The largest user of fine Turkish Tobacco

...one reason why Luckies taste better, smoother

In Turkey today, the only finest tobaccos are selected for Lucky Strike—the mildest of the mild—leaves, the most delicate, the most aromatic. Lucky Strike is the world's largest user of fine Turkish tobaccos. Then these tender, delicate Turkish leaves are blended with choice tobaccos from our own farms and choice tobaccos from around the world. Your Lucky Strike has a cigarette that is fully packed—so round, so firm—free from loose ends. That's why Lucky Strike tastes better, smoother. "It's toasted", for thyroid protection—for finer taste.

Coach Bill Reinhart Has Potent Ideas On How Basketball Can Be Improved

Coach Bill Reinhart, University of Oregon basketball coach, has some ideas on how basketball can be improved. One of his ideas is to add a weekly tournament to the season, which would include teams from various conferences. This would allow teams to play against a wider range of opponents, which would help improve their skills and competitiveness. Another of his ideas is to increase the number of games played during the season, which would allow teams to have more opportunities to test their players and strategies. Coach Reinhart's ideas are aimed at making basketball a more exciting and competitive sport, and he believes that they could help improve the overall level of play in the sport.

Each year Turkey and Greece ship us thousands of bales of fine tobaccos—

But why send 4000 miles for tobacco?

...because spicy, aromatic Turkish is the best seasoning there is for a cigarette.

It adds something to flavor and aroma that no other tobacco can give. Chesterfield uses Turkish tobacco—from Summum, Smyrna, Cavalla and Xanthi.

Then it blends and cross-blends them with various weight of choice home-grown tobaccos in the right balance to give you a cigarette that’s milder, a cigarette that tastes better.

A leaf of Turkish tobacco—matured in a perfect climate—grows to perfect size and perfect quality. There are many elements of this parent leaf that all tobaccos need, but that only Turkish tobacco can supply in the best way.
