CREIGHTONS
for Pipe Smokers

the pipe tobacco that's MILD
the pipe tobacco that's COOL

The method of preparing Granger Tobacco for pipe smoking is not like any other method now in use.

So far as we know, it is the best way ever found of taking out of tobaccos the oils that don't smoke right. Granger owes its extra

fragrance and mildness to Welman's Method.
The way Granger Tobacco is cut—in big flakes—helps it to smoke cool and last longer. Try it.

—folks seem to like it

Just about the nearest
thing to a pouch that a package could be—it keeps the tobacco as fresh as you want it. A sensible package—10c.

At the cinema...

As the Keystone—The story of "Boving the Mole"—a well-received comedy which has been seen in the movies for a few years. The film is a well-made one, and the audience is greatly enjoyed by the players. The players are all well-known, and they carry out their parts with great skill and effectiveness. The plot is simple and easy to follow, and the comedy is well-timed and executed. The film is well worth seeing.

Circus—Another good film, this time a Western. The story is well-told, and the actors are all well-chosen. The film is well-made, and the action is well-paced. The film is well worth seeing.

The Treasure of the Andes—A fine film, this time a historical drama. The story is well-told, and the actors are all well-chosen. The film is well-made, and the action is well-paced. The film is well worth seeing.

The Great Escape—Another good film, this time a Western. The story is well-told, and the actors are all well-chosen. The film is well-made, and the action is well-paced. The film is well worth seeing.

These films are all well worth seeing, and are well worth your money.
AHM ANNOUNCES LUBRICATION OIL

Donald Payne Writes Technical Article for "Idaho Engineer"

Claro in automatic machines is the answer to much metal cutting work, according to Donald Payne, who is assistant to the president of the Payson Machine Co., Idaho Falls, and author of a technical article on the subject which has been included in a special edition of the "Idaho Engineer," the technical journal of the State Engineer of the State of Idaho.

Payne's article, which appears in the latest issue of the journal, is the result of a series of experiments conducted by him in the machine shop of the Payson Machine Co., Idaho Falls.

The article is divided into three parts. The first part deals with the general properties of claro oil, and includes a brief history of the discovery of claro and the development of the process of purification. The second part deals with the practical applications of claro oil in machine shop work, and includes a discussion of the advantages of using claro oil in the cutting of various materials. The third part deals with the results of the experiments conducted by Payne, and includes a discussion of the conclusions reached by him.

Payne's article has been widely praised by the technical community, and is considered to be a valuable contribution to the field of machine shop work.

ARE YOU A PHONE BOOTH ARTIST?

If you're the kind of phony sort of person who doesn't feel things very deeply, you'll probably never have any trouble. But if you're high-strung, say so. See whether you scribble things on bits of paper, hit your nail, jump at unexpected noises— your signs of jangled nerves. So be careful. Get enough sleep—fresh air—recreation. And, most of all, Ceme your cigarette.

Those penciled scars are a sign of jangled nerves.
