Stand up and holler for a Fulbright scholar

By Patricia Bothwell
Stall Writer

The University of Idaho is represented by an unusual amount of Fulbright Scholars who are visiting and studying abroad this year.

There are six American scholars and one visiting foreign scholar. The three American scholars are Robert H. Blank, professor of political science; Wayne Hager, professor of engineering science; and Alwyn R. Russov, head of UI's political science department. Visiting the UI is M.M. Puri, a political science professor from Punjab University in Chandigarh, India.

Presently, Hager is lecturing in engineering science at the University of Mauritius, Port Louis, Mauritius. He will be returning in August. Russov left in January for Marmara University in Instanbul, Turkey. He will teach political science from February to June of this year.

In 1985, Blank lectured in public policy and politics for six months at the University of Canterbury in New Zealand. Previously from 1976-1977, he went to Taiwan on a Fulbright Scholarship.

"It was a very good experience and is a very good program," said Blank. "I liked it alot."

Blank said he'd like to do another sabbatical. He also added that the UI benefits from this because he has a more broader view and different view about teaching and students.

Puri, a Fulbright scholar in residence, is lecturing at both WSU and UI. Last semester he offered a graduate seminar on Geo-Politics in the Indian Ocean at WSU. This semester and WSU his graduate seminar is on World Politics: The Asian Perspective. At the UI he offered a course last semester on The Politics of South East Asia: India, Pakistan and Bangladesh and this semester he is offering a course on Soviet Politics in Asia.

Puri has been a full professor since 1970 at Panjab University at Chandigarh, the capital of the state of Punjab in India. "It's a new experience because I'm spending my sabbatical here. I am the student this year," said Puri. "Because I can be a better citizen than the student, I expect the students would be, but they are very earnest and sincere. Their level of information is more diffused and spread than in India. I suppose it makes them better citizens than specialists, where an Indian student aims at being specialist too early."

Puri came to Moscow in August last year and will be leaving in mid-June.

Fulbright scholars are selected according to their academic and professional qualifications, in addition to their ability and willingness to adapt and share with people of different cultures.

Less students + lack of funds = reduced SUB hours

By Erin Fleming
Stall Writer

A late night paper in the computer center in the basement of the SUB may soon become a thing of the past.

Due to the lack of irregular Help Desk operating hours of the SUB have been cut back. Dean Vetrus, SUB general manager, said that although the hours are not completely cut, the SUB will close at 10 p.m. instead of 11 p.m. The downstairs stereo lounge and computer center will be open from 12 p.m.-10 p.m. on the weekends the hours will run from 1 p.m.-5 p.m. on Saturday and 1 p.m.-10 p.m. on Sunday. The stereo lounge is losing 48 hours per week while the information desk is losing 27 hours and maintenance 40 hours. The lost hours cutback will equal $7,000.

Vetrus said the loss of operating on the declining student population. To balance the loss of money, he said the SUB board have proposed a $10 fee increase. If this proposal is passed by the administration and the fee increase would go into effect next year.

UI student wins new convertible

By Tish O'Hagan
Stall Writer

Lady Luck visited a UI student this fall and left him with more than a few hundred dollars worth of new car. "I just put the form in the box at the sub," said contest winner Devon Spalinger, a UI senior.

He entered a sweepstakes sponsored by the Market Source, Inc. in the time planners given away every second at the submarine. At Thanksgiving break he received a letter telling him that he was a potential prize winner.

It wasn't until December that Spalinger learned he was the grand prize winner of a 1986 Ford Mustang GT Convertible. "The first impression was that if this was some kind of hoax, then someone's doing a good job," he said.

Spalinger said he enters every contest he can. "I'm like a hopeless romantic; if there's just a hope of winning something, I'll do it."

His new car features all the options, and he will be able to pick it up in April or May.

Tuition Defining bill held on Senate floor

By Matthew Faulk
 Legislative Co-Resident

BOISE — A bill which would define tuition and matriculation fees was discussed on the floor of the Idaho Senate yesterday only to be held until some potential problems of the bill are dealt with.

Senate Bill 1834 was held on the senate floor after Senator C. A. (Philp) Simsy, R-Parma, and others pointed out that part of the definitions of terms were based on a departmental study which may be subject to changes.

It was a general consensus of the senate in holding the bill that these definitions should be studied to determine if more precise language may be necessary.

The tuition definition is considered to be necessary by many who are concerned about the student fees in higher education. Senator Norma Dohler, D-Moscow, believes that such a definition may be necessary to protect the Boise State Education from a possible lawsuit concerning the legality of the Institutional Maintenance Fee currently used in student fees.

This is considered by some to be dangerously close to tuition, which is prohibited by the Idaho Constitution. Sen. Dohler also said that a tuition definition "would help prevent a constitutional amendment to allow tuition fees.

ASU lobbyist, Boyd Wiley, had some other concerns about the bill. "We're not satisfied with the bill," he stated. "The ceiling on fees isn't low enough."

This ceiling in the current bill is set up over 30 percent of the cost of instruction per student. He added "we'd like to see institutional support (which includes general administration services, and physical plant operations among others) defined as tuition as well."

This would remove another significant portion of possible fees and lower the ceiling by about 12 percent. Sen. Dohler also expressed interest in such an amendment to the bill.

For now it appears that the bill will likely be held on the senate floor until some amendments are proposed.

Get it off the shelf and register for a car!

by Matthew Faulk

Legislator Co-Resident

BOISE — A student at the University of Idaho is trying to get busy with the bill that would define tuition and matriculation fees.

He has been told by the Senate that the bill is too complicated to be discussed until some potential problems of the bill are dealt with.

Senator Bill 1834 was held on the senate floor after Senator C. A. (Philp) Simsy, R-Parma, and others pointed out that part of the definitions of terms were based on a departmental study which may be subject to changes.

It was a general consensus of the senate in holding the bill that these definitions should be studied to determine if more precise language may be necessary.

The tuition definition is considered to be necessary by many who are concerned about the student fees in higher education. Senator Norma Dohler, D-Moscow, believes that such a definition may be necessary to protect the Boise State Education from a possible lawsuit concerning the legality of the Institutional Maintenance Fee currently used in student fees.

This is considered by some to be dangerously close to tuition, which is prohibited by the Idaho Constitution. Sen. Dohler also said that a tuition definition "would help prevent a constitutional amendment to allow tuition fees.

ASU lobbyist, Boyd Wiley, had some other concerns about the bill. "We're not satisfied with the bill," he stated. "The ceiling on fees isn't low enough."

This ceiling in the current bill is set up over 30 percent of the cost of instruction per student. He added "we'd like to see institutional support (which includes general administration services, and physical plant operations among others) defined as tuition as well."

This would remove another significant portion of possible fees and lower the ceiling by about 12 percent. Sen. Dohler also expressed interest in such an amendment to the bill.

For now it appears that the bill will likely be held on the senate floor until some amendments are proposed.
Toast Susan's birthday

The UI Women's Center is hosting a potluck to toast Susan B. Anthony's 166th birthday Wednesday at 12 p.m. in the Women's Center lounge.

Dolores Jasiewicz, UI's History Department will discuss Susan B. Anthony and her co-workers, and "One Fine Day," a 3-minute video of women in history, will be shown.

Ex-CIA man to speak

John Stockwell, former member of the Central Intelligence Agency, will speak at the Issues and Forums lecture tomorrow at 7:30 p.m. in the SUB Ballroom.

Stockwell, who served as a case officer in Vietnam, Chief of Station in Africa and at the top-secret National Security Council, quit the CIA in 1977 because he was angry with the growing list of "dirty tricks" engaged in by the agency.

"The Secret Wars of the CIA," will include Stockwell's story of how the CIA seeks to increase global tension by supporting military dictatorships and "picking fights" in Third World countries.

Faculty discusses catalog changes

The UI Faculty Council will discuss a proposed change in catalog regulation 2-3 at 3:30 p.m. this afternoon in the Faculty Lounge of Brink Hall.

The current regulation requires 32 of the last 40 credits a student earns toward a degree be taken at the UI. A proposed change in wording would retain the minimum of 22 credits in UI courses, but they would be counted within all the credits a student earns after completing 88 credits or 120 credits for architecture majors.

Sign-up for placement

A variety of students are eligible to sign up for placement interviews at the UI Career Planning and Placement Center in Brink Hall starting Feb. 18.

The following students may sign up for placement services: UI undergraduates in progress toward a degree and within two semesters of graduation; UI graduate students in progress toward a degree and 75 percent or more of their required program completed; UI graduates seeking the specified employer's requirements; and Idaho certificated and active placement files, and are successfully completing their experimental programs under formal UI supervision.

Signing up for and cancellation of scheduled interview appointments must be done in person to avoid potential identification problems. Cancellation must be made at least 24 hours in advance of the scheduled interview in order to give other interested registrants a chance to fill the vacant spot. Failure to keep scheduled interview appointments may result in the loss of interviewing privileges.

Motivation workshop

A motivation workshop, conducted by Moscow consultant Glenda Hawley, will be held today at WSU's CUB from 9 a.m. to noon.

"Increasing Productivity Through Motivation," will explore ways to make discipline a productive experience, factors of motivation, and phases and reasons for an absence of motivation.

Hawley is a former teacher of personnel management at Columbia Basin College in Pasco.

The fee is $25. Additional information about the program can be obtained from the WSU office of Conferences and Institutes, 333-2946.

View Kenya tonight

The UI Army rifle team is sponsoring an illustrated travel program about Kenya, 7 p.m. tonight in the SUB Borah Theater.

Mohamed Nabil, rifle team captain from Kenya, will present the program, which has been seen in England and Saudi Arabia.

The program is free and open to the public.
The opportunity to become involved in world concerns has not been taken by very many students lately. Thomas said this is the attitude of the times. "This is the most apathetic generation in the center's history," he said. "I see in my classes that students are still sensitive, thinking, concerned about things; they just don't want to get involved."

Because it is the students who determine the programs at the center, these have become less frequent. Thomas said it would take a dramatic catalyst to make students active, but that it would happen a day late. "There was a draft scare a while back, and suddenly there were 50 or 60 students down here. It's a scary thing to think that students may wait too long to get involved," he said.

Thomas noted that such apathy is a nation-wide trend, but he sees hope for a new awareness among students. When it happens, the center will be there to support it and give the students direction, he said.

On March 1, the center will celebrate the years of cooperation between the Protestant churches that the center represents. The campus and community will share in the progressive dinner and auction sponsored by the center. The auction items are donated by Moscow merchants, and proceeds go to the center.

As for the future, Thomas said the center is looking at several possibilities for growth. One is the reopening of the coffee house. This would offer students an alternative to the usual Friday night activities that are alcohol-oriented. Another idea is to make the center part of a computer network that would tie together all the groups in the nation.
**Answer Fools According to their Folly**

- The Associated Students of Boise State University are being asked to butt end up with egg all over their faces, all generations of Idahoans that follow will be saddled with the consequences of their short-sighted folly. BSU student leaders have been working this entire Legislative session to get an in-state tuition proposal introduced, and it seems that someone heard their call and is willing to take our money.

Last week a constitutional amendment was printed, which if passed, would dissolve the almost century old Clayton that guarantees higher education will always be available to Idaho citizens, regardless of their income. BSU students, like those at the UI, are worried about the affordability of education. So were the drafters of the Idaho State Constitution. They went out of their way to make sure that future Idaho students would be able to afford higher education by prohibiting the charging of tuition to its children who wanted to learn more.

The question is: Will the BSU see the tuition bill as a way of insuring that students will not have to face astronomical fee and tuition increases in the future, like the one we have experienced in the past five years.

The legislators that are willing to sponsor the bill see its effect radially different.

Liz Allen, R-Caldwell, decided to help BSU out by proposing an in-state tuition resolution last week. But Allen told reporters last Thursday that she was proposing a change because she saw the constitutional prohibition of resident tuition as the major barricade to getting the state out of the education business.

She, like many of her comrades in the legislature, could care less about making education affordable to future generations; they are only interested in the BSU lobbyists, whose interests are opposed to Allen’s, seemingly giving her the ammunition to kill any tuition protection we have.

Idaho has done without a tuition for 97 years, why change the law when a short-term economic crisis hits? If we change it now, we’ll be like a panicking kid who chews his nails. When better times come, we’ll be stuck with a useless and handicapped leg called tuition.

Whatever other basic human instincts the BSU lobbyists might have, self-preservation isn’t one of them.

**Note: Since the Idaho State Constitution only prohibits the charging of tuition at the UI, we may suggest that if the BSU lobbyists want tuition so bad they can change the statutory code that will allow the tuition protection that BSU, ISU and LCSC are currently under. But they might want to consult ISU and LCSC student leaders first.** — Douglas Jones

**Whispers**

**Jon Erickson**

Quest columnist

I have always been intrigued by the TV commercial which suggests, “If you want a great voice, you should consult a whisper.” That approach might work for some beautiful blonde wearing a slicky dress and an expensive perfume.

For some reason that strategy probably wouldn’t work for me with the ASU Senate. It turns out, however, that out of the 22 senators at least a few understand that their state isn’t hearing other legitimate student concerns.

In fact, I am surprised the senate hasn’t installed a hotline to check on the hourly progress of the Idaho State Legislation concerning tuition bills. Before an ASU senator would take a position on any other issue, they could dial the hotline and find out what possible repercussions it would have on the tuition stance.

For example, if a resolution concerning student parking was before the ASU Senate and the word “tuition” was whispered, like a little tribe of Indians 13 senators would race to the Chamber Room and dial 1-800-TUITION.

**Don’t reduce hours**

Dear Editor:

I would like to call the administration’s attention to the fact that there are hundreds of disgruntled students over the fact that the PC lab at the SUB is severely reducing its hours of operation. This classroom is the only lab that has at least a $50,000 investment of student’s money in hardware. In fact, where did all the money come from to renovate this area just two months ago? Why was all that money spent on equipment? It is suddenly there is supposedly no money left to pay someone to run the place? As a graduate student in the school of forestry, I am typifying the PC. With severely reduced hours, the resulting congestion during open hours in this lab will make it extremely difficult for me to finish my thesis. Many business students have class assignments due at 5 p.m. Many others are typing resumes, professional papers, theses and term papers.

The old hours of 16 hours per week at 7 p.m. to 9 p.m. per week at 7 p.m. to 9 p.m. per week at 7 p.m. to 9 p.m. per week at 7 p.m. to 9 p.m.

**LETTERS POLICY:** The Idaho Argonaut will accept letters to the editor until noon on the day prior to publication. They will be limited to 250 words in length and double spaced. For subjects requiring greater exposition, arrangements may be made with the editor. Letters must be signed in ink, and include the name, address, and phone number of the writer. Proof of identity will be needed at time of submission. Letters received by mail will not be run unless written and signed by the author. Names of writers will not be withheld. Letters may be edited for mechanical and spelling errors. The Idaho Argonaut reserves the right to publish any letter.

---

**Sue Koza**
Non-sequitur

Dear Editor,

Definition: Non-sequitur. (L. Lit. "It does not follow"). In logic, a conclusion or inference which does not follow from the premises or evidence on which it is based. (Webster's New World Dictionary, 1980). This definition is crucial to the analysis I am about to present. I am writing in reference to the front page editorial of the first (vol. 1, Ed. 1) edition of a recent publication distributed on campus entitled "The Realist". The editorial in question and "fewer understand the basic problem," is credited to the pen of one Jim Wilson. In paragraph one, Mr. Wilson quotes The Surgeon General Dr. C. Everett Koop as saying: "Up to now the number of AIDS cases has been doubling every about two year, and 100 percent of those who have had a diagnosis of AIDS for more than three years are dead. It is a disease we can neither cure nor prevent at this time." The experience of Dr. Koop is not in question, and the accuracy with which he is quoted is not in question.

In paragraph two, Mr. Wilson states that 100 percent of the past and present population of the earth have died, or expect to die. Again, though I do not quote him verbatim, I do not take issue with his statement. I expect to die also, and the fact that I do not believe in an afterlife is not up to dispute. At the end of the second paragraph, Mr. Wilson states, "Death is a certainty. This has been established empirically." This last statement, I should also not care to dispute.

I must at this point however cite a non-sequitur which occurs in the next sentence, (the first sentence of paragraph three). The sentence in question runs thus: "The empirical evidence is confirmed by a statement from the Bible found in Hebrews 9:27-28. This is a non-sequitur. The quotation from Hebrews proves nothing empirically. The quotation reads thusly: "Just as man is to die once, so Christ was crucified once to take away the sins of all people." etc.,

I have cut the quotation short for the sake of brevity, as the remaining portion is not pertinent to the matter at hand. I have not quoted it in any way, as anyone can determine by checking in the Humanitie department of the library, where they can find the King-James version of the Bible.

I can however take no responsibility for the accuracy with which Mr. Wilson has quoted this passage. I have merely copied it from "The Realist". The quotation says that "Man is destined to die once and after that to face judgement." etc.

Noone has ever proven empirically that man will face judgement after he dies and the fact that an opinion is stated in Hebrews does not make it empirically proven. The religious texts of both Hindu and Buddhists claim that we are all reincarnated after we die, but that does not make it true.

I have however, deviated from the tenor of the non-sequitur. Death as a common experience of all humans has been proven empirically. The Bible has, however, had nothing to do with it other than to bring about the crusades and the Inquisition. Both the crusades and the Inquisition proved empirically the death of many thousands of people. The verses quoted here were written by men who had many primitive and barbaric lives. These verses in the primitive Hebrews believed that women were unclean during menstruation, that any meat eaten had to be killed by having its throat cut in an elaborate ritual. These men believed that the man was the head of the household and that the wife should be subservient in all things. These men clipped their forelocks as religious ritual. A clear thinking, rational person should be careful of quoting their writings as empirical proof of anything.

The second non-sequitur occurs in column three, after the quotation of Romans 3:22-24. The third sentence states that "AIDS is an advance warning of judgement." There is no empirical evidence that AIDS should be considered a manifestation of divine retribution. Just as the ignorant and superstitious believed that the black plague of Europe were "The will of God," the ignorant and superstitious today try to calm the unreasoning panic which grips them by telling themselves (and everyone else who will listen) that it is the will of God. By the same logic I could prove that Hitler was God's messenger on earth, and was sent to punish the Jews for the death of Christ. That would win me points with the church of Jesus Christ-Aryan Nations. There are enough fascists in northern Idaho already.

The only judgement after death for which there is any empirical proof is the judgement of the people around us, on our lives and works. I sincerely hope that when I die, I am not seen as contributing to a fascist America, where fundamentalists extreemtse and anyone who differs from the norm is discriminated against, ostracized, or worse.

James H. Smith

C.C. and sports

Dear Editor,

We appreciate the credit that Mr. Morris gives the Corner Club with respect to our influence on sports and sports writers (letter in Feb. 7 issue). However, in our relentless effort to be fair and honest, we must point out that we were closed on Super Bowl Sunday. Therefore, Mr. Morris' criticism of the Corner Club's influence on Mr. Kilmer's sports writing is dubious at best. Nevertheless the Corner Club will continue in its perspicacious and relentless effort to continue to be the hub of the sports-minded communities of the Monroe area.

Bill Warnock
Executive V.P. Board of Directors
Corner Club International

IDLEWILD OPENING

We're Open in Full Swing

We Opened In Time To Serve You

Our menu highlights the finest meats and wines from around the world. We offer a full bar, a 100% quality wine list, a variety of the finest champagnes, Vichyssois, Champagnes, Aperitifs, Absinthes, and wine. We also have a small selection of house-made desserts.

We are located on the corner of 12th and 3rd Avenue.

Please join us for lunch or dinner today.

Sincerely,

The Idlewild Affairs Staff

Idaho Argonaut, Tuesday, February 18, 1986
their lavatories. Meanwhile, Idaho's Columbus mountainsides are scalloped, and enrollment in political science, journalism, and law schools remains stable. Mr. Haberman could have quietly dispelled the notion that today's ideologically deficient youth take minimum considerations of prevailing professional ethics when choosing a career, and come to the conclusion: Fecundity don't create clear-cuts, soap-opera lifestyles create clear-cuts.

D. B. Moniek

Let us choose

Dear Editor,

In response to Michael Long's letter in Feb. 4 Argonaut:

Pregnancy—the most joyous occasion in a woman's life or the most depressingly confusing and downright frightening things that can ever happen to a woman. It is a totally life-altering occurrence whether a woman goes through pregnancy or has it terminated. Neither are done casually; both are difficult and very personal choices that must be made. They both concern a woman's body and the changes that happen when she is pregnant. No man will ever experience these traumas and therefore no man should presume to know all the answers to the question of abortion.

Since abortion became legal there have been voices on each side of the issue. Since when did abortion become a second holocaust with mass murders every minute (4,000 a day)? This analogy is a bit out of hand and illustrates something profound forgets: an embryo cannot survive outside a mother's body. It is literally a part of her body and what a woman does with her body is no one's concern but her own. Abortion is a completely personal decision and no one else has a right to take away the freedom to make that decision.

Consider the reason for abortion in the first place. It happens because the baby is unwanted. An unwanted child is more likely to be abused, especially if its mother is under 20 and unmarried. Babies that have been abandoned or tortured feel it because their nerve endings are fully developed. Don't confuse this with an embryo that is little more than a mass of cells with the potential to become human. I have read real horror stories about child abuse to be thoroughly convinced that the bad that is already there is being fed, not defeated. Abortion happens every day but no one talks about it, just consider which hurts more. People make mistakes all the time, and no birth control method is 100 percent effective. Why punish a woman for the rest of her life for a mistake, and more importantly why bring an unwanted child into a world that's already struggling to feed 4.5 billion people?

Anyone can write a self-righteous letter full of grossly presented abortion procedures, but only mistreat people with a genuine empathy for fellow humans can understand and sympathize with other's problems. Put yourself in a woman's shoes and imagine all the facets of the predicament of being pregnant, and see what you would decide. You don't have to advocate abortion to support pro-choice, you only have to relax and let others live as they choose. We must respect the rights of fellow humans to expect reciprocity and we must be careful never to let our rights to make them own decisions slip from our grasp.

Linda Griffiths

Stop the dam meeting slated

A meeting concerning the Elk Creek Dam Project will be held Wednesday, Feb. 19 at 7:30 p.m. at the St. Paul School. The Sierra Club is sponsoring the meeting which will focus on some major concerns about the proposed project from the proposed Elk Creek hydro project around the Elk Creek Falls. A new application will be for a diversion and three acre lake just above the upper falls, a penstock route along and above the east bank, and the construction of a powerplant on grade land well below the lower falls. Full details of all, including maps and photos, will be available at the meeting, which will be attended by Larry Dudgeon, Palouse District Ranger.

A meeting concerning this project and current plans and cost of excavation be met along the penstock route? Will minimum flows be available and just how good is Hytech's streamflow data? What exactly will be the impact on rate payers of the cost for WWP to buy this annual 17 million million of power? All these questions will be fairly aired at the meeting.
Fantastic finishes
By Kathy McConlies
Sports Editor
The Vandal men’s basketball players refused to fall victim to their cross-
slate rivals, the Boise State Broncos, by staging a major
classy midway in the second half and defeating BSU 61-58.
Teddie Noel sunk a three-
point basket with four seconds left to prevent an
overtime glut in front of 6,000 Boise fans, the
largest crowd of the season.
Even more spectacular was the method of getting
to the point of overtime; down by 18 in the midst of the second half, Idaho
railed in a di-or-d situation
and caught up to the
Broncos. Chris Carey and
Big Sky co-player of the
week Ken Luckett led the
Vandals in a shooting spree; Carey scoring 11 points in the
second half, nine of them three-pointers.
Head Coach Bill Trumbo
was happy that his 10-14
squad, 5-7 in Big Sky, had
upset the Broncos, but he
said he knew all along that
the Vandals were capable of the
first.
“It’s about time that we
got some reward for our ef-
to,” the coach said of the
team that was the only
team in the Big Sky to win all
the road last weekend.” I
credit our players,” he said.
“They’re resilient, young
and competitive.
Idaho, having won three
of its last four games, might
have let the Broncos con-
tinue the two-year winning
streak over the Vandals,
especially in Boise.
“The first half we would
have been easy to figure we
were out of the ball game,”
Trumbo said. “We didn’t
get good pressure on the
BSU shooters and they
had great momentum. But it
turned around in the se-
cond half.”
Idaho shot 34 percent
from the field in the first
half, compared to BSU’s 70 percent.
The shooting im-
proved tremendously in the
second half, upping the
percentages to 62 percent.
Defensive leader for the
Vandals was forward Matt
Haskins. Haskins, a senior,
pulled down a career-high
11 rebounds and scored
four points. “He played
awfully hard,” Trumbo
said. “He held the team
entire defensively.”
Idaho’s top scorer was
Luckett with 25 points,
followed by forward Tom
Stalick, who scored 10
points and pulled down four
rebounds. Teddie Noel, with
seven points, and Barry
Heads and Brian Coleman,
each adding to the total
score of 61 points.
“It was an intense ball
game all the way,” Trumbo
said, adding, “We nibbled
at the lead and played well
the whole way.” Once the Vandals
captured with BSU, the
Broncos didn’t fall over
and die, Trumbo said.

Women top BSU
By Tom Liberman
Assistant Sports Editor
A plugged Boise State
women’s basketball team prov-
ed to be easy pickings for the
high-flying Lady Vandals Satur-
day night in the Dome.
Idaho’s front line was just too
much for the Broncos in the
93-56 laugher. Mary
Westervelle poured in 22 points while teammate Mary Raese got
20 of her own.
Christy Van Pelt was a perfect
for free from the field as she
added 13 more and Susan
Dobratz led the team in re-
bounds with eight to go along
with six points.
Van Pelt is coming off of a
series of nagging injuries that
have kept her out of the lineup
for a work said Dobratz.
“She gives the dimension of
driving,” said Dobratz. Dobratz
was also happy with the play of
backup center forward Sheri
Lehner who scored six points
and grabbed four rebounds.
Boise only brought nine
women of their squad of four-
ten to Moscow for the game.
Idaho Coach Pat Dobratz said.
“Boise State was under the
weather.”
Dobratz said the key to the
win was the ability of the team
to push the ball into the for-
wards for easy buckets.
Even with the inside game
working well, guard Robin
Behrens broke out of a shooting
slump hitting four of seven from
the field.

Basketball playoffs: Action begins tonight.

WALL OF fame winners: Greg Mess, weight lifting; Andy Gustavson, jump ball; Greg Dahl, jump ball; Ted Tobin, jump ball.

Free throw contests: Wednesday in the PEB Gym. 6-9 p.m.

Get your racquets ready because the second Tennis Social of the spring semester is approaching. The social is planned for Feb. 23 from 3:30 to 4:30 p.m. in the Kibbie Dome, and a 16-player limit will be followed. A $1.50 entry fee must be paid before participation to cover refreshments and prize drawings. Get entries in soon to Campus Intramurals in Memorial Gym Room 203 or call 805-6381 for more details.

"Battle of the Beefs" final competition will be held during halftime of the Feb. 23 Lady Vandals basketball game. Vying for the University Men's championship are the Kibbie and Hall. The women's university champion is Campbell Hall (sororities were not represented). Division champions received a large "Pranzio Pizza" from Pizza Hut, and university champions will be treated to a pizza party from Pizza Hut. Let's get out and support the Lady Vandals and cheer the "biggers" on at halftime. Thanks to all who participated.

Wanted:
Tennis players

The UI men's tennis team is holding tryouts. Two additional positions for the spring season. Tryouts will be held Saturday, Feb. 22 at 9:30 a.m. in the Kibbie Dome. According to UI coach Pat Swafford, the recent loss of two players, one to injury and another to a disciplinary problem, has created a need for two more experienced players to join the squad.

"We're looking for people that are here on campus to fill out our roster," said Swafford. The team, which normally consists of six starters and three reserves, is now down to seven players.

The tryout will consist of some warm-up hitting and some match play to give coaches an idea of each player's ability. In addition, Swafford will ask players to bring information about their tennis background and school enrollment to determine their playing eligibility.

Luckett honored

Idaho guard Ken Luckett was named Big Sky Co-player of the week for his stellar performance in two of Idaho's wins last week. Luckett, a 6-foot-5 sophomore guard from Portland, Oregon, racked up a total of 92 points in the 61-59 victory over Boise State and a 131-91 romp over U.S. International.

In the Boise State game, Luckett was 9-of-10 from the field and 6-of-6 from the free-throw line. He also pulled down three rebounds in that game. Against USIU, Luckett was 12-14 from the field.

Luckett and company will head to Montana in a tough road trip against the Montana Grizzlies and Montana State Bobcats. Idaho defeated UM, but fell to MSU by 25. Sky line action earlier this season.

Snow can’t stop Vandals

The Vandals took a second victory in the season on Saturday. The other team that was falling everywhere but in the Vandals, managed to take a second victory in the conference. Even with the lack of numbers many Idaho athletes were able to enjoy good performances. Heading the list of high finishes was Trond Knudsen with first place in the 55-meter hurdles. Creigh Lincoln was close behind with a second-place finish in the same event. In the weight competition the Vandals were able to capture a second in the discus and third in the shot put. Kurt Schnieder bettered his best at this time by one second in collecting the third place in the discus, and Dan Martin was the third-place finisher.

The distance races saw Shane Shillito take first in the 1500-meter run and Chris McBeath take second in the 3000-meter run. The final two places of the day belonged to Days O’Malley (third in the 55-meter dash) and Jeff Collins.}

Blizzards, baseball and Buddy

Greg Kilmer
Sports Columnist

Picture this, the only thing on your bronzed bod is a pair of gym shorts, sun glasses, flaps and a Red Sox visor while you sit in an Arizona’s JC baseball stadium watching Valenzuela throw scruggles by Padre rookies. Yep, you can tell by the weather around here, it’s spring training time. This is one for ol’ believe it or not Jack Palonce. Baseball cranks up this week.

The Tigers and White Sox kick it off with the first exhibition game March 6. All those lawyers will have to change their three-piece wool suits to their white cotton ones for the salary arbitrations in Arizona and Florida.

Remember when games went nine innings? Forget it. The biggest part of the game this season will be in the locker rooms after the game, when all the players break out their specimen bottles. You’ll see more sweating than a 3 and 2 count in the bottom of the ninth. Yep, things will be different.

Imagine Rod Carew, Tommy John, Al Oliver and Cesar Cedeno seeking employment! And Tom Seaver and Reggie Jackson not quite sure whose dugout they will be spitting in!

I know the average age of these guys is a shade over 40, but come on, Rod Carew. The bat is still a magic wand in the man’s hands.

The man could hit .300 with U.L. Washington’s toothpick. And Tommy John, I know the guy’s fastball has dust on it but goes to it the blasts, but he will beat you. The way he throws reminds me of Kenny Stabler, like they’re at a local pub throwing darts.

I know Oliver and Cedeno won’t find their names in Cooperstown, but they have vicious bats. You know, like the late, great, Roberto Clemente. They can lash a double down the line quicker than Bernstein can say, “Fire him.”

“Tom Terrific” and Reg will do some good for someone. Just don’t stick Reggie in right field; he’ll hurt himself on the first pop fly. Even with the changes and thought it is a little early, I’ve never been one to shy away from making my annual “Greg’s Guesses.”

The National League is easy this year. The Dodgers’ pitching staff will have them up against the Mets for the pennant. Gooden will make a run at 30 wins and Strawberry and Carter will each go over the century mark in Hill’s to provide the offense. The “Big Apple” will host its first series since the Yanks. The American League isn’t that easy. The boys from the Bronx will make a serious run behind Mattingly, but the Jays will prevail with that young but very talented outfield. Oil Can will win more than 15 games for the Red Sox though.

As much as I hate to say it, the Royals will again rule the west. That young pitching staff will be enough in the major’s worst division. The Mariners will improve but they’re still making trades like a young Vanderberg for an old Yeager.

The playoffs will sweep through the playoffs to get the other half of the series up in the “Great White North,” eh.

But for my most off-the-wall prediction: what will happen if William Perry decides to go in baseball, with a David Letterman behind him. That 180 pound, 168 bit- ter will be renamed “the Can Opener.”

Don Monson

UI a stepping stone for coaches?

By Buddy Levy
Staff Writer

The UI and indeed the Big Sky Conference itself, seems to be serving as a stepping stone for furthering coaches' careers. Two notable UI coaches, Don Monson and Dennis Erickson, have gained what would have to be called "promotions" in recent times.

Monson, who lead the UI hoop team to a 27-3 record in 1982 and a second consecutive Big Sky Conference Championship, now coaches the Oregon Ducks of the prestigious Pac 10 Conference. Asked how much a role the jump to Pac 10 played in his leaving Idaho, Monson replied "Sure, you have to look at your professional situation, where you are and where you're going."

Last season, Dennis Erickson lead the Vandals football team to the Big Sky Conference Championship, and now you can find him at the University of Wyoming, where he is head coach.

This career change is a step up for him as well, as the Cowboys are in the Western Athletic Conference, a conference that offers him a chance to compete against such schools as Air Force and Brigham Young University.

He, like Monson, left Idaho for a number of reasons. "The WAC is a better league, and the school has great facilities. The program has a good deal of money and everything is geared toward Wyoming football."

Erickson was also intrigued by the potential challenge of the stiffer competition. At UI, he and his staff usually turned the program around. It was at a low when he got here, and now the program is on solid footing. He said of his new job: "I'm excited. It will be a challenge, but I'd like to do at Wyoming what we were able to do at Idaho.

To establish a healthy, competitive, winning tradition."

While both Monson and Erickson are happy in their new environments, neither has forgotten how he got there, nor the role UI played in his success.

Erickson credited Monson with leaving the basketball program with enough momentum to carry over into other sports. "Don left the basketball team in good shape, and this helped spill over into football. I have him to credit for that." Both coaches said that the UI fans, alumni and boosters all contributed to their teams' successes. Monson said "Idaho has very loyal fans. The pride is there. They have good patience."

Erickson shared these sentiments. He said "At Idaho, the player quality is good, and the fans really helped us."

One of the reasons that Wyoming has so much support for its football team is that it is the only public university in the state. "It is the only show in town," he said.

When asked if he thought coaching at the UI was good for his career, Erickson responded, "No question. Being able to come in and turn a team around in four years, that was important to me."

In talking to these coaches it was apparent that Idaho served to help mold each as a better coach and as a better person as well. They learned a lot about themselves both on and off the field. But when asked about their long term goals, they had slightly different attitudes.

Monson said he takes things as they come. "When I came to Idaho, I didn't really have long term career aspirations. Now, I'm just playing it by ear."

Erickson said that he was looking to be "as good a coach as I can be. My family is very important to me. I'd like to become successful enough to give them some of the advantages that I didn't have."

Though at first he didn't come right out and say it, he seemed to be thinking a lot further down the line.

What would he like to see himself doing? "I'd like to be the head coach of a Super Bowl team."

Keep up with the sporting news because a few Super Bowls or Big World Championships down the line, you never know who'll be pacing the sidelines, coaching.

Dennis Erickson

By Matt Helnick
Of the Argonaut

An impressive and eclectic display is taking place at Idaho State University's Art Gallery. The exhibit is entitled "Undergraduate Juried Art Exhibition." The works are the result of a juried competition that featured the work of some 300 undergraduate students in a variety of media. The works are open to the public and will remain on display for the next four weeks.

Among the many interesting pieces on exhibit is a ceramic work by Matt J. Smith. This piece is an old man's hand, but it has a certain grace and elegance to it. Another interesting piece is a watercolor painting by David R. Purviance. This painting features an old man and a woman sitting on a bench. The painting has a certain poignancy to it, and it seems to be a representation of a certain moment in time.

Asian-American writers discuss the problems Asians have experienced in America

By Christine Pakkola
Of the Argonaut

Aftong Moy came to New York City in 1989 as part of a "theatrical group." She and other Chinese women performed in the street theater. They were made to sign contracts, "essentially signing their bodies away," Moy said.

Another contemporary writer's Thousand Pieces of Gold deals with Chinese prostitution in America more intimately. This book describes Lulu, a 13-year-old girl sold by her father when she became pregnant. The price: two bags of soybeans. She came to America and was freed by a man who won her in a poker game. Eventually known as Polly Bemis, she homesteaded on the Salmon River. The book will be reviewed in Friday's Argonaut.

RuthAnne Lum McCunn, author of Thousand Pieces of Gold said when she conducted research for the book, she had a tremendous mental block about idiom.

"But I found that not all of Idaho looks like Boise," McCunn said. "The salmon area is so beautiful." She said her big dream is to return to the area. "At least I've set foot in Idaho again," she laughed.

Other books by McCunn are Illustrated History of the Chinese in America, Pie-Biter and Sole Survivor. Pie-Biter is a children's story of a Chinese man who loved to eat American pies. Sole Survivor tells of a Chinese seaman who survived a record 133 days at sea on a wooden raft in 1949.

Hong-Kong born McCunn interviewed the sailor in his native Chinese in New York. The story had been left untold because he spoke little English.

"There wouldn't have been a story -- he would have been lost at sea for only six days -- except a ship passed by the sixth day and wouldn't pick him up because he was Chinese," McCunn said.

Racist feelings against Chinese crystallized with the Chinese Exclusion Act of 1882, which excluded all but certain elite Chinese from entering the United States, Yung said.

Chinese were targeted for being the problem in the economy and were thought of as "undesirable aliens who deprived whites of jobs," Yung said in the preface to his book, Island.

Island is dedicated to pioneers who passed through Angel Island, the point of entry for most of the 157,000 Chinese immigrants who came to America between 1910 and 1940.
Enter your idea

If you have a design idea for a best-selling product your idea could win you $100.

The UI student section of the American Society of Mechanical Engineers is conducting a design competition to find a product that the group can produce and sell for fund raising.

Designs will be judged on overall profitability, ease of production and marketability. For example, a key chain, a silk screen or a beer mug are items that students could produce easily and inexpensively on campus and then sell to raise money for the group.

Entrants must submit their idea on paper. Original models are also encouraged. To pick up complete contest rules and eligibility requirements stop by JEB 229 or the Engineering Reading Room, located in JEB. Deadline to submit your idea is Feb. 28.
Aid available
The National Student Service Association has its data bank over $3 billion in financial aid available for undergraduates and graduates.

NSSA is an organization that locates private sources of scholarships, grants and other financial aid for college students.

The NSSA guarantees results in finding financial aid sources for student's, or the processing fee is refunded. For a free application and more information write NSSA, Box 52, Bourbonnais, Ill. 60914. Specify undergraduate or graduate information.

Horseshoe bend set straight
The Federal Highway Administration announced Tuesday that it has approved $18.8 million to replace State Highway 56 on Horseshoe Bend Hill.

The Horseshoe Bend Hill is a continuing problem as the surface which the road is built upon is unstable.

The Federal Highway Administration is also giving $500,000 interest-free loan to the State Transportation Department right-of-way purchases for the Broadway-Chinden connector in Boise. The fund is earmarked for the early hand purchases to beat future escalating land values.

Senators resubmit drinking-age opposition

By Erin Fanning
Staff Writer

A resolution stating opposition to raising the drinking age will be resubmitted this week by Senators Brian Long and Paul Allie.

According to Allie, the original resolution did not pass through the senate last week because there was no evidence to back up the claim that UI students are against raising the legal drinking age.

The senate was also reluctant to pass the resolution because there was a concern that abstaining from drinks would attract a 21 percent increase in the number of students on campus.

Allie said he spoke to Wiley last week and Wiley said that legislators would be more likely to listen to a sounder rationale than the original resolution offered.

Allie also changed the emphasis of the resolution by adding more concrete facts on how a new drinking age would affect the state.

On Monday Allie said he would conduct a poll that Allie hopes will present him with information to pass the resolution at the next meeting of the senate.

Mills added that he would not encourage anyone who feels strongly about the drinking age to attend Wednesday's senate meeting at 6 p.m.

Pesticides may be causing Idaho groundwater contamination

Pesticides that were part of a solution to some environmental problems may now become problems of their own.

Ninety percent of Idaho's drinking water comes from groundwater. Brewer said, but an advertising and monitoring system to determine the amount of pesticides that have leached into groundwater.

Under such a system, the water would need to be checked regularly, said Brewer. It would take a sample at the right times and chemically analyze it.

According to Albert Ogden, hydrogeologist with the Water Quality Bureau, chemicals that break down more easily were developed in response to the nationwide concerns about surface water pollution, but those chemicals also move more readily into groundwater.

"Whenever a ground-water pollution problem is solved by removing one chemical, another one comes along."

Ogden is negotiating a grant to plan a groundwater monitoring system for Idaho, but he and Brewer said the plan would be only a small step toward implementation of a statewide monitoring system. Such a system would require matching funds from the U.S. Geological Survey and the state of Idaho or a grant from the Environmental Protection Agency.

Ogden said both federal agencies have encouraged the creation of monitoring programs, and a bill which, if passed, would increase funding levels has been introduced into Congress.

Standards exist for only one of the many chemicals in use and have been proposed for only eight more.

Brewer said that chemicals can enter the groundwater through spills or accidents, through disposal, through injection wells, from "backflows" from chemical application, through sprinkler irrigation systems and from application to crops.

She said county agricultural agents with the UI Cooperative Extension Service will be involved in a statewide pesticide-use survey designed to determine the types and amounts of agricultural chemicals being applied in Idaho.

Data from the survey, combined with data from the U.S. Geological Survey and the Soil Conservation Service, should help to assess the threat to Idaho's groundwater.

Brewer said farmers can help solve the problem now by tailoring chemical use to their own groundwater and by avoiding the use of chemicals which are highly mobile or persistent where soil depth to groundwater is shallow, trapped above an impermeable soil layer, where large amounts of leaching occur through irrigation or natural precipitation and where soils are very porous or acidic.

If farmers are "chemiating" through irrigation systems, Brewer said, they should make certain they can adequately prevent backflow.

Gene Carpenter, a pesticide specialist with the UI College of Agriculture, agreed that farmers must become concerned about groundwater contamination, but added that the Moscow area's drinking water is safe, at least for present.

"If 90 percent of our drinking water comes from groundwater sources, then we're going to have to start looking at it," he said. "Here in Moscow we don't have to worry because we pump water from such deep wells."
