Beta pledge falls three stories

By STEPHANIE BAILEY
News Editor

A Beta Theta Pi pledge is in stable condition after falling three stories to an open window in the chapter house early yesterday morning during a party.

Eeen-year-old Brian Pul-

liam was discovered by another house member shortly after mid-
night and was taken to Grinnan Memorial Hospital by emer-

gence, according to Corporal John Royse, campus liaison officer. Beta

Courtnery Tousey said that Pulliam was "relieving him-

self" out the window when he fell.

Tousey said alcohol was served at the party and legs were pre-

sent but bouncers were at the door to check I.D.'s and watch the

limited guest list and minors were not supposed to be drink-

ing. Pulliam was checking I.D.'s at the door during the evening.

"He's a good guy. He's really lucky," Tousey said. "We made a

mistake and we made a mistake. It was an accident and I'm really

sorry it happened. Where there is alcohol at a fraternity there's

bound to be an accident sometime."

Officer Royals said he will be conducting interviews through-

out the week.

"The exact circumstances are unknown. We're investigating if it

was accidental. It is possibly alcohol related," Royse said. "I

still have to nail down some loose ends. I'm fairly certain it was an

accident but I can't overlook anything."

Dean of students Bruce Pitman said he was initially working with

Pulliam's family to give them support.

"It's very lucky it's not more serious. We are very relieved.

This is minor compared to what could have happened," Pitman

said. It is Pitman's understanding that at least one parent was on the

way to Moscow and was plan-

ning to stay a few days. Pulliam

was treated for cuts and bruises and will probably remain in the

hospital for observation, Pitman

said.

Pitman said there will be action taken by the University. "I've

only had one interview with the chapter president and investiga-

tions will continue into early next week, based on which we'll decide

an appropriate response."

"The chapter president and officers have been very coopera-

tive and open at this point and they also responded very swiftly

and appropriately," Pitman said.

Student leaders oppose video yearbook

By SHERRY DEAL
Associate Editor

University of Idaho student publications employees and staff are

opposed to a private company's plans to produce a video

yearbook on the UI and Washing-

ton State University campuses.

Julie Young, Grim of the Moun-

tains yearbook editor, said she

does not think the company

should be allowed to produce the

video.

"Anything that reflects student life should be done by the stu-

dents," she said. "I don't think they (the company) have the U of I's

best interest at heart," she said.

Scott Biggs, Envision presi-

dent, the California-based com-

pany in charge of the video, said

he has tried to involve students in

the project.

He said he contacted ASUI

President David Pena in June and also spoke with Vice President of

Student Affairs Hal Godwin, Dean for Student Advisory Ser-

vices Bruce Pitman and ASUI Gen-

eral Manager Dean Vet Train.

Biggs also said he sent letters to all ASUI Presidents and gathered

as much student input as possible during the last summer.

ASUI Sen. Bill Heffner said he is opposed to the company com-

ing in.

"I don't think we should have an outside group handling a pro-

ject like this because whether or not we endorse this it reflects on

students," he said.

Biggs said he plans to hire

about 10 students to do the cam-

eras work for the video, and

expressed interest in setting up a student advisory board that

would have input in the video.

He said only the final profes-

sional editing would be done in

the Los Angeles area.

Biggs said Godwin and other

administrators did not give

approval for the project but

expressed "extreme favorism."

However, Biggs said he does

not believe administrative

approval is necessary for his

company to come onto campus

and produce the video and he

said he plans to continue even

if the university administration does not support them.

"There is no final approval necessary. We are not asking for

permission," he said.

A legal opinion by the univer-

sity's attorney said there are sev-

eral questions that need to be

answered, but that administra-

tive permission is required.

"At a minimum, we think you

should advise Mr. Biggs that his

statement in his letter to you that he really doesn't need university

approval is inaccurate," the opin-

ion said.

Young and Stephanie Curry,

ASUI communications oper-

ations manager, also believe Biggs needs university approval.

They base their opinion partly on a section of the University of

Idaho Faculty-Staff Handbook that states, "Solicitation or canvass-

ing by individuals or organi-

zations on UI property without prior approval by the president or the

president's designee (or-

After two unsuccessful Art and Architecture department searches, the University of Idaho named Assis-
tant Vice President for Academic Affairs Dr. George M. Simmons dean of that college for a two year

term.

Simmons earned a degree in chemical engineering at the Un-

iversity of Idaho and went on to Stanford, completing his doc-

torate in 1979.Simmons returned to the Palouse and taught chemical engineering in the University of Idaho be-

tween 1975 and 1985. During the last five years of tenure he was the chairman of the chemical engineer-

ing department. In 1986 he was named assistant vice president of academic affairs and research.

Three years ago Simmons was selected to participate in the Kel-

logg National Fellowship sponsored by the Kellogg Foundation.

Nationwide, only 40 peo-

ple were selected to travel

UI launches statewide disability program

By KIM COOPER
Staff Writer

Idaho’s students with developmental disabilities will find more assistance through the project, which has been provided with a $270,000 grant from the federal Administration on Developmental Disabilities, will be launched from a proposal work scope from 1990 through 1993. During this time, the aid of the grant, the project will be spread widely in a custom fit manner. Burton said the program, Idaho’s first, was built from several other national projects.

Disease threatens Moscow elms

By FRANK LOCKWOOD
Staff Writer

A deadly tree disease could destroy every American elm tree in Moscow, and city officials are scrambling to combat it. The Dutch elm disease (DED) first turned up locally on one of the University of Idaho’s elms in July and at least ten trees have already been lost.

Parks officials are eager to halt the spread, saying it would likely decimate the city’s 1,500 elms — some of them older than Idaho.

Moscow’s council hurriedly passed an emergency ordinance empowering the Parks and Recreation head to force private land owners to remove sick trees from their property. The move aangers some land owners who argue removal could cost them up to $1,000.

The city has responded by proposing no-interest loans for expensive removal and by providing an disposal site.

Parks and Recreation Director Randy Rice says he does not expect many more infected trees to be discovered this fall, but his department is busy taking inventory of all the city’s American elms, testing trees that are suspect, and planning for a new inoculation next year. Dutch elm disease is a fungus often carried by beetles. In the winter both the beetles and the beetles become dormant and the spread of the disease slows temporarily.

Planning must begin now, however, so the city will be able to deal effectively with the epidemic.

“The spring, we could find hundreds of trees that are infected,” Rice said, adding that the disease is at its worst in the spring. “It’s a major threat no doubt about it.”

City officials seek to increase the public’s awareness of the disease. See ELMS page B+.
Two ASUI senators resign

BY ANDREA VOGT
Staff Writer

A depleted ASUI senate held its first meeting of the semester last Wednesday night. Two senators resigned over the summer and Sen. Doug Korn was absent from the meeting and intends to announce his resignation soon.

Sen. Patty McCray resigned at the final senate meeting of the spring semester and Sen. John Goettsche presented his letter of resignation earlier this month.

Korn, who is combattng 19 credits this semester and a time consuming job, recently chose to give up his seat in the senate. "I thought a lot about this over the summer and I think I'm to the point where I am just not getting anything out of it anymore," Korn said. "I just feel like I gave and gave and gave last year and didn't get a lot back."

Despite his decision to resign, Korn plans to stay involved in the ASUI government, and gave an overall positive impression about his experiences as a senator.

"What kept me in was how much I enjoyed talking to the students and representing them," Korn said. "I just hope that someone as energetic and enthusiastic as I was comes in."

Goettsche, a senator for three semesters, attended the meeting and set in the audience, listening as his letter of resignation was read aloud to the senate members.

"Unlike many other senators who chose to exit the senate in a fiery storm of accusations charg ing the ASUI government of being unable and unwilling to address student issues, I will not do it," Goettsche said in his letter. "Though tenseness in the past year dampened Goettsche's enthusiasm for the senate, he praised the ASUI for their diligence.

"One thing that never gets said when senators resign is that the ASUI does do a lot for the student body," Goettsche said. "And they don't usually get all the credit they deserve."

President David Pena has already submitted a bill to the senate for the appointment of Charles D'Alessio to one of the open spots. The bill has been sent to committee. Applications for the remaining open positions are available in the ASUI office in the SUB.

UI renovates plaza

The Forestry plaza area in front of the Forestry Building will undergo a $50,000 "modernization" during the next few months.

Facility Planning Director Joanne Reece said a jogger sprained her ankle early this summer and although they were planning to update the area, the accident prompted them to begin right away.

"The area has a lot of textured concrete and exposed aggregates including embedded log rounds and over the years it has created a safety hazard," Reece said.

Reece said that differential settlement, wood deterioration and weathering contributed to the worsening condition. The renovations will include new concrete, plantings, benches and bike parking.

Outside company's video yearbook inappropriate

What could be so complicated about a yearbook? It is a concept familiar to UI students...until you put it on video...

That is just what Scott Biggs, the president of the California-based video company Envision intends to do. And we're all getting a little bit concerned.

Biggs is no stranger. He was an ASUI senator, and ASUI vice president in 1981. But does that give him the right to come onto our campus and make a profit off of UI students?

Traditionally students have been in control of their own media. The Argonaut, the Cen of the Mountains yearbook and KUUI radio all operate under the supervision of a student editor or manager. Students have total control over content relayed through these media. Not only does this allow the students the opportunity to show the university in a way they feel is appropriate to their peers, but it gives them valuable hands-on experience in competitive fields.

While Biggs intends to hire students to do the taping for the video and wishes to set up a student advisory board, that goes against every precedent by the UI's student-run media.

The concept of a video yearbook is not a new one. High schools and colleges across the nation produce video yearbooks, and the concept has been discussed here before.

Biggs also intends to do his yearbook with or without approval from the administration or the student government and his motives appear to be purely monetary: Envision is getting 65 percent of any profits and Biggs apparently intends to use the tapes he creates this year from the UI and Washington State University to sell the concept to other schools.

It appears that to Biggs we are just a nice place to start—he must have figured that getting his foot in the door of his alma mater would be pretty easy. Administrators and ASUI officials need to send a clear message to Mr. Biggs that we don't want his kind of Hollywood-glitzy video on our campus. We are capable of producing our own UI video, and if that is what students want, the ASUI should respond by funding the project.

Area businesses make it convenient to recycle

Supermarkets offer cash incentives

BY STEPHANIE BAILEY

News Editor

It's amazing how many bags the average student can collect in a week's time. Bags from the bookstore, grocery store, a few from the mall and you've got yourself quite a collection. Americans use billions of bags to each year and only a small percentage of these are reused or recycled. Many of them are not necessary in the first place.

The easiest way to reduce the amount of bags you collect is to leave them at the store. Don't take them unless you have to. Sturdy cloth bags or backpacks are also a good way to reduce the amount of resources that are used up for throw-away bags.

Your bags can also be easily reused. Moscow's Tidyman offers five cents off per bag when you bring in your own grocery bags and Safeway and Exell stores offer three cents off. Tidyman's Nick Roberts said the return program has been "pretty successful." "It costs us five cents to buy the bags and we'd rather have that savings go to the customer rather than the supplier," Roberts said.

If you already have more bags than you could ever reuse the Moscow Food Co-op at 310 W. 3rd will reuse grocery bags you bring in. They like to put all the flat grocery bags inside another bag so they are easy to get out.

Recycling is the last alternative for your used bags. Pay 'n Save stores at the Palouse Empire Mall and at 1404 S. Blaine have recycling bins for any clean and dry plastic bags. The plastic is melted down to make new plastic bags. Bags with string handles and bags for bread and vegetables can also be recycled there.

The Moscow Recyling Center at 250 N. Jackson will recycle paper bags.

Although some people question whether paper bags are better for the environment than plastic, they are made from renewable resources and are biodegradable. Degradeable plastic bags, which only break down into smaller pieces, are also more common now. However it's almost impossible for either one to break down in today's landfill conditions.

Tired of getting handfuls of promotional material with every purchase you make take the UI bookstore for example? An alternative is to take out all the pamphlets and leave them on the counter. Tell them they can put it in their own trash can.

All those moving boxes can be recycled if you can't think of a way to reuse them. Moscow Recycling Center takes any corrugated cardboard including pizza boxes.

How the CIA could have predicted Saddam's seizure of Kuwait?

The Argonaut will accept letters to the editor until noon on the day prior to publication. They must be limited to two double spaced typed pages in length. For subjects requiring greater exposition, arrangements may be made with the editor.

Letters must be signed in ink and include the name, address, student identification number or driver's license number, and phone number of the writer. For multiple-authored letters, the above information will be required for each writer. Proof of identity will be needed at time of submission. Letters received by mail will not be run unless confirmation of authorship is made. Names of writers will not be withheld.

Letters may be edited for length, mechanical errors and spelling errors. The Argonaut reserves the right to refuse to publish any letter.

son and I don’t think it’s to push the arts or enhance architecture but rather to clean house,” said Brian Beckler, a fifth year architecture student. “I think there is more to clean up, get the budget back on track and wood cut bad elements before a permanent dean is brought in.”

“Maybe this is the guy to put the fire back into our college.”

— Brian Beckler  
architect student

Simmons said he understands the importance of not only providing curriculum and professors but also a learning environment for the students. “This is not my professional background, but I have an empathy and I think I can help them (the college’s progress),” Simmons said.

Simmons’s primary goal is to maintain accreditation in the two programs, architecture and landscape architecture, being visited by an accreditation team this spring. The team will visit for two to three days in the spring and look at the content of the curriculum to make sure concepts are being taught to the proper depth and degree Simmons said. They will look at the support facilities available to students, class size, credentials of the faculty and the success of the graduates from the programs.

“The team will look at student’s work to see whether they are being taught to do good things,” Simmons said. “They try to get a feel for the overall quality and the university’s commitment to the program.”

Another of the dean’s duties is to interact with the professional community and maintain a dialogue with them. “We need to understand what their needs are and make sure we are addressing necessary things,” Simmons said, “Our programs need to keep changing and adapting.”

Simmons also stressed the importance of maintaining alumni relations as part of the need to articulate the college both outside and inside the university. “In the long run the goal is to return national search and hire a permanent dean,” Simmons said. “Meanwhile, I will help my college maintain its pride and eminence within this university.”

The new HP 48SX and a free ‘library card’ can get you there.

With over 2010 built-in functions, our new HP 48SX Scientific Expansable calculator takes a quantum leap into the 21st century. Buy an HP 48SX between August 10th and October 10th, 1990, and HP will send you a FREE HP Library Card (a $89.95 retail value).

The plug-in application card alone contains more than 300 science and engineering equations, as well as the periodic table, a constant reference, and a multi-equation solver. It’s like having a stack of reference books at your fingertips.

The HP 48SX calculator is so advanced, it will change the way you solve problems forever. It integrates graphics with calculation, lets you enter equations in the way you write them, and does automatic unit conversion.

Check your campus bookstore or HP retailer for HP’s range of calculators and special back-to-school offers. Then check out on the products that are years ahead of their class.

There is a better way.

Move 10 years ahead of the class.
Our Student Checking Can Take You Further Than You Think.

It could take you across campus, around town, or to the top of your favorite trail. Providing of course that you win one of eight Trek 930 mountain bikes. We’re giving them away to students smart enough to check out our Student Checking account.

This is a Real Deal.

There’s no minimum balance required and no service charge for the first 10 checks you write each month. You also get free use of our many HandiBank machines and your first set of 50 checks at no charge. You don’t even have to make a deposit to open an account. Just come in and sign up. And while you’re at the bank, you can sign up until September 18th for a chance to win a bike. And what if you don’t win the Trek Bicycle? You can still have one of the best Student Checking accounts around. And come graduation, there’s no telling how far you can go with your degree and our solid financial support.

Get Some Extra Credit For The Ride.

While you’re at it, give yourself a little extra credit with First Security’s new student VISA credit card. You’ll like the added financial clout and convenience. We make getting one so easy. There are no lengthy credit checks or long forms to fill out. So just pick up an application when you open your checking account.

Sign up for student checking and a chance to win a Trek 930 Mountain Bike today at any branch office.

Advisory committee to review gallery policies

By SALLY GILPIN
Arts/Leisure Editor

Under the direction of Hal Godwin, vice president for Student Affairs, SUB Programs Director Jim Rennie is forming a committee to analyze, enhance and encourage art within the Student Union Building, in partial response to complaints last semester regarding explicit nudity in paintings by artist Lisa Eisenhart.

"Complaints had an influence on the formation of the group because we have to be aware of the views of the public and deal with them," Rennie said.

"The committee, tentatively called the Student Union Building art committee, will be an advisory committee for the Vandanal Gallery and other art spaces in the SUB. They will discuss and make suggestions in three possible areas, according to Godwin and Rennie.

First, the committee will discuss appropriate uses of public space to display art, including deciding whether public space differs from an art gallery and deciding how the SUB space should be used.

Unlike a gallery, public space has limitations regarding the amount of nudity and other controversial subjects which may be displayed. If the public shows concern over material displayed in a public place then charges of obscenity may be raised. On the other hand, public showings have often been criticized for their conservative nature and lack of innovative artistry.

Second, the committee will comment on whether the SUB will show strictly student art or will also display work from the faculty and community. Rennie and Godwin would like to expand the gallery space to include sections of the second floor and individual conference rooms.

"I'd like to see more variety, things of interest to students, the university, and the community."

By M.L. GARLAND
Seattle Staff Writer

Grants from the National Endowment of the Arts to the University of Idaho are no cause for controversy at this point, according to Controller Gerry Reynolds.

Congressionally imposed waivers declaring that NEA-funding projects will not be used to support obscene art are signed in order for the university to implement the $15,000 Lionel Hampton/Chenow Jazz Festival grant and the $3,000 Auditorium Chamber Music grant.

"These are not the type of grants that create the controversy that's going on right now," Reynolds said.

NEA grants are treated like any other university contract and must be reviewed by the grants, department chair, college dean and the administrative research department to determine if it is in the university's best interests, program wise and technically, to accept them. Reynolds does not anticipate any problems with the grants.

The uproar over NEA-funding began in 1966, when a grant was used by photographer Robert Mapplethorpe to produce photographs of an erotic nature. The National Council on the Arts has denied grants to Karen Finley and three other performers who address issues of sexual politics.

Congress has required grantees to pledge that NEA-funding will not go toward work that "may be considered obscene, including ... depictions of sadomasochism, homoeroticism, the sexual exploitation of children, or individuals engaged in sex acts and which, when taken as a whole, do not have serious literary, artistic, political or scientific value."

However, the NEA adopted the vague U.S. Supreme Court definition of July 10th as a guideline. NEA-funding work must be applied to the average person's contemporary community standards and to obscene if it depicts sexual content in a patently offensive way as a whole lacks serious literary, artistic, political or scientific value.

Various Congressmen have made their views clear regarding bills they plan to propose during the session. Below are examples of both the extreme and moderate positions.

 Presumed excellent

BY JILL CHRISTINE BECK

Editor

It’s rare to find a movie mystery that can truly fool its audience. Usually there are at least a few clues thrown around for those really paying attention to catch on to.

Not so with the murder mystery Presumed Innocent. Throughout the movie a number of possible suspects are presented, and it’s easy to get fooled into the assumption that one of them is guilty. Each have some sort of motive, enough to make the viewer think he has unveiled the true killer...and enough to keep the focus off of the person who really did it.

Harrison Ford stars as Rusty Sabich, a prosecuting attorney wrongly accused of his lover’s murder. Throughout the film the viewer is overwhelmed by a sense of helplessness, knowing (or at least hoping) Sabich is innocent, but there is no way he is going to untangle the mess around him.

The film makes an excellent transition from a book originally written in first person...not an easy task, especially in a mystery story.

Ford gives a wonderful performance as Sabich, an emotionally-distanced husband drawn into a love affair with a beautiful co-worker. When the co-worker is murdered, he is assigned the case, but soon begins to realize that the clues he is finding point to him as a suspect. Political tensions in the office leave him without the support of his colleagues.

With the help of a skilled defense attorney and a friend in the police department, Sabich is able to continue investigating the incident even after he was charged with the murder.

The plot intensifies with each new clue uncovered in the case. And each new clue brings more confusion as the viewer continues analyzing each character to find the real murderer.

Presumed Innocent is one of the few quality movies to hit the screen this summer.

This semester, take some electives in communications.

Introducing AT&T Student Saver Plus.

This year it’s easier to get through college. Because AT&T has put together a program of products and services that can save you money.

Whether you live on or off campus.

You don’t need 60 minutes of long distance.

For free.

Movies. Videos.

And more.

For less.

Just by choosing any Student Saver Plus program, you’ll get 60 minutes of free long distance calls. You’ll also get a free coupon bookie good for savings all around town.

Call from anywhere to anywhere.

Well give you a free AT&T Calling Card, even if you don’t have a phone. So you’ll be able to do business from almost any phone and have it billed to you, wherever you live.

To enroll in the AT&T Student Saver Plus programs that are right for you, or to get the best value in long distance service, call AT&T. They might be the most profitable electives you’ll ever take.

1800 654-0471 Ext. 1231 AT&T Helping make college life a little easier.

GABRIELLE KERLIN  SKIDMORE COLLEGE  CLASS OF 1991

safety. Using a little common sense can make a big difference.
**McConnell House renovates**

There will be lots of activity at the McConnell House museum beginning next week. The Latah County Historical Society will close the Museum to visitors and researchers for at least the entire month of September while specialists remove asbestos from the attic and basement areas of the historic Moscow mansion. This process will be coordinated with the transfer of the Historical Society's offices, research collection and equipment to the Centennial Annex, located across the street from the McConnell House on Adams Street. Because the asbestos clean-up and move to new quarters are occurring at the same time, disruption to the public will be minimized.

During the asbestos abatement, crews will remove and clean all artifacts and objects stored in the attic and basement. Although the asbestos removal should be completed in a couple of weeks, the job of moving thousands of photographs, documents and records to the Annex will probably take over a month to complete. Already volunteers have cleaned, repaired, and painted the building in readiness for the move, and work is underway to build shelves and refinish the hardwood floors. When the move is complete, researchers will be able to enjoy working in a much larger space with good lighting and easier access to reference materials.

More room will be welcomed by volunteers who now do much of the work of cataloging new donations.

Plans for restoring the McConnell House include a turn-of-the-century kitchen, a maid's room, a bedroom that could have been Vaughan's, and a museum gift shop. These are part of the long-range plan to restore the facility as a house museum; and the Centennial Annex has been endowed by the Idaho Centennial Commission and the Latah County Centennial Committee as a lasting legacy of Idaho's 100th anniversary.

Volunteers are still needed to park, sort, and carry boxes across the street. Anyone interested should contact the Historical Society.

**Blues guitarist killed in crash**

By SALLY GILPIN

Arts/Leisure Editor

Stevie Ray Vaughan, legendary rock/blues guitarist died in a helicopter crash Monday. He was 35. Vaughan and four others including the pilot, Jeff Brown; Eric Clapton's agent, Bobby Brooks; bodyguard Nigel Browne and tour manager, Colin Smythe boarded the helicopter shortly after finishing a concert in East Troy, Wisconsin with Clapton and Robert Cray. The helicopter went down in heavy fog a short while later. There were no survivors. Vaughan, a two-time Grammy winner, gained popularity in the early 1980s for his Texas-style bluesy sounding rock. He and his band Double Trouble had a platinum album in 1984 entitled Couldn't Stand the Weather.
By CHRISTOPHER GATEWOOD
Staff Writer

The three time defending Big Sky Champion Idaho Vandals will battle the Montana State University Bobcats in their season and conference opener Saturday at 1:00 pm in the Kiddie Bowl.

Last year when these two teams met the Vandals gave up an early touchdown and then scored 41 consecutive points to dismantle the Bobcats 41-7, in Bozeman. Don't expect the same result this year. The Bobcats who finished 6-7 for a sixth place finish in the conference in 1989 should be much improved from last year.

Last year Montana State ran an option attack and primarily gained most of their yards on the ground. The Bobcat offense has had a major overhaul going into this season under the direction of new offensive coordinator Bart Andrus. Andrus was formerly the defensive coordinator at Humboldt State University in California.

“It’s very hard right now to prepare for this team,” Vandal Head Coach John L. Smith said. “We have no idea what to expect from them offensively, it’s all speculation.”

Whatever the Bobcats decide to run, they will be led by senior Quarterback John Terrault (6-1, 202), a four year starter. As a junior Terrault was 76 for 167 and passed for 996 yards and six touchdowns. He also rushed for 498 yards on 143 attempts and ran for six touchdowns. Terrault is also one of the teams best athletes. He runs a 4.5 in the forty, jumps 475 pounds with a bench press of 300 pounds.

“They are a tough quarterback,” Smith said. “He runs like a deer.”

Catching the passes at wide receiver will be senior Rob Stolz (6-3, 200), who is the leading returning receiver. He caught 26 passes last year for 312 yards and two touchdowns. The leading returning rusher besides Terrault will be fullback Rob Wilkinson (6-0, 200), who rushed for 430 yards and two touchdowns a year ago.

Defensively the defense should be the strongest part of the team. The defense returns nine starters and could have one of the strongest group of line backers in the Big Sky.

Leading the defense will be junior defensive tackle Cory Widmer (6-3, 250), who was a second team All-Big-Sky pick a year ago. Widmer was fourth on the team with tackles with 78 and led in sacks with nine.

“He’s probably as good a player as there is in this league,” Smith said. “They move him around a lot and try to do a lot with him.”

Leading an experienced group of linebackers will be seniors Rob Harch (6-1, 223), and John Skelton (6-2, 224). Harch was a second team All-Big-Sky pick last year and was second on the team in tackles with 92. Skelton, who will be a four year starter, had 86 tackles and five sacks a year ago.

Although they have a new quarterback, don’t expect the Vandal offense to be any different from what they have run in the past. This will be a pass happy bunch with plenty of fireworks.

“It will be typical Idaho, lots of passing,” Smith said. “But we do need to establish a running game.”

Leading the Vandals passing attack will be freshman quarterback Doug Naussime. Is he ready for the challenge?

Outdoor Program continues growth

By TOM BITHELL
Staff Writer

The University of Idaho Outdoor Program, now in its 17th year, offers students more outdoor opportunities and rental equipment than ever before.

The outdoor program consists of the outdoor center and the rental center, both located in the basement of the Student Union Building.

The outdoor center offers workshops, clinics, cooperative trips, and classes covering all skill levels for activities such as mountain climbing, backpacking, and rafting. The rental center provides top-of-the-line equipment for every aspect of those activities, ranging from Coleman stoves for camping to life-jackets for rafting.

Mike Beiser, coordinator of the outdoor program, said UI has one of the biggest outdoor programs in the Northwest. UI's rental center has nearly doubled the equipment of Washington State Universities.

"The rental center serves the largest population," Beiser said. "Over 7,000 people use the rental center a year. The demand has been going up every year."

In fact, Beiser said, the rental center had its busiest summer ever this year.

Thanks to the rental center's popularity, the program is entirely self-supporting. Since July the rental center has generated two-thirds of its $50,000 annual budget allotted by the ASUI. Because of the increasing revenues and success, the program will be able to expand into new areas this year.

"We got a $10,000 grant to try and get alpine ski rental started," Beiser said.

Beiser said he hopes to get 20 sets of boots, poles and skis for the rental center before the season starts.

In addition to the skis, the rental center is going to purchase some mountain bikes, hopefully by mid-fall, Beiser said.

The whole philosophy of the outdoor program, Beiser said, is to introduce students to recreational activities they can participate in for life.

"A lot of people think we have a great facility. We're in our 17th year of operation and statistically of the users of wildlands, research shows, 80% have a college degree," Beiser said. "This is an age when students are learning lifetime recreation. We're trying to introduce people in a safe and proper way."

DEFENSE

The Vandals face off against Montana State University Saturday in the Dome at 1 p.m.

By CHRISTOPHER GATEWOOD
Staff Writer

Defense: Line: Last year when two starters went down to injury everyone expected it to be a long year for the Vandal defense. However, two true freshman were inserted and filled in better than expected. The experience should give the Vandals an excellent defensive line this year. Leading the way at tackle is John Simon (6-3, 260). He had 49 tackles and six sacks last year and is one of the Vandals' strongest players. Joining Simon at tackle is sophomore Don Hunter (6-3, 360) who saw plenty of action as a true freshman last season. The defensive ends are good ones and could dominate in 1990.

Sophomore Jeff Robinson (6-5, 250), started nine games last year and is the leading returning sacker with eight. The other end is sophomore Billy Sims (6-4, 260), who started six games last year. Sims is extremely quick. Look for him to have a big year.

"Our defensive line is young but extremely aggressive," first year defensive line coach Nick Holt said.

Capable back-ups are Brian Correlli, who has switched to defensive tackle after starting at defensive end in 1989 until a knee injury ended his season. Tyler Finneman (6-2, 260), who was the scout team defensive player of the year last season, should see action along with former center Jake Sturm (6-2, 220).

Linebackers: This is where the Vandal defense is strongest. They have a solid group of veteran starters with very talented backups. Returning at outside linebacker is senior All Big Sky Conference pick Roger Cecil (6-2, 220) who led the team in tackles last year with 82. The other outside linebacker is senior Jimmy Lee Jacobs (6-4, 214). Jacobs lacks size but makes up for it with speed and instincts.

"I'm not worried about Jimm-

ny's size because of how much ground he can cover," linebacker coach Jim Senter said.

The starting middle-linebacker will be junior-college transfer Robert Meek (6-1, 235). He has been outstanding in fall practice.

The back-up is also excellent. Senior Mark Mathews (6-1, 227), is a capable back-up at all three linebacker positions. Damon Taggart (6-3, 223), who led the team last spring with 20 tackles will back up Jacobs.

Defensive Backs: The Vandals are loaded here compared to the line backers as they appear to have an endless supply of good athletes. Leading the way will be senior cornerback Charlie Oliver (6-1, 183), who was second in the conference last year with seven interceptions and was also runner-up for Big Sky Defensive Player of the Year.

"If Charlie has another year like last year the NFL is within the definite realm of possibility," Defensive coordinator Craig Bray said.

"I feel he is the best defensive player in the league and should be the defensive player of the year in the conference," Smith said.

Joining Oliver at corner will be junior Terry Green (5-11, 177). He had two interceptions in 1989 and will be pushed hard by sophomore Jeff Jordan (5-9, 170), who started 4 games as a freshmen last year. Other cornerbacks that will see time are senior Reggie Smith (5-7, 180), and Nox Ramsey (5-10, 170), who has moved over from safety. The starting safety will be sophomore Will Safie (6-0, 205) who is strong and a vicious hitter. He had an interception and valuable playing time as a freshman last season. The free safety will be senior Kiet McCall, who had a pair of interceptions in 1989. Pushing McCall hard will be freshman newcomer Josh Moore (6-4, 190) from Yreka, California, who has been spectacular in fall camp.

Please see PREVIEW page 14>
The first session of the clinic will be held in room B-2, from 6:8 p.m. The second session will be held at Wicks field at 4:45.

An official's clinic for intramural soccer will be held on September 12 from 6:8 p.m. in the Kibble Dome. Attendance at these clinics is mandatory in order to work this season.

**BIATHLON**

UI Campus Recreation is sponsoring the Hamme-rin' Cycle Moscow Biath- lon on September 12.

The race consists of a four kilometer run, a 25 kilometer bike ride, followed by another four kilometer run. Entry forms must be post marked by September 14 to assure competitors admission to the competition. Registration and race packet-pickup will be held on September 21 at 6:8 p.m. in the Kibble Dome.

For more information call the Campus Recre- ation at 885-6381.

**SOCCER CLUB**

The UI Soccer Club will hold a brief organizational meeting and open scrim- nage on September 4 at 5pm at Guy Wicks Field. Last year the club fielded two teams consisting of the Club team and the International team. The Club is scheduled to com- pete in the College Chal- lenge Cup tournament in Spokane, September 8-9. For further information contact Ron McFarland.

>MSU from page 11

"I'm not feeling the pressure that people probably think I'm feeling," Nonsense said. "I haven't played in a game in a year and I'm just real excited. I think our offense is really starting to gel."

On defense the Vandals aren't real big but maybe the fastest defense they've ever had. "We're quicker and older, especially in the defensive back- field," senior lineman Roger Cecil said. "Our defensive coach- es think we have a chance to be a great defense.

If the offense moves the ball and the defense can keep the ball under 30 points, Vandals fans should go away happy on Sat- urday.

In other Big Sky action Boise State hosts Stephen F. Austin. Montana travels to Oregon State and Weber State hosts Southern Utah State.

>PREVIEW from page 13

"Moore is exceptional and can cover a ton of ground," Smith said. "Don't be surprised to see him staring by the end of the year."

Other back-ups are red-shirt freshman Mike Denimore (5-10, 195) and Andre Wren (6-2, 200).

Kicking game: Returning as kicker will be junior Tony Doy- le (5-10, 175) who is already the all-time percentage leader in field goals in the history of Montana foot- ball. Last year Doyle finished 12 for 20, but made six straight to end the year. Returning at punter is senior Joe Carrasco (5-11, 165) who was fourth in Division I-A last year with a 41.8.

Outlook: Offensively, look for the Vandals to be potent as usual through the air; but the problem lies in the running game. A year ago the Vandals finished in the bottom half of the league in yards on the ground. With a new quar- terback it will be important for the Vandal line to open up holes for the running game, something they had problems with last year.

Defensively the Vandals can't finish seventh in the conference again because the offense can't be expected to score over 30 points a game. The defense needs to dou- ble last year's sack total and can't give up the big play, something they had a big problem with in 1989.

With a difficult schedule including games against Monta- na State, Boise State and Univer- sity of Nevada all on the road the Vandals will have a difficult time becoming the first team in the history of the Big Sky Conference to win four consecutive confer- ence championships.
