'Bork debaters' argue with audience

BY ALAN SOLAN

What was billed as a debate between Doug Wilson and Jim McDonald over the effect of Robert Bork's appointment to the U.S. Supreme Court was a formal debate in the GDI law classroom Thursday, sponsored by the law school's Federalist Society.

The debate was attended by law professor Jim McDonald, a UCI law professor, and Doug Wilson, a local law and policy professor at the University of Idaho Law School.

In the debate, McDonald argued that Bork's appointment would not affect the way the Supreme Court would handle cases. Wilson countered that Bork's appointment would lead to a different outcome.

The debate was well-received by the audience, with many attendees engaging in the discussion.

ASUI Handbook
Advice may be illegal

BY DAWN BOBBY

Students attending the release of the new student handbook will have to watch a little longer due to questions as to whether or not the book constitutes unauthorized practice of law.

For example, Attorney General Rich Kuck said at Wednesday's ASUI Senate meeting that it is "getting closer." Kuck said, "I say getting closer because it has uncovered some potential major stumbling blocks." Kuck said the first problem was the fact that the handbook was written by law students and gives advice as to what students should look for and do.

The handbook has a disclaimer across the front, and it will be printed in red. This is not a common substitute for legal counsel.

Kuck said an editing process had begun to delete those sections that may be construed as advice. Then attorney would be asked to review the book before printing to avoid legal complications.

He also said that wording changes made in the Student Code of Conduct this year caused some confusion in the text of the manual, and those sections need to be rewritten and possibly reordered.

Kuck said he expects to see it printed in about a month.

GDI Week moved back

BY ERIC SIMPSON

The Residen Hall Association changed GDI Week from Oct. 12-18 to Nov. 16-20 to allow hall residents more time to study for midterms exams.

GDI week in past years has fallen at the same time as Homecoming Week, but this year the GDI Committee felt that too many activities would be occurring at the same time.

Some new ideas for activities include: tricycle races through the Thrusphill Tower, fund raising booths during the GDI Games, and sled rides at the golf course, a trivia week, Homecoming and midterms, and a scavenger hunt.

There is also a new council, which will be held in the Student Center.

In senate communications, Pro Tempore Norman Semanko briefly raised the question of the ASUI Judicial Council, which exists on paper, but has no members as yet.

"There has always been a Student Judicial Council written into the Rules and Regulations," Semanko said in an interview immediately following the meeting. "And we've never implemented it.

This council is not to be confused with the University Judiciary Council, Semanko said, which handles violations of the Student Code of Conduct. That council has been appointed, and has 40 cases already scheduled.

"... There were very large questions as to whether or not a book like that constitutes unauthorized practice of law." - Rich Kuck

No one, however, has been appointed to the ASUI Judicial Council, and Semanko wants to know why.

"Brian (Long) failed to appoint the council," Semanko said. "But it's in the Rules and Regs. That's why I want a group of us to look at it and throw it out, or appoint it." In other business, senate appointed Lisa Kagi was confirmed by unanimous consent and sworn in and seated.

PHYSICAL plant workers like John Scott washed Brink Hall windows this week, while taking advantage of temperatures in the low 80s. This weekend's weather forecast is for temperatures in the high 60s, with a possible chance of showers Saturday afternoon. (ARGONAUT/Randy Hayes)
New parking lot creates more than space

BY TRACY RANDALL

The need for more parking space on the University of Idaho campus for students and faculty has called for the removal of three houses located on the west side of Buchanan.

"I'm pleased to get more parking in the area," said Tom LePole, Parking Coordinator for the UI. "The removal of the houses should have been completed by now. One of the houses has been removed, but there seems to be a problem with the last one," he said.

Joanne Rees, Director of Facility Planning, confirmed that indeed there is a problem.

"Two of the houses are coming along fine, but before the third can be taken from the lot, asbestos siding must be removed from the house," she said. The houses have been sold to the Wasansaki Contractors who discovered the asbestos siding. The siding is being removed by the UI Asbestos Abatement Crew, according to Rees.

SUPPORTED by large beams, houses located near the engineering building on sixth street are in the process of being moved to provide for a larger parking area. (Argonaut/Tim Darlington)

Eating disorders topic for Symposium

BY JEFF STUCKER

About half of the three hundred college women in the SUB Ballroom Wednesday night raised their hands when Dr. Francis Spain, a Moscow physician, asked the group to attend the eating disorders symposium if they had ever known someone with bulimia or anorexia. Both Waddell, a psychologist from the University of Idaho Counseling Center, estimated that as many as 1 of 20 women at the university could be diagnosed with bulimia nervosa, based on a survey of UI sororities. One in 10 women are at high risk.

"Yes, we do have a problem on this campus with eating disorders," said Waddell.

Her statements were mirrored by those of Spain, a Moscow physician; Laurel Branch, a registered dietician and Marilyn Murray, also a counseling psychologist at the UI.

Bulimia is characterized by cycles of binge eating and purging (self-induced vomiting), use of laxatives, fasting or vigorous exercise. Bulimics are driven by a fear of weight gain.

Anorexia is a compulsive effort to lose weight, driven by a need to somehow build self-esteem or to exercise control over oneself.

SEE DISORDER PAGE 6

Gift aids drafting at UI

Students of agricultural engineering at the University of Idaho will soon use a computer-aided drafting program developed by Autodesk, Inc. of San Rafael, Calif.

In an educational grant to the UI Department of Agricultural Engineering, the California firm is donating the computer software valued at more than $17,000.

The software will enable the department to develop and expand its capability in computer-aided design at both the graduate and undergraduate levels.

Float builders need vehicles

People who could loan a trailer or other appropriate vehicle for homecoming parade float construction are asked to contact the University of Idaho Alumni Office.

The Homecoming Committee is seeking loans of vehicles and space to house the floats while they are under construction. The annual parade will be Oct. 17.

Moscow businesses are being asked to sponsor living groups building floats.

More information about homecoming and how area residents can help is available from the UI Alumni Office.

Domestic Violence forum scheduled

The University of Idaho Women's Center will present a public forum on domestic violence Monday (Oct. 5) at 7:30 p.m. in the SUB Borah Theater.

Speakers include: Patti Cura, Director of Alternatives to Violence on the Palouse, who will speak on "The Reality: Victim's Perspective", Mark Covy, Assistant Professor of Psychology at the UI, he will address "Domestic Violence: The Psychological Impact"; Dave Cameron, Moscow Chief of Police, who will speak on "Looking at the Law: An Officer's Perspective", and Craig Mossman, Moscow Prosecuting Attorney, will discuss "Why Are Domestic Violence Cases Difficult to Prosecute? Will the New Law Help?"

The forum is free to the public.

Bulimia: Ex-bulimic speaks out

By JUSS HARTWELL

"Most people don't realize the feeling in a bulimic's mind. The feeling of my problem was just to be accepted. My bulimia started in the fourth grade and got worse throughout high school and college. For example, her grades went from below a 2.0 as a freshman to a 3.6 after her recovery. "You don't realize that it's some of the people you admire most in your life who have it; those who are doing things with their lives, who have it together," she said.

My point in having this interview is to help other bulimics to know that they are not alone. I also want to help the families, friends, sorority sisters, etc. to understand the disorder and be able to offer some help. I recommend counseling or just being a good listener. But most importantly, don't be a watchdog. It will only make the girl feel worse because no one will ever tell her how to hide it. The hardest part is to be able to talk about it. There's a fear in confiding in people.

"I realized that "skinny" wasn't the issue. Bulimia had become too hard way of dealing with insecurities and problems. "I had made the correlation between problems and being thin. It makes sense: look better and life will be better," she said.

When an idea like that had governed her life for seven years, it was a hard change to relinquish. Through counseling, she learned how important it was for her to be honest with herself and her family. "You must do it for yourself that there are other problems that you aren't facing. The hardest part is being able to talk about it. There's a fear in confiding in people."

She finally realized what a strong person she was. "I have been recovered for a year now, and I feel so good about myself and my accomplishments," she said.

Suzanne Snyder, who participated in the Interviewing Center on the University of Washington's campus, is a student at the University of Idaho, where she is a business major. Suzanne Snyder is a sophomore with a 3.6 point average. She had been bulimic for three years, and had been diagnosed in her sophomore year.

Suzanne Snyder is a former ROTC member and is now a Karate black belt. She is also an active member of the ROTC community, and is involved in many other activities on campus, including the Student Senate, the University of Idaho Student Government Association, and the University of Idaho Women's Association. She is also a member of the University of Idaho Women's Association and the University of Idaho Women's Association.

Fort Lewis falls to ROTC

By JEFF LEE

"It was hard work, but it ended up like a party," engineering major Ted Egerton said about his weekend at an Army base with 75 other ROTC cadets.

Egerton and fellow ROTC members spent last weekend at Fort Lewis, near Tacoma, Washington, in a series of mainly physical training exercises that encompassed all aspects of Army preparation. Rifle- and machine gun-firing, strained walks and orienteering were major activities, but the "incredibly leadership reaction course" was certainly the highlight of the trip.

"The leadership reaction course consists of 12 problems, each about the size of a large classroom," said chemistry major John Ingram. "You work in teams of five trying to get across some obstacle with a 25-gallon drum, an ammo box or maybe a stretcher. Most of the problems are timed to cross, and all of us got pretty wet before the day was over."

Sergeant Don Wicks said, "The key to most of these problems is figuring out the right combination of supplies and inputs, and a place to put all the materials that they give you. The LRC is such a challenge and such fun that we played two hours longer than planned until everyone tried the very problem." The time was a 12-minute time-limit on each activity, requiring each group to strategize with a Sergeant authority.

"A bunch of the guys took amazing falls. Two or three bloody noses were made into the water, while trying to get a stretcher across a rope bridge. John Ingram did a stand-up dive with a 55-gallon drum when his bridge collapsed," Egerton noted, but he emerged quickly uncashed.

Which Haircut Cost $6.00?

Surprise, they both did!
For style, convenience and price, you can't beat Third Dimension Cuts.
You get each of the kind of haircut you want. Comfort at Good Joking. And fashionable.
And you get it for $8.00.
The only way to get a better price... or this kind of styling is to be six years old or under. We cut children's hair for $5.00.
And of course, you never need an appointment.

There's a fear in confiding in people."

She finally realized what a strong person she was. "I have been recovered for a year now, and I feel so good about myself and my accomplishments," she said.
Give a slice of support

"Don't judge a book by its cover." We've heard that advice so many times that it has become a cliche. But it never hurts for us to hear it again. Handicapped individuals are sometimes stereotyped as "helpless" or un-intelligent. Likewise, business people have been labeled as "greedy" and "non-caring." Working to dispel these stereotypes are two of Moscow's most impressive individuals, Randy Steiner, a disabled quadriplegic, and Darrel Sellar, the manager of Pizza Perfection, are living proof that handicaps can be overcome, and that business people really care.

Here's their story:
In August, 1983, Randy was involved in a diving accident on Lake Osoyoos in Oregon. He left behind him without the use of his hands or legs. But rather than let his situation get the best of him, Randy returned to the university in 1984 to work on his bachelor's degree. He is now a senior majoring in Communications.

Returning to Moscow, Randy has become more involved in community work than ever. He currently serves on the Disabled Student Advisory Committee and is on the board of directors for Stepping Stones, Inc. And his hands are not the only things working in the U of I press box at football games. This year, he has been working as a "stringer" for the Twin Falls Times News.

Recently, a New York surgeon contacted Randy to tell him that an operation is now available which could help him regain control of his hands. But at $12,000, the initial cost of the operation seemed prohibitive.

Pete Sells, the editor and the entire crew of Pizza Perfection. Randy's roommate, Pizza Perfection worker Chris Duleea, told Dara about Randy's situation.

And Dara declared that she could help. For the next four days, Pizza Perfection will donate $1 to Randy for each $2-off Argonaut coupon (page 5) redeemed, and 50 cents for each $1-off coupon turned in.

Based on Pizza Perfection's popularity, that could add up to a lot of dough.

So now's your chance to help dispel some stereotypes— this is Randy Steiner. And, in the process, you can help yourself to a delicious dinner.

- Paul Allie

LETTERS POLICY: The Argonaut will accept letters to the editor until noon on the Friday before publication. The preferred length is one page long, single spaced. For subjects requiring greater exposition, arrangements can be made with the editor. Letters must be signed, and must provide a phone number or address of the writer. Proof of identity will be required at time of submission. Letters received by mail will not be returned. The editor reserves the right to edit and shorten letters. Letters will usually be printed according to size of space available. The Argonaut does not publish advertising.

Politics:

Muck and more muck

Editor's note: the following comment is reprinted with permission from the University of California, Santa Barbara, Daily Nexus.

We have already seen many weird, twisted political paradoxes in 1987. But for a year that started with so much hope for the Democratic Party, it sure has turned into a nightmare.

It's been a year that began as a high-water mark for the Republicans, and especially for our hallowed leader, President Reagan. Today the Teflon President acts as if every day is a drowsy summer afternoon.

Currently, it is Joe Biden's turn in the wrapper. Evidently, the good senator has been lying about his law school record, and has been taken a fancy to quoting other people in his speeches without proper attribution. The media is on his heels like a pack of rabid dogs, and he will certainly become a political memory, joining Hart and other ruined politicians in what Hunter S. Thompson calls the "dark pit."

However, with the fall of two would-be presidential stars, there is something terribly out of whack that almost should make the conscience.

Muck and more muck.

Stephen Elzer and editors

The Daily Nexus

UNIVERSITY OF CALIFORNIA, SANTA BARBARA

WASN'T IT ONLY YESTERDAY THAT OUR esteemed President seemed on the edge of that same pit? W asn't it just last November when we witnessed twenty politicians in Washington trying to unravel the intrigues of the Iran-Contra arms affair, a deal that provided arms to a terrorist nation partially responsible for the death of 200 marchers in Lebanon? Two candidates are gone because of minor transgressions, while Reagan weathered a storm that fails to compare with the misdeeds of his political colleagues.

Additionally, these are not qualities we want to see in our highest elected official, and these are traits we need to know about before elections roll around. Yet compared to what Reagan has done while in office, the moral disreputability of Senators Biden and Hart are petty and inconsequential.

Not many seem to see it this way, however, The Democratic party is sinking quicker than a ton of bricks, and the Republicans are still standing tall. Not that there is anything wrong with it. It's just a matter of perspective.
Let's work to solve problems

Editor: We've been hearing a lot lately about how "liberals" are mucking up the country and the planet with their evil ways. While there are some small ele-
ments of truth to this, I think it's important to
submit that our pals on the "right" are living an unsat-urating life. It's not that all of our country's and our planet's ill
problems can be summarized as "liberal." Therefore, in the
interest of fairness, I feel it's impor-
tant to recognize some of the wonderful things that religion (yes,
the same of a God who, supposedly
done for mankind - things that our pious brethren con-
vince us of)

Christianity has blessed humans 
with over the last five hundred years.
In an attempt to "civilize" tribes of
"heathens," Christian missionaries
have corrupted the cultures of
groups of people who had gotten along just fine without
them for centuries, and have
been disappeared. Religion is an ab-
ominable thing. God has an equal
right to his religion.

Mr. Schuig has recently been
involved with the Inquisition and
the Crusades. The results of these
efforts have been the deaths of
tens of thousands of people who
did not share the pious beliefs of the
Christians. Christianity was responsi-
ble for making the true workings of our solar
system invisible and blasphemous.

In their efforts to "civilize" people and
make them more "enlightened,"
Christian missionaries
have utilized their moralistic
interpretations of God's word to
the point of torture. Catholicism is
helping to keep much of the world
underdeveloped and
populated and thus in poverty by
preaching the "sex-for-
perfection" message. They also
lieving that inherently sexual be-
ings are wrong or should be
abandoned from love-making, save
for procreation, is truly sad.

Perhaps worse than any of this,
Christianity is trying to impose its
views on other groups of people through
consistent and sometimes violent
proselytization.

It's always been easier to con-
demn others than to try to under-
stand them. One of the reasons
for the success of the ARGONAUT letters form those who can
understand others by trying
to neatly pin the blame for all of our current problems on every-
one else is the simple notion that per-
ception of reality. Perhaps the critics of
"liberalism" are really considered "con-
servative" by Dan Niesbauer for much the same
reason. I think I speak for many of those critics in saying
that it's not a "straight-talking Christian" with whom we dis-
agree. The problem arises when a

let's talk about the impact of religion on our lives. Is it a force for good or evil? How does it influence our decisions and actions? Can religion be a source of comfort and support, or does it sometimes lead to conflict and division?

Are there any religious beliefs that you find particularly challenging or troubling? How do you try to reconcile them with your own values and beliefs?
Dining becomes a disorder, said Murray, when people develop "distorted patterns of thinking, feeling and behaving around food." Murray explains that problems develop when food is used for non-food purposes, such as rewarding oneself instead of eating. "If I lose five pounds... life would be great," Murray said.

After losing five pounds, people find that life isn’t much better. Thus the beginning of anorexia, Murray said. "People don’t just wake up one morning and decide I think I’ll become an anorexic. Ninety percent of anorexics start out as dieters," she said.

Unfortunately, the fear of fat or the desire to be thin motivates some to damage their health or starve themselves to death, panel members said.

"Food ends up totally tied up in self-esteem," said Braun, who is receiving recovered from anorexia. "People think ‘If I could just lose five pounds... life would be great.’"

Exercising the new alcohol policy: A view from the Residence Halls

BY ERIK SIMPSON

"Alcohol parties in the residence halls ‘party rooms’ have been banned this semester, according to the state’s drinking age of 21. It’s ruled that alcohol can’t be brought to the residence halls," said Joe Hughes, house manager of the Alpha Chi Omega’s, C-21. "I don’t think this is completely about partying without alcohol?"

Hughes said Paul, president of the alcohol-free parties because people are getting drunk in the halls are under 21 and can’t drink at the bars anyway.

"Unfortunately, the rule has forced halls to come up with creative ideas," said Murray. "There are no new rules, but the party rooms are still legal..."

Dealing with bulimia, Murray added, may include "coming up with alternatives that are as quick, easy and rewarding as food. That might take some work." Anorexics face "different problems, however.

"When bulimia is a circular pattern, anorexia is a downward plunge," Murray said. "An anorexic becomes so good at denying hunger that she misinterprets signals," explained Braun. "Instead of, ‘I’m hungry,’ she thinks, ‘I have a stomach-ache, so I’d better not eat anything.’"

"Often, a systematic diet limitations are made, separating what an anorexic feels to be ‘good foods’ from ‘bad foods.’"

"Several biological changes take place when a person cuts food intake. The earlier you catch the disorder, the better off you will be," said Braun. "I encourage you to take a look at your dietary habits."
‘Mills Brothers meet Devo’ Sunday

By Kirk Laughlin

The Bobs, a Grammy-nominated a cappella group, will appear in the UI Administration Building Auditorium this Sunday night at 7:30 p.m.

Referred to as “Devo-meets-the-Mills Brothers” by the L.C.C.A. Brain, the quartet is accompanied only by percussion.

Instead of listless instruments that each person plays, The Bobs quote the frequency range that each member can perform. They go from Richard Greene’s 80 Hz low to Janie Scott’s 700 Hz high.

Gunnar Madsen, along with Greene, create the bulk of The Bobs’ original material and Matthew Sull rounds out the group, serving in the mid-range.

The Bobs herald from the San Francisco Bay Area and created quite a stir with the tour promoting their first album entitled simply The Bobs. That 1985-86 tour taught the Bobs up with a formidable group of entertainers which included contemporary hits, Billy Joel, Williams and Billy Crystal as well as headline groups such as The Manhattan Transfer, The Grateful Dead, and Frank Zappa.

It was their cover version of the Beatles’ ‘Helter Skelter’ on their first album which earned The Bobs (which is an acronym for Best Of Breed) a 1985 Grammy nomination for Best Vocal Arrangement. The McCartney-Lennon song should alert people that The Bobs are not a typical doo-wop band.

A sampling of other songs in their repertoire reinforces the idea. Reviewers ranging from the Los Angeles Times to The Boston Globe have found ‘The Bobs’ to be proficient and enlightening with such diverse acts as Led Zeppelin’s Whole Lotta Love, Talking Heads’ Psycho Killer, Elvis Costello’s Accidents Will Happen, and their own punk-out Be My Yoko!

Other slices of America brought hilariously to life by The Bobs include a speed-popping bus driver trying to stay awake until the next destination (the song Bus Lamp).

‘A fish out of water’

Foreign students find adjustment to American life a shock

Feeling like a fish out of water is a sure sign of a syndrome commonly known as “culture shock.” Simply stated, culture defines what we are. When we begin questioning ourselves about “what we are,” it becomes “culture shock.”

Provided that we do not get the right answer to satisfy ourselves.

Culture shock can arise without leaving your own culture, but most of the time it strikes those who venture to a foreign country and remain there for any length of time.

Because our thoughts and actions are very much conditioned to a particular environment, we instantly recognize a differing culture. This difference in culture comes to us as a shock because of our tendency to stick to our initial ways of thinking and doing things no matter right or wrong, progressive or non-progressive.

The UI has about 300 international students representing more than 50 foreign countries of various cultural backgrounds. Rakesh Kadakia, a graduate student in Chemical Engineering from Bombay, India, remembered his first experience with an American.

“I remember talking to an airline person the day I arrived in the United States. I was saying ‘yes’ and shaking my head side to side to approve of what she was asking; but what she returned was a confused look. She asked me, ‘Are you saying yes or no?’”

He added, “After that I learned to be more careful even though sometimes I repeat my mistakes. Coming here wasn’t actually a shock to me, but it is a reminder that I belong to a different culture.”

LJ Bin, a graduate student in Computer Science from the small town of Guiyang, China, was asked how different he found lifestyle in America from his native land.

“Absolutely different,” he said.

FOREIGN student Rakesh Kadakia, a graduate student from Bombay, India is one of 300 international students at the UI (ARGONAUT/Henry Moore)
SHOCK FROM PAGE 8

Don't be busy in America, they work very hard and seem to lead a busy life. Jobs are the most important part of lives.

Concerning possible culture shock when they arrived in the United States, Bin said "I have heard about this kind of reaction before, so I was mentally prepared for it. When I came here I didn't feel much shock."

Bin is reluctant to adapt too much to the American way, though, for fear of losing his ties with home.

"Even though I want to be more into the ways of this country, I can't because I would lose my friendship with people back home. I'm the kind of person who can't survive without friendship."

Like many foreigners in the United States, Bin liked the friendly attitude of Americans, and female students in particular.

"I find the Americans very friendly even though some of them have business-like smiles. But I like it even though it is business-like. The girls here are very pretty but I don't think I understand them. I doubt whether the American males do either, though."

Although women, international students felt like going back home the day they came here, they overcame their confusion.

Kadiksa said, "Finally we came to accept the fact that we have to be at no matter where we are and to have an open mind to get over this shock."

Nadya Zymba dances the title role in this first adaptation of the story to ballet. Zymba was a guest artist with the Los Angeles Ballet for the International Dance Festival at the 1984 Olympics. She has performed with Les Grand Ballet Canadiens, the Ballet Nacional de Mexico and Le Ballet Clasique de Paris.

The role of the Prince is danced by Luis Astorga and the role of Queen Mother is performed by Marla Hansen. Jennifer Smith performs as the Fairy of the Forest.

SEE BALLET PAGE 10

IN ITS WORLD PREMIERE AS A BALLET, Snow White comes to the stage tonight. Marla Hansen will portray the Queen Mother and Nadya Zymba will dance the title role.

'Snow White' hits stage

Tonight the classic story of a girl in trouble will be splashed across the Bradley Performing Arts Coliseum stage.

The American Festival Ballet will perform the world premiere ballet version of "Snow White" tonight at 8 p.m. and tomorrow for a 2 p.m. matinee.

Jack Alosto, AFP director, said this ballet will be enjoyable for families because it has the "fantasy element of dwarves, animals and fairies," as well as a large company, three set changes and more than 50 costumes.
UI Rugby '87

A team to be reckoned with

BY CLAYTON HALEY

If you enjoy watching a competitive football game, where each strategic play brings you to your feet in a multitude of emotional states ranging from hours of joy to hours of despair, then an action-packed season University of Idaho Rugby Club match will test your athletic judgement and capacity.

On a cold and windy Saturday last week the UI Rugby Club exposed a group of rugby enthusiasts and curious spectators to two 40-minute halves of action-packed, non-stop rough and ragged rugby as Idaho defeated Boise State in a final score of 24-12.

UI kicked the oversized football from the 50 to begin the game in the first half. Spokane was quick to set up a game plan in which each of the 15 players were advancing forward one unit.

Vandal Cross Country hosts home meet

BY ERIK SIMPSON

In an attempt to leave their competition in the dust, the Idaho men's cross-country team finished third in a meet in Spokane Saturday.

Spokane Falls Community College finished first with 36 points. Coming in a close second was Eastern Washington University with 37 points, and the Vandals finished behind EWU with 46 points.

The point system in cross country is different than football. The lower points signify how well a team ran. For example, if the five Vandals that ran Saturday finished with 15 points, that would signify a perfect score.

A field of 24 men ran the 8,000 meter event. Vandal runner Mark Evans finished first with a time of 24:37.9 minutes. James Tennant finished sixth with 25:47.6, Mike Drew came in seventh at 25.57.1 for seventh place, Todd Weston came in 13th place with 26:17.8, and Salvador Hurtado finished with a time of 27:04.4 for 18th place.

"Many expectations and more," said coach Mike Keller. "Individually, the rest of them are capable of top performances."

The Vandal men will have another opportunity to beat their competition this Saturday at the UI golf course. The women's team will also compete Saturday after having taken a week off from competition.

The men's 8,000 meter competition will begin at 9 a.m. The women run the same event at 9:40 a.m.

The meet, called the Idaho Invitational, is the only meet that takes place at the UI this year.

"This will be a good meet for us," said Women's Coach Scott Leuke. "It will give us a chance to see how we match up with some of the other schools in the conference."

The women will race against runners from Washington State University, the University of Montana, Eastern Washington University, Boise State University and North Idaho College. The men will compete with Eastern Washington University, North Idaho College and community colleges of Spokane.

"It's always nice to have a meet at home," said Men's Coach Mike Keller. "It brings traveling somewhere and having a long ride home. The guys can sleep in their own beds and stay with their routine a little more."

Martial Arts: Two systems offered

BY J. TA KUO

When the first man struck another with intent to do bodily harm, arts were born. These techniques of offense and defense became ritualized and taught in almost every society known. We have become most familiar with the martial arts of Kung fu and Judo.

Kung fu was probably derived from a hand and foot system that originated in the subcontinent of India. Kung fu itself is hundreds, if not thousands of years old, most commonly associated with China. Kung fu studied animals, real and mythological, to imitate their offensive and defensive postures and techniques. That is why the Tiger system mimics the tenacity and ferocity of the Tiger by using heavy clawing and slapping techniques that transfer tremendous amounts of energy, shred flesh and break bone.

The Crane uses long, circular arm motions as if a bird were flapping its victim. The hands are held in the shape of a beak, and used to tear and break. The mythical Chinese phoenix, a dragon-like animal with the body of a crane, the feet of an eagle and the tail of a fish, is probably the only truly notable weapon of the ancient Okinawan art is the "bo," a staff which was mentioned in the Okinawa Issen-ri (One Thousand Years of Okinawan History), in 1314 A.D.

Karate is generally thought of as a "hard system" as opposed to the "soft style" of kung fu. For example, bowers are delivered with closed fists and straight kicks instead of the open handed motions and aerobatic maneuvers.

The evolution of martial arts is a story of the systems that are commonly thought of, having a circumstantial route. Because of the Sino-Persional Chinese swore not to teach any of the "arts" to the Occidentals as long as that generation lived. Therefore, the Chinese systems were virtually lost until the early 1960's when notable, Bruce Lee started teaching in the United States. Other forms were introduced to the U.S. armed forces in the late 1950's, chiefly by Charles Nelson. He started and taught a system he called Combat-do. This system mainly stressed the breaking and crippling techniques of Mongolian wrestling. After many encounters with the oriental arts in WW II, Korea and Viet Nam, the martial arts have prospered in the United States.

Today, so many forms of martial arts, both traditional and commercialized, are taught in the U.S. that one can pick and choose the system that best fits. He can be located using the martial arts systems, where techniques of breathing are stressed for the first few years, or some of the "Americanized" systems that make one viable in as little as three years.

Flying discs are soaring

JEFF STUCKER

COMMENTARY

Indian summer is here, and people are still throwing plastic circles at trees, poles and fire hydrants. What started this flying disc fun seen around the world?

As young boys, Walter Frederick Morrison and Earnest C. "Bill" Robes threw around coffee or paint can lids. Little did they know that their childhood pastime-turned-invention would become an international leisure sport sweeping campuses. Despite their common braintrust, they never met. Both developed, patented, and marketed plastic discs in the 1950s, each not knowing about the other. Morrison, in California, eventually sold rights on his Plate Platter to Wham-O, which came up with a new name: FRISBEE. With 100 million sold in the last 30 years, Morrison has made more than $500,000. Robes' Space Saucer sold for a while, but never was linked to a major manufacturer.

Since then, the sport has spawned over 150 discs, parks and even competitions such as the U.S. Open Flying Disc Championships drawing 12,000 Southern Californians to La Mirada, watching 200 hopefuls from at least three continents compete for $40,000 in prize money.

But most campus disc-throwers simply see another opportunity to enjoy the mid-afternoon sun.

Kitten ball became softball?

BY JOHN BEE

The Idaho Vandal football team will be in Pocatello Saturday night to continue its long-standing rivalry with the Idaho State Ben- gals in the ASSLI Midswest. Idaho State is 0-3 on the season, and are riding a 10-game losing streak, which began against the Vandal last season. Idaho State head coach Gilbertson doesn't expect a cakewalk, however.

"Anybody in the conference who takes anybody for granted is very foolish and is going to be in for a long evening," said Gilbertson.

The Bengals have allowed an average of 538 yards of offense in their first three games, while the Vandals, led by quarterback John Fritz, average 429 yards of offense per game. The key to the game, however, will be in the defensive line, where the Vandals are expected to take advantage. Gilbertson said that he was impressed by the backfield of Corky Feddick, Chad Custon and quarterback Greg Brown, who combined for 15 of 26 passes for 236, one touchdown, and three interceptions last week in a 51-16 loss to Utah.

Vandal fans will be quick to remember the last Vandal-Bengal confrontation in the Midswest in 1985. ISU scored on a 70-yard kickoff from Vern Harris to Buch Caston on third down with 33 seconds remaining to cap a wild 38-37 victory for the Bengals.

Last year, the teams clashed in the Kibbie Dome, and the Vandals overcame a 14-10 halftime deficit by scoring 26 straight-second-half points to secure their fourth win of the season, 38-26. Eric Jergensen caught seven passes for 110 yards and four touchdowns from Scott Linehan.

Bruce Harris leads the Vandals in rushing this season with 261 yards and 33 carries. The ASSLI Midswest is the leader in receiving with 319 yards in 31 catches, with a long of 60 yards last week against NAU. Kicker Brian Decicco broke the Idaho State single-season record when he made four of five last McDonald reminded me that in 1977, Oregon made 5 of 7 field goals, breaking the old record of 34 for 52, and has made 47 consecutive extra points.

The Vandals have defeated the Bengals 17 times with no defeats, and have won three of their five games. The game is scheduled for kickoff at 6:30 p.m. PST, and can be seen on the Vandals Network, with Bob Currier providing the play-by-play.

WordPerfect is recognized as one of the nation's leading word processing systems for use on micro, mini, and mainframe computer systems. WordPerfect is rapidly becoming recognized as the leader and system of choice by students and faculty at UI.

Jeff Ullmann, a local consultant in the use of WordPerfect, stated that "WordPerfect is a document rather than page oriented. This feature is important when working on long documents (more than five pages) especially when changes in layout, relocation of footnotes, conversion to multiple columns or even checking the spelling is in process."

"WordPerfet's spelling checker has over 11,000 words with the capability of user added words. The thesaurus has 16,000 head words with a 200,000 word list including synonyms.

When asked for the most important features in WordPerfect for a student or faculty member, Ullmann reported five: footnotes and endnotes; on-line help recognized to be among the best; no on-screen clutter when composing text, full realtime support from WordPerfect Corporation and Computer Center. WordPerfect Corp; and, multiple column (up to 24) on-screen display.

Unlike other word processors, WordPerfect is available for MS-DOS computers, Apple (including the IIGS), IBM PC ST, Amiga and more. Through CP WordPerfect can be provided in a variety of foreign languages.

Jerry Brong, Director of the C3 Educational Services Division, stated that, "Through our UI educational program staff, students, staff, and departments can acquire WordPerfect for $125, a savings of 75% from the suggested list price. Support at this price is at the full level, not some reduced level."

Brong continued by stressing that "this free education program is a real opportunity." C3 will install WordPerfect on computers sold as well as those sold through other educational computer sales programs. Price is the same.

Brong pointed out that "A UI student can obtain from C3 a fully configured PC with WordPerfect for about $975. Full support is included. That proven its an advantage to be a student at UI in Moscow!"
Looking for hotspots?

BY MIKE BEISER

Of all the special outdoor experiences, few compare to the treat of finding natural hot springs in the wild.

Idaho alone has more than 200 documented natural hot springs, most of which are located in the central part of the state unfortunately. Many of these are far back in some of the large wilderness areas. There are no known hot springs in northern Idaho, but the nearest hot springs to the Palouse are in the Selway-Bitterroot Wilderness, just south of Highway 12.

With the growth of wilderness recreation in the past decade, there has also been an interest in finding hot springs in these remote areas. After a hard day on the trail many people appreciate a warm soak amid natural surroundings; it's also a good excuse to run around in the buff.

People want to know where the easily accessible pools are, particularly those that few people know about. Unfortunately, finding such a place is only slightly more difficult than finding gold.

The Idaho Bureau of Mines and Geology publishes a map on energy resources if Idaho. This map shows the major hot springs and their temperatures. The majority of these springs tend to come out of the ground along rivers such as the middle fork and south fork of the Salmon.

There are also a number of good books published on hot springs in Idaho. One is entitled, "Great Hot Springs of the West" by Bill Kaying, which lists 196 springs in Idaho alone, with information on how to find them, temperatures and other pertinent data.

Exact information on how to find each spring is not always available, but that's part of the fun. We tend to treasure things more when they are a greater challenge to find. I would bet there are even other unknown hot springs out in the Idaho wilderness. Finding one will be a real treat to the finder - and a food dream for the rest of us.

OUTDOOR CORNER
UPCOMING EVENTS:

• WILDERNESS CANOE TRIP, UPPER PRIEST LAKE
  October 10-11. The pre-trip meeting will be held Wednesday, Oct. 7 at 4:30 p.m. in the Outdoor Program office.

SLIDE SHOW PRESENTATION:
  Solo bike of the Appalachian Trail. A multi-media slide show presentation by Jim Gale will be held in the UI SUB, Borah Theater, on Thursday, Oct. 15 at 8 p.m. The Appalachian Trail spans more than 2000 miles from Georgia to Maine through some of the most spectacular wilderness areas in the East. The event is sponsored by the UI Outdoor Program and admission is free.

• EAGLE CAP WILDERNESS BACKPACKING TRIP
  The pre-trip meeting will be held Oct. 13 at 4:30 p.m. at the Outdoor Program office in the basement of the SUB.

• Trips, outings and workshops that require sign-up at the Outdoor Program Office. Sign-up will open the day before each event takes place, all group fees are due at that time, and it is first come-first serve.

Netters recap, head for Montana

MICHAEL LEWIS

The Lady Vandals volleyball team finished a 3-3 weekend home and Monday night, losing to the S. Lady Wildcats of Weber State four games, 15-12, 6-15, and 5.

The Mountain West Conference Six might have been best described as "intermittent," as they haled several times due officiating and scorekeeping errors.

"The officiating was absolutely ridiculous," commented Idaho coach Pam Bradetich. "I don't really complain about officiating. But I've never seen so much of a control." The controversy arose during the four, with the Lady Vandals losing 2-1, in regard to who was going to serve for the Lady Wild. After nearly minutes of deliberation at the scorer's table, it was decided that the game would restarted.

I've never, ever heard of that happening anywhere," Bradetich. The Lady Vandals were able to tie back to win 15-12 in game behind Kasha Christiansen's blocking that put them ahead for good. Scenes of Delia, Leslie Bischoff and a 3-0 start in game two, as she gave up 11 unanswered points and lost 6-15, evening up game score at 1-1.
RUGBY FROM PAGE 11
picked up by Spokane backs who dropped it over the try zone for one of Spokane's two four-point tries. Spokane's other four-pointer was on a passing interception in the second half within Idaho's 30. The conversion kicks on both error-induced tries were good. Idaho ruggers came back in the second half falling 4-12, but successful back play and scrum play brought Idaho four tries and two conversions.

CROSS COUNTRY
This weekend will be the only chance this season to see the Vandal Cross Country team in action. The Vandal will be hosting teams from the Idaho Invitational held on the ASU Golf Course, Saturday, Oct. 3. The men's race will begin at 9 a.m. while the women's competition begins at 9:45 a.m.

VANDAL ATHLETICS
Collegiate coaching greats Don Haskins and Billy Tubbs will highlight the inaugural University of Idaho Convivors Basketball Coaching Clinic which will take place Oct. 2 and 3 at Moscow's University Inn.
Cost of the clinic is $35 for pre-registration or $45 at the door. The clinic begins at 5 p.m. Friday and winds up at about 5:45 p.m. Saturday.

VANDAL FOOTBALL
The "Grid Warriors" will continue their pursuit this weekend when they invade Pocatello to nail the Idaho State Bengals. Game time will be 7:30 p.m. Saturday, Oct. 3 in the ISU Mini Dome.

VOLLEYBALL
The Lady Vandals will be on the road to Montana this weekend to meet University of Montana tonight and Montana State, Saturday, Oct. 3.

RUGBY
The UI Rugby Club will host Ritzville Sunday, Oct. 4 at the Intramural Field at noon.

UI SOCCER CLUB
The UI Soccer Club tied Eastern Oregon 1-1 in the season opener for both squads at La Grande Sunday afternoon. The Idaho club dominated play throughout the game, with Steve McLaughlin scoring from his left wing position on a cross from Troy Reynolds. The Idaho club is at home this weekend for 1 p.m. games Saturday and Sunday against Central Oregon Community College and Willamette University. Home games are played on the field behind the Wallace Complex and the Guy Wicks baseball diamond. The public is invited and admission is free.

Alpha Chi Omega would like to issue some congratulations and thank-you.

First off...to the winners!!!
1st Place: Farmhouse
2nd Place, Sigma Chi
3rd Place, Sigma Alpha Epsilon
4th Place and most creative Frisbee, Snowball Funniest Frisbee, Lindley Hall Team theme Frisbee, Theta Chi Best dressed team, Alpha Tau Omega

Secondly, to all who participated!!!
Thanks to Alpha Tau Omega, Delta Chi, Farmhouse, Gamma Chi, Kappa Sigma, Lindley Hall, Phi Delta Theta, Phi Kappa Tau, Pi Kappa Alpha, Sigma Alpha Epsilon, Sigma Chi, Snow Hall, Theta Chi, and Upham Hall.

Third, a special thank-you to:
Coca-Cola, Galloways, Mingles, TKO, Image Studios, and Precision Engraving

Fourth, a very special thank-you to:
Daniei Martin, Beth Barclay, Sarah Zenzic, Paula Shaw, Lisa Hollaway, Leakea Triplett, Suzanne Evers, Stephanie Darchuck, Jana Pfefferkorn, Lisa Merrigan (fetto loves you)
And a very special special thank-you to Tom for the beautiful if not spectacular show at the top of the hill.
