Chamber makes gay resolution

The Mason County Chamber of Commerce Board of Directors voted unanimously to request the State Board of Education consider adding the KUID production "Sweet Land of Liberty" on its agenda.

In addition, the Mason County Chamber of Commerce Manager, referred to the board as a "very, very long, complex meeting..."

Besides the specific reference to the KUID documentary, the Chamber also indicated "the whole thing is the Chamber of Commerce, adding that it is the only program currently on the KUID.

The chair of the KUID is another Chamber member.

"You can't imagine what the students would defend Mike Kink's rights as opposed to the first amendment," the chair said.

The Chamber of Commerce who wrote for the State Board of Regent's are to say any circulation of the documentary are "Jan Donley, the Executive Director of the House Foot, Edell Hinkston of the Mar. W. Nye Mahon of the Stall, Entry Directors of Frank's Fabrics, and Rick Helsing of Helsing Brothers."

Young against efforts to ban the documentary, John Slone, T.V., Jim Anderson of T.H.R., Edell Hinkston, and Brian Coonrod, the U of A academic vice president, were also listed as supporters of the documentary.

The reason for the list appeared related to the increased need for "homosexual" documentation by the board of Regents, in response to a federal mandate of the KUID.

"They had no discussion," the board of Regents said, "We will be busy by the guidelines for determining budget cuts and allocations for the 1977-1978 fiscal year. Hence, there is concern among education experts regarding the need for comment on Tuesday, April 6. The list represents the general education budget cuts of two groups of regents for purposes of "support" programs was also "administratively," it places these programs working the land grant function of our university, including a list of the best papers.

Priority 1. Included are: the colleges of Agriculture, Engineering, Forestry, Wildlife, and the Range Sciences (WILS), and the Idaho Water Resources Research Institute, the Idaho Agricultural Experiment Station, and the Department of Agriculture.

Priority 2. According to the list, includes "programs in agricultural research and extension," other than above, assigned "in a manner consistent with the mission of the land grant institutions.

These are the College of Agriculture, the College of Engineering, the College of Forestry, the College of Veterinary Medicine, and the College of Human Ecology.

The board of Regents put forth an amendment, "We will consider the request for the inclusion of the Idaho Water Resources Research Institute, the Idaho Agricultural Experiment Station, and the Department of Agriculture."
CHARLIE BROWN
Survival in Moscow

Animals are not as ignored as we sometimes feel. The common groundhog, in fact, would have had nowhere, especially in the western United States, to hide had it not been for groundhogs. In many parts of Asia, groundhogs have been hunted and eaten for centuries. This is not to say that groundhogs are not eaten today, but they are certainly much less common than they used to be. The groundhog is a small mammal that lives in burrows and feeds on grasses and other plants. It is a common species found throughout the United States, and is often considered a pest by gardeners and farmers alike. When the groundhog is not eating grass, it sleeps or hibernates in a deep state of rest.

WATER NEEDLE

Symptoms include abdominal pain, rectal bleeding, diarrhea, and general malaise. Along with a cup of coffee to slow down the peristaltic action, we get to a hospital and an x-ray...

Students newly appointed to ASUI committee posts

The Senate of the Associated Student of the University of Idaho, meeting Thursday in the Old Senate Chamber, announced the appointment of three students to fill two open seats on the student government.

Newly appointed were Andrew Baust, a senior majoring in business administration, who was appointed ASUI secretary, and Leslie A. Brock, a sophomore majoring in psychology, who was appointed ASUI treasurer.

BRENNER, who owns several produce houses, said that many of these farmers have a hard time convincing tenants to buy produce from the farmers markets because they offer a variety of fruits and vegetables that are not available in the supermarket. "They have to convince people that the produce is of good quality," she said. "But they have to convince people that the produce is of good quality."
**Job prospects are looking better**

by THOMAS MCINTIRE

A recent national survey of job prospects in various fields shows that women are growing in demand faster than ever before. The trend is especially pronounced in professional and technical fields.

In a survey of 125 colleges and universities across the nation, the College Placement Council found that occupational opportunities are up in all fields for women. However, the survey also shows that women graduating within the past seven years have received only 37 percent more job offers than men, and that 14 percent fewer new jobs have been filled by women in the past two years.

Women graduates are in high demand, and they are top choices in many fields, according to a survey of employers. Women are particularly in demand in law, business, and medicine. Women are also in high demand in areas like engineering, accounting, forestry, and education. Women also are entering more careers in administration, athletics and freelance work.

"Women are becoming more important in many areas, and they are becoming more important in these areas," said Ms. Frank. "The trend will continue to increase because employers are under pressure to hire more workers." Ms. Frank said that in 1960, when the placement center was started, students were the center of the placement effort. Now, however, it is the women who are being trained to fill the jobs.

Another trend is becoming apparent, according to Ms. Frank. "Women are also in high demand in fields that have traditionally been dominated by men. This is especially true in engineering and education and elementary education.

Ms. Frank cited the example of a placement center at a certain university, where she worked. There, 70 percent of the new placements were for women. She said that in 1960, when the placement center was started, students were the center of the placement effort. Now, however, it is the women who are being trained to fill the jobs.

**Idaho’s “Mr. Chemistry,” Malcolm Renfrew**

To conclude two-decade academic career

The state’s most honored professor, according to Dr. Malcolm Renfrew, is a professor of the Department of Chemistry. "Mr. Chemistry" is the title he has earned over the past 20 years by his students and colleagues.

"I began teaching here in 1956," said Mr. Renfrew. "I have been teaching chemistry at this university ever since then. I have also been involved in research, and I have served as department chair. I have been very happy to have had the opportunity to work here for so many years."

Mr. Renfrew is a member of the American Chemical Society, the American Chemical Society’s Division of Organic Chemistry, and the American Chemical Society’s Division of Physical Chemistry. He is also a member of the American Chemical Society’s Division of Inorganic Chemistry.

Mr. Renfrew is a member of the American Chemical Society, the American Chemical Society’s Division of Organic Chemistry, and the American Chemical Society’s Division of Physical Chemistry. He is also a member of the American Chemical Society’s Division of Inorganic Chemistry.

PAYNE
"Vandal Action"

An award winning, highly productive student at the University of Idaho named Mark Payne of Moscow, Idaho, was recently the object of an investigation by the Federal Bureau of Investigation (FBI) in connection with the so-called "Vandal Action".

The investigation centered on the activities of a group of students who had organized a "Vandal Action" to protest the university's policies concernig the use of school colors.

According to FBI agents, Payne and his co-conspirators had planned to disrupt a university football game by painting the field green and gold, the university's official colors. The plan, agents said, was to be carried out in conjunction with a student rally scheduled for the same day.

The investigation is ongoing, and no charges have been filed at this time.

SUE MCBRYANT
Tomorrow's election: a big nothing

Staring a season as I plunge through the list of uncharted and faculty candidates, I can't help but wonder what the future holds. Nothing is certain, no one is guaranteed anything. But we must move forward.

I am the only candidate that is running for the open position of Student Government President. I have been involved in the university community for several years, and I believe that my experiences have prepared me well for this position.

I have worked with the university administration on several projects, and I have a good understanding of the issues facing our community. I also have a strong commitment to the university, and I believe that I can bring a fresh perspective to the position.

I would like to see the university's budget expanded to include funding for student activities and programs. I also believe that the university should be more involved in the local community, and I would like to see more opportunities for students to participate in community service projects.

I am running for office because I believe that I can make a difference in the university community. I am confident that I can bring the energy and creativity that is needed to move our university forward.

SUE MCBRYANT

$300,000 got misplaced

The only highlights in the normal activities of the university administration is the annual budget presentation. This year, however, the budget was unexpectedly smaller than anticipated.

The budget was originally estimated at $300,000, but due to unexpected cuts, it was reduced to $200,000.

The administration has been working hard to ensure that the university can continue to provide quality education to its students. However, the budget cuts have forced us to make difficult decisions about how to allocate our resources.

Despite these challenges, the university is committed to providing a quality education to its students. We will continue to work hard to ensure that our students have the opportunity to succeed.

IDAHOK RACONNUT     April 27, 1976
CHRIS JOHNSTON—Living group: University Business, Special Committee: Outdoorsmen.

In my opinion the major decision facing us as a student body is whether or not to have a student voice in decisions which are directly ours. Although I am an administrator, I am more concerned with what a person chooses. I want to know how you have chosen.

Every time there exists a double-student. Students, administrators, faculty, all have a job and something else to do. I want to see something done properly, and to do it efficiently.

I have been in the university for 4 years, and I think I have a lot of ideas. Instead of just sitting around, I think administrators, students, and faculty should work together to solve the problem. I think there is a lack of communication. The students aren't getting the proper information, and administrators aren't hearing the students. I believe that the students have a right to have their voice heard. I believe there should be a decision made by students.

I am running for Senator because I believe there are many things wrong within the university. I think we need some new administration. I believe that the university is not run efficiently. I believe there should be a decision made by students.

SUE MILLER Living-group Alpha Gamma Delta, Major: American Studies, Special Committees: SND Committee

I would like to see more student involvement in student government. One way of achieving this is to make sure the student advisory board which would work with the Administration and the community, is accessible to all students. I would like to see more communication between the students and the Administration, thereby trying to eliminate the feeling that the campus is too small where the students would like to see that money spent on the programs which they would like to see more.

ROD MENDOKA Living-group Delta Tau Delta, Major: Business Management, Special Committees: Project To People Committee

I feel that the events that the students the most is the building. The campus needs to be cleaned up in the time. This is the funniest event to be cleaned up, the Hall of Fame and other events needs to gather the information, report both to the administration as well as to the students. Then the decision that the committee can be made.

In addition, in Blue Mountain, I do not know the student life. But I do know the ASUI. However, I feel that the ASUI needs to be more funded in necessary. I feel that we need to take a long hand in Blue Mountain and all the present way is not to create the student world. I feel that is not present what the students want.

MARC LUNDGREN Living-group Phi Gamma Delta, Major: Ag. Econ., Minor: English, Special Committees: ASUI Senate Committee, Government Operations, Appropriations Committee, SND Policy Committee, Farm Income Contests

Last year I promised to work toward a better relationship with the administration and the community, and I have helped to make this relationship the very good working relationship it is today. This year I am being subjected to the Athletic Board and the Housing Board which were proposed in the fee increase proposal. By using these two boards, the student would have more say on the matters upon which the student needs to operate.

The full-time student should have the right to the balance by the end of April. The students can use the money when the money is available and not going to any other store which can be played on the most.

The HP-25 Just $657

NOW.
Complete Scientific Programmability from Hewlett-Packard for $30 less than ever before.

Think of the HP-25 as an electronic slide rule you can program completely. The reason: It solves repetitive problems easily and quickly.

Here’s how Switch to RPN.

Enter the keystrokes you need to solve your problem once and then flip the PRGM switch to RUN. The only thing you have to do for each operation from then on is enter your variables and press the R/S (Run/Stop) key and start to solve.

The result: Repetitive problems are no longer a repetitive problem.

But that’s only part of the HP-25 story. There’s more. You can add it, check it, or edit your programs at will. You can also write over-second interruptions into your program in case you want to refine intermediate answers.

And because the keys on all hybrid functions are also included, the storage memory can actually store up to 147 key strokes. How’s that for a remote control? Moreover, you can store numbers in eight data registers and perform 12 programmed functions and operations (log, log, mean, deviations, rectangular polar conversions, summations—you name it) to mention RPN logic, decimal and scientific and engineering conversions. And much, much more. If you're interested, I'll be happy to answer all your questions.

And don't forget the built-in new ASUI Senate

WASHINGTON—Women outnumber men in the next quarter-century, but they've got a long way to go before they attain educational, economic and occupational equality with the opposite sex, a major Gallup-Baker study of women and men in America shows.

The study shows women constitute 51.5 per cent of the population, against 48.5 per cent a quarter-century ago. Women are slightly older and more numerous, and have gone from a sex-ratio high-fertility rate in the late 1970s on all these counts.

The income differences between men and women remain substantial. In 1975, the median earnings of women was $5,772 compared to $13,385 for men.

Ford asks for missile money

WASHINGTON—President Ford asked Congress Monday to appropriate $352.1 million to continue production of Minuteman missiles and to begin construction of a new and larger nuclear weapon.

The President's request, representing a change in missile procurement policies, would allow production of about 60 additional long-range Minuteman II missiles to bring the total production of the missile to 1,063.

The 69-year-old Brezhnev, who approved had been vacating in the Kremlin, did not address the 6,000 banner and shoe buttons at the Russian Palace Congress.

If Brezhnev had not amended Lenin's 100th birthday celebration, subservient superpower would have been given to present performers in the West that the party leader is raising.

Army has accounting failures

WASHINGTON—The Army said Thursday it is implementing four new financial management systems and increasing the total paid for personnel by $30.3 million.

The new systems were caused by failure to meet inadequate control and financial accounting in required by recent legislation.

Army officials are said it is possible that discrepancies of $50 million in 1977 and $64 million in the 1978 budget may have been brought on by the basic lack of supplies to Vietnam. The resulting accounting system was incorrect because of accounting systems, equipment, and costs.

Small businessman selected

BOISE, Idaho—A Mampa man was named Idaho's small business man of the year Monday in the semi-annual meeting of the State Director's Advisory Council to the Idaho Small Business Administration.

Loin Helman, a concrete block manufacturer, received the honor for building his Western Block Inc., from the small and local-operated general store that the Idaho Concrete Products Association, in the grate of the Western Idaho Chamber, and five others including 75 employees.

Another HELM was cut from the university support for the University of the Boise College. The Boise will continue, however, due to a federal grant of $150,000 and $32,000 in additional matching funds.

Although Dr. Hill said she was interested in the impressionism, she was not sure she would accept the invitation.

"I'm very interested in the impressionism, but I'm not sure I would accept the invitation," she said.

"We're going to have to talk about the future of the services, rather than the past," she said.

"I'm not convinced that the direction being made on budget cuts are being made with the full back in mind. I really think that there are areas where the cuts can be made," she said.

On the question of the future, she said, "We're going to have to talk about the future of the services, rather than the past," she said.

The total of 3,956 students were said to be the lowest number of students to ever be held by the university, as of last Thursday.

"Silver and Gold" scrimmage is this Sat.

The annual Silver-Gold Bowl contacts will mark the end of spring football drills as U of Idaho prepares to hand over its schedule in July. The 1976 Defense is set for Idaho’s first intersquad Battle with the Big Sky rivalry, facing each other in the sport of football.

A week ago, two women qualified to tryouts for the Idaho State women’s track team, with one being out for the Big Sky season.

The week’s two games more players against men’s team to win a potential title. The Idaho State women’s team is eyeing the Idaho State trip.

"Scottie Stahl is our afternoon leader," Stahl said. "Her average is 63-50. Her rehab seems to be on track.

The women’s team is an experienced group, averaging 60.5 this year on the track.

The U of I will take part in the matches which will begin on Friday, April 10, and end through Sat., May 1, at the Elko Stadium. Out of 12 teams are expected to enter.

Coach Burnie Stahl’s squad will be among teams from the Northwest, meeting at the Northwest Regional meet, for the Western College Football Pole. The Idaho State’s pool will also be entered.

"We have shown improvement each week," Stahl said. "The week’s goals helped us improve this week.

Coach Burnie Stahl’s squad will be among teams from the Northwest, meeting at the Northwest Regional meet, for the Western College Football Pole. The Idaho State’s pool will also be entered.

"We have shown improvement each week," Stahl said. "The week’s goals helped us improve this week.

A year ago, two women qualified to tryouts for the Idaho State women’s track team, with one being out for the Big Sky season.

The week’s two games more players against men’s team to win a potential title. The Idaho State women’s team is eyeing the Idaho State trip.

"Scottie Stahl is our afternoon leader," Stahl said. "Her average is 63-50. Her rehab seems to be on track.

The women’s team is an experienced group, averaging 60.5 this year on the track.

The U of I will take part in the matches which will begin on Friday, April 10, and end through Sat., May 1, at the Elko Stadium. Out of 12 teams are expected to enter.

Vandals split games with Portland, Portland State

The fire that was pitching.

The annual Silver and Gold football scrimmage is set for this weekend in the Folsom Field complex. Several of the athletes will face off against each other for scholarships. Students senior and junior will be invited to watch.

BHS:

With the weather being so poor, the game was rescheduled for Sept. 25.

The game will be played at 1:00 on.

Idaho Ms. bowlers among twelve teams at nationals

Defending national champion WPIA State in 1988 was 13-1, while this year, the team was 6-0-0. The team is the 12th seed, seeded for the second annual women’s collegiate bowling championship. To be held at Missouri State, Columbia, Mo.

Vivas and his wife, Dr. John Vivas, will handle the national’s championship with 12 teams entered.

Juniors Joe Jose, running a point in the bowling championship in 1988, will handle the national’s championship with 12 teams entered.

Walt Whitman comes to life

Alexander Scourby, well known actor of stage, film, and television, will portray Walt Whitman's "America" at the University of Idaho Performing Arts Center at 8 p.m. Wednesday.

Scourby's dramatic presentation, the final offering of the UI Theatre Arts Series this season, is adapted from a 1950 theatrical production "A Whitman Portrait," directed by famous British Brook Ashton as "a powerful characterization."

Bringing alive the time and the man, Scourby's in-depth includes the poet's moving account of the assassination of Lincoln and the beginning of the Civil War.

A versatile actor and narrator who performs in all media, Scourby first appeared on Broadway in the 1930s, then reappeared in 1945 in "Hamlet," "Richard III" and "Henry VIII" at the Cort Theatre. Broadway roles include Rosencrantz in "Rosencrantz and Guildenstern Are Dead" with John Gielgud, the Father of Romeo in "Romeo and Juliet" opposite Via Hagen, Iago in "Othello" with Claire Kahn, and Antipholus of Syracuse in "The Comedy of Errors," with Donald Malm.

Scourby's most recent Broadway appearance was in the 1972 production of "The Late Christopher Bean."

For the past 20 years, Scourby has been Associate Dean of Students at New York University, and is currently an Associate Professor of English at the University of Idaho.

The combined talents of the Contemporary and Wind Ensemble will blend in concert Tuesday, April 24, at 8 p.m. at the UI Performing Arts Center. The concert will be conducted by Robert Schaefer, assistant professor of music and director of bands, and Ivanov, associate professor of music and director of the Wind Ensemble.
