HUNGERFORD IS ASSISTANT DEAN OF AGRICULTURE
Professor Named to Assist Dean Idaho Agr. College Work

Here since 1919
Served as Dean of College During All of the Probationary Periods in Full

Announcement of Dr. C. V. Hungerford, assistant dean of the Idaho Agr. College, as the one designated to the office of dean, has been made public in connection with the recent resignation of Dr. H. A. Hungerford who has left the college for a more important position as assistant secretary of the American Agriculture Council of Washington. Dr. Hungerford will succeed Dr. H. A. Hungerford in the office of dean and will have charge of all the college work during the period when the latter is not at the college.

The new assistant dean will assume his duties immediately and will perform all the work of the dean while he is away. He has been associated with the college for a long time and is well known to all the students.

GIRLS DECIDE ON 1928 RUSHING RULES
One Formal Party and Any Number of Diners

For the first time in the history of the Idaho University, a formal party will be held for the purpose of selecting the girls for the 1928 rush period. This year, instead of having a series of formal dances, the girls will be divided into two groups, one of which will have a formal party and the other of which will have informal dances.

The formal party will be held on the evening of November 15th, and will consist of all the girls who are interested in the rush period. The girls will be divided into two groups, and each group will have a member of their group appointed to be in charge of the party.

Students asked to not go home

Request made by University officials to keep students away from home

This is the first time that the university has requested students to keep away from home during the rush period.

The request is due to the large number of students who have been away from home during the rush period, and the result has been that many of the students have been unable to attend the activities of their group.

Dietician Says College Men Want Cakes Eaten

Recently Dr. H. S. (Ped.) college medical director visited the Idaho State University during their spring vacation and took an informal survey of the diets of the students. He found that many of the students were eating too much cake and that they had a preference for cakes over other types of food.

In the eighteen weeks during which this survey was made, it was found that the students consumed an average of 352 cakes per day. This is an increase of 25% over the previous year.

The students were also asked to state their preference for cakes. They all said that they preferred cakes to other types of food. The survey showed that the students were eating more cakes than they should.

Hand-Picked Fashions

Style is fleeting, elusive. The only way by which we can capture it is to scour the markets personally and often. The pleasure we receive from "hand-picking" our fashions is reflected in the satisfaction derived by our clientele in obtaining originations to be found nowhere else.

Femininity...is the Fashion

Spring 1928 marks a big change in the mode, which Davids' is first to observe. Boyishness is fading out. Sports clothes are for campers and sportsmen only, femininity is the thing. The normal waistline is returning, skirts are longer, the necktie is everywhere, yards more material in everything creates the new, soft, voluminous silhouette—velts, feathers and flowers appear in hats—even sweaters are "dressed up" with silk appliqués. The new mode is complete—not every store will interpret it with the skill shown at Davids'.

A FEW OF THE NEW TOUCHES:
The fluttering sleeve The Jersey frill
The tiered plumed skirt The Bateau New
The normal waistline The Kerchief neckline

Just 5 Days From 5th Avenue
