SOCIETY

Tropical disposition are the partaking of a number of impressions on the subject. The recent trip to Mexico, for example, was a revelation to many. The colorful costumes, the bustling bazaars, the friendly people—all contributed to a feeling of excitement and adventure.

On the whole, the trip to Mexico was a success. The weather was beautiful, the food was delicious, and the people were friendly. The only drawback was the language barrier, but this was easily overcome with the help of friendly locals.

In conclusion, the recent trip to Mexico was a great success. The group had a wonderful time and returned home with a newfound appreciation for the culture and beauty of this vibrant country.

THE DAILY ARGUS—TUESDAY, JANUARY 9, 1935

Lights that Fill the Skies with Commerce

Till the air map of America is now in the making—on

Two years ago, there were 218 miles of road routes with two sections, stop-to-day, a network of sky roads bridges the country from the Atlantic to the Pacific and from Canada to the Gulf of Mexico.

Can you imagine this growth without electricity—without illuminated airports—without traffic lines shielded with electric beacon?

Men of vision are building for increasing traffic of the air. Just as electricity is helping to conquer the air, the land, and the sea to-day, so to-morrow it will lead to greater accomplishments in aviation and in every human activity.
