"Choose Your People like the way they TASTE..."

It's just what you'd expect. People who enjoy the good things of life care carefully for the things they put in their mouths. They never take the chance of enjoying anything that does not appeal to their sense of taste.

In cigarettes this better taste is one of the main ingredients. Chesterfield is more satisfying to the cultivated palate. For one thing, there's never any attempt to dash it as a Turkish leaf.

These richly flavoured Turkish tobaccos are added with a generous hand.

In fact Chesterfield's new way of mingling tobacco flavors and aromas is really the equivalent of an entirely new kind of tobacco...one that combines the best qualities of Turkish and fine Dominican leaf.

Perhaps you're noticed that the paper in Chesterfields is white...pure. It comes without taste or odor.

Smoke Chesterfields whenever you like...They're mild and pure. They'll never tire you as an over-concentrated cigarette might easily do. Light up and see for yourself. They satisfy!

New Radio Program

"Best Braids of Music...Dancing and Singing, with live news," written, directed and produced by the editors of "Music and Song," is the name of the new sponsored program that will be heard over WRGO and other stations beginning March 30th. The program will be heard every Saturday night at 8:30 by the listeners in this community and others on the coast. The program will feature music, songs, and news, and will be presented by the editors of "Music and Song."

MARRIED WOMEN
AUDITING COURSE
IN HOME BUILDING

"The House" Proves Popular With the Many Women Students Enrolled

given special attention on the part of the faculty of the college. Women students are held in high esteem and are given every opportunity to develop their abilities and talents. The faculty of the college is composed of men who have been trained in the best educational institutions of the country and who have a wealth of experience in teaching. The college is equipped with modern laboratories and other facilities that are necessary for the success of the students. The library is well stocked with books and periodicals that are essential for the study of science and literature.

The course in auditing is designed to prepare women for careers as auditors in the business world. The students are taught the fundamentals of accounting and are given practical experience in auditing. They are also taught the importance of honesty and integrity in the practice of auditing.

The course is offered on a part-time basis and is open to women who are seeking to improve their skills in auditing or who are seeking to enter the field of auditing as a career.

African women are holding hands at the growing of various crops. The women are wearing traditional African attire and are using traditional tools to plant the crops. The scene is set in a field, with the sun shining brightly. The women are working together, collaborating to bring prosperity to their community.

The women are shown planting crops, which is a significant activity for survival and sustenance in African culture. The process requires teamwork and collaboration, highlighting the importance of social interaction and community support in African societies. The use of traditional tools and attire further emphasizes the cultural significance of the activity. The scene also provides a glimpse into the daily lives of these women, portraying their dedication and commitment to their livelihoods and community.

The image captures a moment of unity and cooperation among the women, showcasing the strength and resilience of African communities. It serves as a reminder of the importance of agriculture in sustaining life and preserving cultural heritage. The women's coordinated efforts towards planting crops reflect their collective determination to ensure food security and maintain their cultural practices.

The scene depicted in the image is a testament to the ongoing traditions and practices that continue to play a vital role in African societies. It illustrates the significance of community and collaboration in achieving shared goals, underscoring the importance of preserving cultural practices and agricultural knowledge for future generations.

Industry takes a hint from the kitchen

The domestic art of baking is slowly paralleled in telephone manufacture at Western Electric, where plastic molding is an exact science. Telephone bell boxes, for instance, are no longer formed of metals. They are molded from a phenol plastic compound containing carbolic acid, formaldehyde and other ingredients. Western Electric manufacturing engineers saw the way to make a better product at lower cost. These men developed a new process called phenolite, a type of plastic molding piece, a product designed to last the lifetime of the telephone, from first strike to last stroke.
