Damm the Torpedoes

Many people interpreted last week's thrashing of the University of Idaho at Pullman as another sign of the university athletic department and a kick in the rear to Idaho's coming home, it was heard from many faculty members that there must be something wrong when a school has so many losses before the public that it can't have a square slant at all if it's academic self-being. As student in Pullman who had never been to Moscow in her life said that she had the impression that nothing goes on at the northern institution besides beer drinking and fraternity pranks.

However, to say the least, there is a tremendous difference between being dynamically alive and being morbidly dead, and this characteristic can apply as much to a university as it can to a human being—sometimes it is the quality of the latter which gives or takes from the former. Because this University is commercial, it's good name on the line for the sake of debate and takes the crap, deserved or not, from the state and local press and public. What'll make it crumbling, and it will soon sink under the weight of the Palouse.

If it exactly these characteristics, the debate, the controversy, the research, the dynamics of the student press, which makes this institution the most intellectually sound and alive place in the state of Idaho. It is President Hartung, with his League of the True, and Tom Richardson with his "waxy" and all the turkey of the year awards handed down by the Argonaut which makes this University the center for everything which is distinct, biased, perfect and cheap and the end, in good. To turn the back to controversy, to exploit the common denominator of the two issues and continuous discussion, is in some way the same as the reason this institution exists.

One can be sure we have athletic financial problems and that we have to make changes in the athletic department, to avoid some of its major problems, but none of us should be sure that we confront this issues head on and with the forethought and speed that is called for, but in open forum and in the press around the state.

Some feel that it is not only enough to cut the budget of the University of Idaho, but to live, not only read polemics, but live it, and not only exist like acrobatic owls but get out of our own way and get on with it.

The University of Idaho is a Gallic, but there are no Davids with enough stones to do it. As long as the Hartung's, Owsley's, or Bruch's are in charge, they are not afraid to fight, the University of Idaho is one giant that will never fall, even to the State Board.
Students Win on the True, the Wise, the Services

From Truly, the Wise, the Services: University students are having a tough time picking up the checks on the University's end, and even when they do they may not be getting their money's worth.

The problem is that the University has not been able to keep up with the increasing number of students and the increasing costs of education. The University has had to cut back on its spending in order to keep the budget balanced, and this has resulted in a decrease in the quality of education that students are receiving.

Students are demanding better services and more attention from the University, but the University is only able to provide so much with the resources it has. The University is in a tough position and needs the support of its students to continue to provide the education that they need.

We hope that the University will take the students' concerns seriously and work to improve the situation. The students deserve better and they are entitled to it.

They Couldn’t Beat The Idaho Vandals

They beat Stanford, they beat Louisiana State University last day, but did you know they beat the University of Idaho?

To what everyone considered an upset victory, the Vandals displayed their character on and off the court, especially during the final moments of the game.

Coming into the Friday night game, the Vandals were 3-4 for the season, and it looked like they might lose. But then, it all changed.
