Campus security force will depend on students

"We're not forming a crime patrol or trying to get students to inform on each other," says Tim Hart, chief of campus security concerns planning to create a student security force. "We want students to participate in a safety mechanism which will protect life and property on campus."

"We want and need to expand our present safety force. The Student Safety Committee wants students to fill the positions which will be made available by the expansion. The students will be paid, probably through the work study program."

"It's important to get away from the concept of a student police force," Hart said. "We want to train people to first aid, sensitivity and so forth so they will be able to deal with a crisis situation. For example, we have a person who has overdosed drugs, left, in a положительный way but actually he is to the point of death and has been given emergency treatment."

"Our present remedy for the athletic department is a student trying to help him determine the proper medical attention."

"The present remedy for the athletic department is a student trying to help him determine the proper medical attention."

"We'd like the safety forces to be trained in the same way as the Big Farm did in the Farmington Police on the Connecticut Project volunteers did at Blue Mountain. That is, a group of people who are able to help people who need help," said Williams.

Closeup

"Campus theft and vandalism are a real problem," said Hart. "For instance, before registration, I noticed a student's backpack was missing."

Valid Amnesty claims by 70,000

Seventy thousand Americans who deserted the U.S. armed forces are now living in exile in Canada, according to Paul Clegg feature writer for the National. If amnesty were to be granted these people, it would create a new interpretation of the Constitution concerning the rights of the individual. Amnesty is defined by the U.S. Supreme Court as "an act of abdication of past offenses granted by the government to those who have been guilty of any neglect or crime, usually upon condition that they return to their duty within a certain period."

The Supreme Court is the official interpreter of the Constitution, and therefore defines the rights of the individual in relation to the rights of the state. This definition has varied reflecting the mood of the Court and the American people.

Clegg believes that the 70,000 deserters have a valid claim to amnesty because their individual rights were violated. He uses jurisprudence to defend his view.

The Constitution guarantees every citizen the right to freedom of religion. However, says Clegg, the government established religion with its policy of conscientious objection. He said, "The Supreme Court ruled against selective conscientious objection on the grounds that it was a political instead of a moral position. Consequently, it did not come under the realm of religious freedom. It ruled in favor of religious organizations that had absolute positions concerning participation in war."

But Clegg points out the trend towards equality of conscience is anathema for the American people. Can the process be expanded to include the situation of deserters? He asks.

"You had to be for all wars or against all wars," says Clegg. "This would seem to fall into the category of the state's established religion. It denies a moral position such as that of the Catholic Church and its just war theory under which a Catholic is compelled to examine a particular war and determine whether it falls within the criteria established for the justifiable use of armed force."

Still living, how about man?

Astronomers have known for some years that the Earth's magnetic field has been shifting over time. The rate of this change is not well understood, but it is generally believed to be on the order of 10^-10 gauss per year. This is a relatively slow process, compared to other phenomena such as the decay of radioactive isotopes.

The current magnetic field is believed to be generated by currents in the Earth's liquid outer core. These currents are driven by the rotation of the Earth and the presence of topographic features such as mountains and oceans. The field is also influenced by the presence of electrically conductive crustal material, particularly in areas of high water content.

The Earth's magnetic field is an example of a dynamo field, which is generated by the motion of electrically conducting fluids. In the Earth's case, the fluids are molten iron and nickel in the outer core. The field is produced through the interaction of these fluids and the Earth's rotation, resulting in the generation of electric currents that sustain the magnetic field.

The magnetic field is not static, but rather it is a dynamic system that evolves over time. The field is affected by a variety of factors, including the Earth's rotation, the presence of electrically conductive crustal material, and the motion of fluids in the outer core.

The magnetic field has been studied extensively, and it is now understood that it is not a simple, static system, but rather a complex, dynamic one that is driven by the motion of fluids in the outer core and the Earth's rotation.

The magnetic field is an important factor in the Earth's climate system, as it influences the distribution of solar radiation and the behavior of the atmosphere. The field also plays a role in the behavior of charged particles in the Earth's ionosphere, and it is a key factor in the formation of aurorae.

The magnetic field is also important for navigation, as it provides a reference for determining direction. The field is used by both humans and animals, including birds and humans, to orient themselves in space.

The magnetic field is a complex system that is subject to change over time. It is affected by a variety of factors, including the Earth's rotation, the presence of electrically conductive crustal material, and the motion of fluids in the outer core. The field is an important factor in the Earth's climate system, as it influences the distribution of solar radiation and the behavior of the atmosphere. The field also plays a role in the behavior of charged particles in the Earth's ionosphere, and it is a key factor in the formation of aurorae.

Comment and Opinion

Out with the old…?

From the Argument in the front-page layout of the SDS has come the feeling that someone has stood on the floor of the SDS and said, “You know, government is a beautiful thing.”

The King Fire and “Crazy” are both ridiculous and the “government of the people” must be something we are accustomed to. Many people still have unseen communities that have yet to be freed from the stranglehold of SDS.

Last week 54 percent of the student body turned out to vote, showing at least some interest in their government. Perhaps students were trying to represent themselves. It is up to that old cliché, “government for the people, by the people.”

Warner and Mittl, as well as most of the new senators, campaigned on the nuts that they would be the new voices of the SDS and the GSA on campus.

It’s a hope that they will sincerely dedicate themselves to this—event if they remain the only accomplishment in the course of the year.

Analyzing a problem in the SDS in the past, you would have pointed out the nuts of Warner, Mittl, and Warnick, who were a drop-out of student government.

For the past couple of administrations we have seemingly been fortunate to have young student representatives. However, we have not been materialized to the advantage of the local Stebbins of politeness of student government. That seems to be this year’s administration.

In the five years since my separation from the active minority I have witnessed in SDS the replacement of personalities and a new administration. It is time that this year’s government has had its chance.

We hope that you will have a chance to vote, which we feel will be the best opportunity for at least the small number of new people that are in the group. The government is the best way to express the feelings of the people of SDS.

The military—a black void?

The military is the best way to handle the problems of the world. There is a good chance that the military will change the world's situation in the future. The possibility of a peaceful future must be considered. The military is the only way to handle the problems of the world.

Safeway stores boycotted

The Farm Workers Support Group is at it again. The group, a front for the Farm Workers Alliance, has announced a boycott of Safeway stores in support of what it claims are the farm workers’ rights to the same working conditions as those of the pet industry.

"Our group is in support of farm workers," said Charles Johnson, University of Idaho pro-fessor and leader of the support group. "We're trying to help get better wages and working conditions for all farm workers. Our boycott targets Safeway stores in the abuse of Washington and Idaho of the farm workers."

The group will continue to picket and boycott until the workers are to be treated equal. Current law favors the growers and the Traders Union.

Safeway defended the group as just another illegal and legal boycott of the company.

"We are people trying to improve farm workers’ lives," said Bill Brown, a University of Idaho farm worker who is active in the boycott. "They are treated like animals and their rights are not respected."

Farm workers are being supported by the National Farm Workers Association, according to the boycotters.

"The farm workers have a right to a contract with the California farm workers union," Brown said. "They are being treated like animals and their rights are not respected."

Supporters of the boycott say that the Farm Workers Alliance has a contract with the California farm workers union. "They are being treated like animals and their rights are not respected."

"We're getting more and more support," said Brown. "The farm workers are being treated like animals and their rights are not respected."

Safeway has yet to reach an agreement with the farm workers union. "They are being treated like animals and their rights are not respected."

Safeway stores are being boycotted by the group. "They are being treated like animals and their rights are not respected."

The group plans to continue their boycott until the workers are treated equal. Current law favors the growers and the Traders Union.

Facts and fallacies

In recent years, the labor movement has become a growing concern in America. Community nutrition programs have increased in scope in response to poverty and health issues. Store front farms have sprung up across the country. Books on organic food, diets, and health have flooded the market.

In an effort to increase the worker’s awareness of the need for good nutrition, the American Dietetic Association has put aside March 6th-10th as their first annual National Nutrition Week. The theme this year is: "In Yourself: Buy Nutrition.

With all the information available, supplements, organic foods, and food supplements, it’s no wonder that many workers are confused about the different types of foods and what they do for the body.

As America’s workers, we have a responsibility to make healthy food choices. We should be able to afford healthy food. It should be affordable and accessible to everyone. Most Americans buy two or more servings of milk daily, believing that this is what they need. In reality, two or more servings of milk should be eaten daily. Milk, eggs, poultry, and beef are high in protein, sodium, and sodium. Vegetables, milk, fish, and fruit are low in sodium and are an essential part of a balanced diet. They are not an essential part of a balanced diet. They are not an essential part of a balanced diet. They are not an essential part of a balanced diet.

For more information on nutrition, visit the American Dietetic Association’s website at www.eatright.org.

It's somewhat gratifying that the U of I's last home game was one of the most disappointing, and yet got our homecoming season on the right foot. It was the first overtime period in George's basketball history, and a credit to both teams.

The Badgers came into Madison with a 13-game unbeaten season, and the Buckeyes were already considered one of the best teams in the country. The Badgers had won 13 straight games, and the Buckeyes had only lost six. The game was a closely contested battle, with both teams evenly matched. The Buckeyes eventually emerged victorious, winning 78-73. The Buckeyes' win was a testament to their resilience and determination, and it was a welcome addition to their impressive season. The game was a showcase of the best college basketball had to offer, and it was a treat to watch. The Buckeyes continued their winning streak, and they were poised to take their momentum into the next game.
**Insanity comes to Idaho via "Marat/Sade"**

by Bill Hubbard

The theatre queens of Moscow are in for a real shock this spring when "Marat/Sade" is presented by a group of Idaho students. The performance will take place on March 1st at 7:30 p.m. in the University Theatre. The play is a psychological drama about the madness of a mass mind, and is based on the actual events that took place in France during the Reign of Terror.

"Marat/Sade" is a challenging piece of theatre, and the cast of 15 is required to convey the complexity of the story through a variety of roles. The play is known for its use of abstract space and movement, and the actors are expected to remain in character throughout the performance. The intense and chaotic nature of the play makes it an exciting challenge for those involved.

**Festival features musical variety**

Jazz was the word at the day Saturday when the Intercollegiate Music Festival was held at the University of Idaho. The festival featured performances by the Idaho High School Band, the University of Idaho Wind Ensemble, and the Boise State University Orchestra.

A special feature of the festival was the "Music of the Americas" concert, which showcased the diverse and rich cultural heritage of the Americas. The concert included performances by the University of Idaho Symphony Orchestra, the Boise State University Chamber Choir, and the Idaho High School Chamber Orchestra.

The festival was a success, with attendees enjoying a diverse range of musical styles and genres. The performances were well-received, and the atmosphere was lively and engaging. The festival was a great opportunity for students and musicians to come together and celebrate the power of music.
