non-reappoint Dr. Baumgardner is a trend in the field of physics. It was an isolated incident and I don’t think that it will have a significant impact on the future of the field.

ARGONAUT: Do you think that the decision to non-reappoint Dr. Baumgardner was a fair decision?

BAUMGARDNER: I think that the decision to non-reappoint Dr. Baumgardner was a fair decision. It was made in the best interest of both the department and Dr. Baumgardner. He was not a good fit for the department and it was the right decision.

ARGONAUT: What kind of impact did the decision to non-reappoint Dr. Baumgardner have on the student body?

BAUMGARDNER: I think that the decision to non-reappoint Dr. Baumgardner had a positive impact on the student body. It allowed the student body to focus on the strengths of its faculty and it encouraged new ideas and perspectives.

ARGONAUT: Do you think that the decision to non-reappoint Dr. Baumgardner was a mistake?

BAUMGARDNER: I don’t think that the decision to non-reappoint Dr. Baumgardner was a mistake. The decision was made in the best interest of both the department and Dr. Baumgardner. He was not a good fit for the department and it was the right decision.
