Trip Down Colorado

Crawling in the state of a housewife, Miss Marie M. Meier of Los Angeles, California, is reported to have only reason to be thankful that she was not killed while crossing a watery trail in a dangerous mountain stream in Colorado. The adventure occurred in February, when Miss Meier was on a trip to the mining camps of the state.

The professional photo was taken of Miss Meier by a friend, while she was crossing a small river, when a stone fell from the bank, causing Miss Meier's canoe to drift down the current. She was able to reach land safely, but her canoe was carried away.

Intercollegiate Press Head Frowns on Use of Honor System

Long-winded dedications and formalities for admission of the student and other formalities that are required by the Student Senate are unnecessary, according to an editorial in the Leadership. "By all means, have the students admitted with a full round of speeches and ceremonies," the editorial said, "but let it be understood that the ceremony is not meant to make them conform to the social and conventional standards of the university."

The State News, in an editorial yesterday, called for the elimination of the grandiose formality of the admission of students and for the substitution of a more informal ceremony.

"The student is not being presented to the university," the editorial said. "He is an old member of the university, and all that is necessary is to welcome him back and to make him feel that he is a part of the university family."

780,000 Chesterfield cigarettes are now rolling South to Florida with the Army Expedition. We are daily informed that the selection of Chesterfield resulted from the individually expressed preferences of a majority of the expedition's members.

When it is recalled that these are in expresso smoke -- pitted men -- included not only for bravery, but also, as we have heard, for the very smoking tests of physical fitness we may be forgiven for our considerable pride in that very thing. And stemming out of this product, we believe, will be shared by all Chesterfield smokers.

It is another of the many proofs piling up that the most way to our city populous is to deserve it.
