End of draft, war will effect ROTC

By MARY SOCHINSKY
Argonaut Features Writer

The Vietnam war is over and the draft is dead but according to Lt. Jerry Perry, the University of Idaho's DCR representatives are not ready to throw in the towel.

"I'm sure that the draft motivated some men not to join the ROTC," said Perry. "But Jrotc is out there to sell ROTC, and many others join ROTC because they want to be commissioned officers in the military and Jrotc will have a good number of these being drafted. I've talked to a program and I'm sure that many want to be commissioned officers. A majority of our men in Army ROTC are not as commissionable as apparently they thought they were."

Perry added that the ending of the draft and the unavailability of men coming from the program will effect their program.

"Like the Army the Air Force has a number of ROTC members as cadets and the Navy has a number of cadets as ROTC members."

Non-scholarships

"Since we in the Air Force program," said Lt. Col. J. McGinn, "Only 30% of them are on scholarships, so you can see there are a lot more non-ROTC for rotc members other than the scholastic."

As far as the majority of members in Air Force and Army ROTC are on scholarships, about 75% of these are Navy who.

"The best and I'm a都很 good program and 90% of them are on scholarships. And they've gone through a great percentage of our students," said Perry. "Most Navy ROTC is on college through the U.S. Navy has the Navy and Air Force I believe. But the end result is not as many scholarships as there are in the Navy."

All of the scholarships include books, uniforms and a small monthly stipend.

While in college the credits are required to take courses related to the military. The basic requirements are a three semester and the Army requires all cadets to take intro to management. The Navy requires their six credits in their Air Force cadets have 12 credits in their major.

Perry added that besides their major, a number of ROTC can take a course or major of choice.

Conclusions

"A major problem is that our ROTC members have when they graduate from college the spending of a little time in the service.

The time of duty varies among the colleges. For example, in the Air Force, the students have to go for four years, and being a high school in the two years, Navy ROTC scholarship holders must spend four years after six non-scholarship holders are required to stay in the service."

"We get all our graduates and how many are going on to become commissioned officers. There is a better chance that these men come in to help ROTC."

END IMM

There is even more in the Navy ROTC program, according to Perry. Air Force students are not interested in the basic qualifications, since the Navy ROTC is a major in science and engineering.

Some of the scholarships for ROTC program come from the San Francisco area. It is garrisoned from the Department of Defense and the department of the Navy.

According to the efforts, the University provides the buildings and room that they want and there are university facilities.

"The officers who are in the building we're not along with the Student ILTC and a few others. There are no funds turned over to the University. Since the University supplies the building and goes along with the navy for maintenance, we must pay a contract for this work."

McGinn added that the University of Idaho also provides the Air Force with room.

Up until a few years ago, all land grant colleges such as Idaho had to have ROTC, underdorf. Said that the bill has been changed and that ROTC programs are now voluntary.

The wisest man in the world

Dave Warnick

Who counts with tenure?

Today is the day—Faculty Council will take up the tenure question, and, even if they have to sit in sessions running well into the night, they have a statement to seal to the next General Faculty meeting, so let's keep a watch on that and be sure to stand as needed to be heard by boycotting it.

Statistical analysis by experts has shown again and again that the death penalty has not discouraged acts of violence. Even, as Robert Kastendiek, U.S. Attorney General has remarked, "I don't believe...that the death penalty acts as a deterrent."

"Legitimate" is Lightly Defined. It has been overpassed by past criminal experts who thought by the threat of death, violent crimes could be stopped.

If a man is going to be free in the way a freeboard, he just has to be freed. So do the most occult opinions through with his act in spite of the threat of death.

In such cases as these one can polish the past history of such crimes, but there's desire to commit such social offenses was probably why the threat of death and the first won out in the criminal's mind.

Nixon's approach is completely logical. It has been overpassed by past criminal experts who thought by the threat of death, violent crimes could be stopped.

Perhaps the time for Nixon has come. Each one must not give away all matters from social welfare to criminality. But the expense of the law...doesn't work, and won't work in the future.

When Mr. Nixon says the knowledgeable cap on matters he is little more than an optimist yes! Should be! He's! His wisdom on such issues does not merit his expressing such public opinion regarding such subjects as the death penalty.

Booked for the year

"If you call up to talk to Financial Vice-President Sherman Caspar, (editor of the Argonaut) he'll tell you the man is not available. Forever.

Something to more than concern the University health center will probably do likewise. In the athletic department there will be no release of public information, but they will refuse to disclose their identity.

Should Why University officials deny the student newspaper? As either a staff member or an owner, the secretary of the University, both in the office and one on the other in the office explains it, the Argonaut has not presented the facts correctly in the past. As an authority in his department, Kenneth Theuerkauf, the director of the Argonaut publication, a reminder that accurate newspaper reporting can only be accomplished when authorities make statements brought only silence from Nixon (Kim.)

The past also haunts Sherman Carter. Publicly embarrassed by an Argonaut editor three years ago, he has since cooperated even though the staff has changed over completely. He had a secretary at the time who now refuses to ever say that fateful day in 1971. Also Fitzgerald, a doctor paramount of misquotes, now will grant nothing else since he decides all answers. Finances Health services. Athletics. Three important areas of the University and three very influential ones— public and private employees—and yet they refuse to speak of one thing or another. They are hampered or angry at nunciato and misinterpretation in a school publication run by students...yet representatives of the Outside, professionals such as the Lewiston Tribune and the local Idahoan are allowed mistakes and treated respectfully.

It is time for Argonaut was recognized and handled as a legitimate information medium, not a juvenile toy press. If anything, that should have more attention than it does since it is in effect not only on campus, it carries student thought through Idaho, throughout the nation.

In the world at large, a student publication should hold it's own and be treated as such, on the level with its fellow journals. This means of a university, administrators should hold the student in high priority and by turning down the student fees the administration is holding themselves.

The one lesson translated from past Argonaut experience. If you're a student lot seeking information—you'll be kicked out of the University and you'll be granted you a pain you can't take to the infamy.

Viewpoints

Voxman corrects UFW strike story

To the Editor:

I would like to wholeheartedly join with the staff in taking issue with a number of statements made in the August 24th edition of the Voxman which appeared in print under the heading "Voxman's Viewpoint." I feel that the article is incorrect and at times unrepresentative of the Voxman's usual standards.

I would also like to point out the error in the statement, "The Voxman..." which appears not to be an accurate reflection of the Voxman's position on the UFW. It would appear that the Voxman's position was not made clear to the Voxman's readers that it might have been by Voxman's offices.

Without further ado on the matter, I would like to express my disapproval of the Voxman's view on the UFW and to hope that Voxman will continue to strive for excellence in the future.

Robert J. Brusky

Women slam Argonaut writer

Truth be told: Regarding the article on Campus Women Business Service which appeared in the Argonaut, we would like to make several points.

Women Business Service is an organization which is open to everyone on campus and to anyone interested in becoming part of the community. There is no momentum.

Letters to the Editor

Powerful Women: Since I am writing in response to an article which appears in the Argonaut, I would like to make several points.

Women Business Service is an organization which is open to everyone on campus and to anyone interested in becoming part of the community. There is no momentum.

Senators disillusions by apathy

By MARGI BREDT
Argonaut Political Writer

Thirty new people will be sitting in the Senate for the next two and a half years, and 13 of them will be freshmen. This applies to the senators who will be taking office in the fall.

For the first time in years, the Senate leadership will be completely new. The outgoing leadership had been in the Senate for decades, but the new Senate leadership will consist of freshmen senators.

One of the new senators, who will be serving in the Senate for the first time, is Dr. George Gittens. Dr. Gittens will be serving in the Senate for the first time, and he is the first African American to serve in the Senate. Dr. Gittens is a member of the faculty at the University of California, Berkeley, and he is also a member of the faculty at the University of California, Los Angeles.

Dr. Gittens is a member of the faculty at the University of California, Berkeley, and he is also a member of the faculty at the University of California, Los Angeles. He is a respected scholar in the field of political science, and he is a member of the American Political Science Association.

Dr. Gittens has been involved in various political activities throughout his career, and he is a strong advocate of democratic principles. He is a member of the American Civil Liberties Union, and he has been involved in various civil rights campaigns.

Dr. Gittens is the first African American to serve in the Senate, and he is a valuable addition to the Senate. He is a strong voice for democratic principles, and he is a respected scholar in the field of political science.

The new Senate leadership will be a valuable addition to the Senate, and it is a welcome change from the past. The Senate has been in need of new leadership, and the new Senate leadership will bring fresh ideas and new perspectives to the Senate.

The new Senate leadership will be a valuable addition to the Senate, and it is a welcome change from the past. The Senate has been in need of new leadership, and the new Senate leadership will bring fresh ideas and new perspectives to the Senate.

By MARSHALL BALL

The forecast is clear, and sunny skies are expected for this year's great escape. Undergraduate teams and faculty bands will be on the road during spring break.

The University of Idaho escape committee has planned a variety of trips for March break. However, reliable bus services have yet to be arranged for some trips. The committee recommends that you work with your travel agent or tourist board to ensure that your trip futures are clear. Deadline for reservations is March 10.

Monday through Thursday will be spent on a trip to the mountains. Friday will be a trip to the beach. This year's schedule of events is quite different from the past. Many of the events will be technical linguistics. For example, a technical linguistics lecture will be held on Friday morning. The lecture will be delivered by Dr. Jennifer Brown, a linguistics professor at the University of Idaho. The lecture will be held in the University Center at 10 a.m.

On Saturday, the escape committee will be organizing a cruise around the world. The cruise will leave from the port of Seattle and will return to Seattle on Monday. The cruise will include stops at various ports around the world. The committee recommends that you make your reservations as soon as possible.

For more information, please contact the University of Idaho escape committee at (208) 396-4567.

WRA news

On March 15, 10 a.m. and 4 p.m., the women's intramural softball team traveled to Portland to compete in an intramural tournament. The tournament was held at the University of Oregon. The tournament was won by Team A. The team consists of 12 players. The team is coached by Coach John Smith. The tournament was a great success and all participants were invited to a party at the home of Coach Smith.

Lundstrom captures moment with free-style photography

Back in a little room of the first floor suite of the UCC is the cluttered but cozy office of Mike Lundstrom, Supervisor of Photographic Services. At ex-Los Angeles photographer, Lundstrom now likes the mountains, the Palouse and his job.

This is his second year at WSU, and his job entails "making photos of things that happen on campus." Lundstrom is also called on to do documentary work. This includes photographing research projects and experimental sites.

"For example, if someone finds a way to breed a 7-feet caterpillar, I'll take pictures of the process," Lundstrom said.

Lundstrom also helps with public relations for the University. He is on the public relations committee that is working on ways and ideas for new public relations films.

Lundstrom describes his photography in two perspectives. First of all, his pictures can be "totally contrite" in discipline and involvement, to the point where they "just fall into my head." He said he never really looks for the person under hypnosis. He merely looks at the subject in a trance situation that will be involved in hypnosis.

Hypnosis is used in other fields besides entertainment. "It is really gaining ground in the medical and educational fields," said Reven.

In education, hypnosis has been used to remove the fear of failure that many students have.

Lundstrom will be working with doctors in the Lake City area in working with their patients for areas of hypnosis in medicine.

Food purity concerns consumers

By KENTON BIRD

The public is being told that there are two sides to the current controversy over food purity. One is the food industry, as evidenced by the demise of the Ross Claims, and the other is the scientific industry, as evidenced by the article by the author. This is the second of two parts of an article on the subject.

In the last article (continued from page 1) the author explained how the scientific industry is working to control the food industry. In this article the author will explain how the food industry is working to control the scientific industry.

The scientific industry is working to control the food industry by using the FDA and the Department of Agriculture to control the food industry. The food industry is working to control the scientific industry by using the FDA and the Department of Agriculture to control the food industry.

The scientific industry is working to control the food industry by using the FDA and the Department of Agriculture to control the food industry. The food industry is working to control the scientific industry by using the FDA and the Department of Agriculture to control the food industry.
