Bill Trumbo was dismissed from the Vandal basketball program after three years at the helm of the men's team. UI Athletic Director Bill Belknap fired the coach on the basis of poor ticket sales, even though Trumbo believed the team would be a strong league contender next season.

President Clinton has confirmed that Habib is planning on attending the Borah program to serve as moderator. Habib, who is now in Washington D.C., returned last week to the campus where he was sent by President Reagan. Before that, Habib was in the Philippines on a fact-finding mission.

"I am planning on him being here and I am in the process of making arrangements for his trip," Owens said yesterday.

"He's been optimistic all the way through. He indicated that if he was going to be in the United States on March 24 and 25, he would be in Moscow, Id." he said.

In the event that Habib could not make the Borah, Judicial Kirp, resident fellow at the American Enterprise Institute for Public Policy in Washington D.C., would be the replacement.

She will be a participant in the Borah, however.

Rory Milly, deputy minister for foreign affairs and member of the Knesset (parliament) will replace Dan Mirski, member of the Knesset Israeli on Monday and Tuesday. Owens said.

Owens said the State Department will send a replacement for William Kirby, State Department special deputy for Middle East negotiations, who cancelled his appearance at the Monday-Tuesday night session.

"We're right now making arrangements to see if another deputy assistant secretary of state will be here," Owens said.

Owens said the three participants in Thursday night's Borah are people who have "been active in the peace process in perhaps a more local level than our participants during Monday and Tuesday nights. He said, "They'll make us a lot more aware of the issues discussed Monday and Tuesday by diplomats, journalists, etc." (See page 2 for the listing of Thursday night's participants).

"We have a lot of high-caliber people so we're really excited," Owens said.

As well as participating in the Borah, Habib and others appearing will visit UI campus. Owens said he has not made any schedule for classroom appearances yet.

"We're interested in making our speakers available to talk to classes so any professors interested should give me a call as soon as possible," Owens said.

"Quite often some of the more interesting discussions take place in a less formal setting, such as the classroom," he said.

In addition, films and videos about the Israeli-Palestinian issue will be shown in the Borah Theatre in the Student Union Building March 23 from 11 a.m. to 9 p.m.

Tuition measure dies

A bill to ask voters whether they want to legalize tuition for higher education students was defeated by the Idaho House last week.

The Idaho Constitution prohibits charged tuition and the defeated bill was a proposed constitutional amendment that could have legalized charged tuition. Under the bill, students could not be required to pay more than 33.3 percent of the total cost of their education, including instructional, building and activity costs, sponsors said.

The final vote on the measure, 49-24, fell seven votes short of the two-thirds majority needed to put a constitutional amendment on the ballot.

Evans signs tuition defining measure

By Matthew Foulke
Legislative Correspondent

BOISE, Idaho — Mike Evans may yet have an opportunity to vote on a lottery bill. The lottery bill being denied twice in the House of Representatives.

A referral was proposed Friday by a large group of legislators who support a public vote on the lottery question.

Sen. James E. Richt, R-Boise, as the spokesman for the group of legislators who support the initiative, said that it was time to "give the people of Idaho the choice." He said that many Idahoans have expressed their desire to vote on a lottery in Idaho.

He also noted that the majority of the legislators have supported legislation that would give the public the choice on the lottery issue. A large majority has prevented the passage of these proposals which require support of at least two-thirds of the members of each house.

The last lottery bill was defeated by five votes in the Idaho House last Wednesday.

Cyril Burt, R-St. Anthony, said, "we were not here to vote to govern the state by referendum. We have been here to study the issues and make decisions.

Gene Winchester, R-Kuna, said that a state lottery would recite the state's control over gambling on Indian reservations.

House rejects state lottery, but end route being pursued

The constitutionality of the referendum hinges upon two key parts of Idaho's supreme law, in Article III, Section 20 of Idaho Constitution it says "the legislature shall not authorize any lottery or gift enterprise under any pretense or for any purpose whatsoever."

In Article III, Section 1 of the Idaho Constitution people are guaranteed the right of a popular initiative when it says, "the people reserve to themselves the power to propose, adopt or reject any laws and make amendments to the polls independent of the legislature.

Sen. Reich believes that the initiative would be constitutional. "I believe the Supreme Court will say that the constitution prohibits the use of gambling as a form of raising money," Reich said.

Sen. Reich, who practices law in Boise, did not deny that this unique method of working around the constitution may face a legal battle if the initiative

Williams to become English department chair this summer

UI News Bureau

UI professor Gary Williams has been named chairman of the Department of English, effective July 1. Williams takes over from Professor Kurt Olsson, who has held the post since 1980. Olsson has requested reassignment to full-time teaching and research.

In addition to his responsibilities in the Department of English, Williams is a teacher in the UI's Honors Program. He is a Woodrow Wilson Fellow and winner of the Associated Students' Outstanding Faculty Award.

Williams has been a member of the UI faculty since 1978. His specialties include investigation of early American literature and the works of James Fenimore Cooper. He is a native of Billings, Mont. He graduated Phi Beta Kappa from Washington University in St. Louis, Mo., and received his doctorate from Cornell University.

The Department of English offers more than 3,000 students in composition classes alone during the academic year. With 21 full-time and 13 part-time faculty members, the department offers coursework in composition, poetry, fiction and drama as well as American and English literature.

Still waiting for FICA refunds

By Susan Burns
Staff Writer

The Social Security Administration is a step closer to refunding taxes that were deducted from full-time students' paychecks between 1979 and 1984.

Students, who are entitled to a total of $440,000 in refunds, still have no definite date to expect their checks, however.

Jeff Eisenbarth, UI payroll officer, said the Social Security Administration in Baltimore, which must approve the refunds, is conducting a check of the data before giving its approval.

"I don't want to say any given time that the refunds will arrive, because then people will expect it and may be disappointed," Eisenbarth said.

Several students expected the money at the beginning of the spring semester and had counted on it to pay student fees, he added.

Eisenbarth said he had hoped the Social Security office in Baltimore would give a blanket approval of student payroll records because the state's Social Security office in Boise had already completed a check on the past history data of each student eligible for a refund.

He said, however, that he believes the Baltimore office is now doing a spot check.

As soon as the refunds are approved, the payroll office will contact the 10,000 to 12,000 eligible students and former students. The office will use records made by the former student addresses and alumni addresses to notify the right people.

Current students will be able to pick up their refunds when they arrive at the payroll desk with their student ID cards.

The payroll office expects to be able to notify almost everyone eligible.

A federal audit in July 1982 revealed that the UI was still deducting Social Security payments from full-time students' paychecks after it was prohibited by a 1979 legislative act. According to Eisenbarth, the state Social Security office instructed him to make no changes in payroll policy until the audit had been contested.

He said the state office failed to notify him of the cancelled deductions until November 1984 when he immediately began the refund process.

Because of the communication failure, the payroll office now is responsible for six years of deductions refunds instead of three. Eisenbarth said the refund process was further slowed when the Baltimore office asked that the student record reports include another column of information and be done on a different type of paper.

When they returned the reports to Boise, they were lost in the mail. He said now that the Baltimore office has all the necessary information, and all that is needed is approval.

Forums on violence and America at WSU

A forum on the countries of Nicaragua and Honduras heads a list of events for Washington State University's Central America Week, which began Sunday.

The public forum "Nicaragua and Honduras: Military States or Democracies?" will be held Thursday at noon in room 214-216 of the Compton Union Building at WSU. It is hosted by the Advocates for Peace in Central America.

It will feature two Pullman residents who recently returned from a visit to the two Central American countries. The speakers are Carol Budd Smith, a nurse-practitioner, and Kenton Bird, editorial page editor of the Idahoan/Idaho Daily News. The pair will also be part of a 7:30 p.m. forum at the Kincaide House near the WSU bookstore.

Search for Peace in Middle East begins Thursday

This year's UI Borah Symposium, "The Search for Peace in the Middle East," with special emphasis on Israel and the Palestinian situation in general and the Israeli-Palestinian issue in particular.

This year's panel of experts include the Jordanian ambassador to the United States, His Excellency Mohamed Rumal.

Borah opening night participants

Participants in the opening night session of the Borah Symposium on Thursday are Dan Simmons, Middle East liaison for the Peace and Justice Division of Mercy Corps International; Father Elias Chacour, a Melkite priest from Beirut, Israel; and Amir Amrani Effati, a representative of the United Workers Party of Israel. Simmons, who just returned from a Middle East visit, will serve as moderator.

Legislative Bill Update

The following bills that affect student life and/or the university are being considered in the Idaho State Legislature.

- Senate Bill 1364: Defines tuition and fees. The bill was drafted by the Senate Education Sub-Committee on the Definition of Tuition. It seeks to define the fees currently charged at the university and colleges, in order to move the question of constitutionality of the charging of Institutional Maintenance Fees. The Governor signed the bill into law last Wednesday.

- Senate Bill 1245: Allows the State Board to grant tuition waivers for nonresident graduate students. The bill's passage will clear the way for reciprocal agreements with other states. The Governor signed the bill into law last Wednesday.

- Senate Bill 1339: Establishes a State Department of Higher Education with an executive officer called the chancellor of higher education. The chancellor, who is responsible to the State Board of Education, has in his service the presidents of UI, ISU, BSU and LCSC. This bill is in the Senate Education Committee where action is expected some time this week.

- Senate Bill 1336: Establishes a University of Idaho System of Higher Education with an executive officer who is the president of the UI. That officer would be called the chancellor, and he would be responsible to a new Board of Regents for higher education only. In his service would be the presidents of ISU, BSU, and LCSC. This bill is in the Senate Education Committee where action is expected some time this week.

- Senate Bill 1224: Extends the drinking hours to 2 a.m. and allows bars to be open on Sundays except holidays. The bill passed the Senate last Thursday by a vote of 26-10.

- House Joint Resolution 3: Amends the constitution to allow the charging of resident tuition. The bill has been amended to include matriculation fees and tuition as not being able to exceed one-third the cost of instruction. A change was also made making "cost of instruction" to "cost of education," thereby creating a wider definition of fees able to be charged. This resolution failed on the floor of the House last Wednesday by a vote of 54-34-1, seven votes short of the two-thirds majority needed for passage.

- House Joint Resolution 8: Amends the constitution to allow for a state run lottery. Failed last Wednesday on the floor of the house by a vote of 50-34-6, six votes short of the two-thirds majority needed for passage.

- House Joint Memorial 1B: Supports the Reagan administration's call for assistance to be sent to the "Freedom fighters" Contra forces fighting the government of Nicaragua.

- House Bill 458: Raises the legal drinking age to 21, extending the drinking hours to 2 a.m. and allows bars to be open on Sundays as of Oct. 1, 1986. The bill does not provide a grandfather clause for those who may be drinking legally now but who would be too young if the age is raised in October. The bill does allow people between the ages of 19 and 21 to continue serving, selling or dispensing alcohol in the course of their employment, this bill is in the State Affairs Committee and will likely not be reconsidered because House Bill 866.

- House Bill 519: Provides for a college student to be a non-voting member of State Board of Education. The bill is being held in the House Education Committee.

- House Bill 606: Raises the legal drinking age to 21, extending the drinking hours to 2 a.m. and allows bars to be open on Sundays as of Oct. 1, 1986. The bill does not provide a grandfather clause for those who may be drinking legally now but who would be too young if the age is raised in October. The bill does allow people between the ages of 19 and 21 to continue serving, selling or dispensing alcohol in the course of their employment. This bill failed on the floor of the house on March 7 by a vote of 39-40.

- House Bill 570: Raises the legal drinking age to 21, extending the drinking hours to 2 a.m. and allows bars to be open on Sundays as of Oct. 1, 1986. The bill does not provide a grandfather clause for those who may be drinking legally now but who would be too young if the age is raised in October. The bill does allow people between the ages of 19 and 21 to continue serving, selling or dispensing alcohol in the course of their employment. This bill was referred back to the Ways and Means committee yesterday.

The legislative information center phone number in the Statehouse is 334-2000. The Citizen's Alliance for Progressive Action provides a toll-free legislative hot-line. They will take your message on any issue and deliver them to your legislators during working hours Monday through Friday. That number is 1-800-426-7158.

The Idaho House passed a resolution supporting military aid to rebels in Nicaragua after heated debates on the threat of communism in the Western Hemisphere.

The vote was 64-15, sending the resolution to the Senate for action.

The Idaho Secretary of State Pete Connenus argued to the legislature to consider the resolution to pass a one-time fund for the university.

Sen. Norm Dobler, D-Boise, said that the university might gain more in the form of one-time expenditures such as the permanent building fund.

He said that he wished to work with President Gibb in prioritizing one-time expenditures for the university.

But members of the republican majority argued that military aid must be sent to anti-government forces in Nicaragua in order to prevent the spread of communism in Latin America.

Rep. Gene Winchester said that if sending military aid to Nicaragua is not enough, he would be glad to take up arms and help the "freedom fighters."

"I'm glad we have a president with the courage and the will to pull a hat to this (the spread of communism)." Winchester said.

Connenus said military aid must be sent to the Contras to prevent Nicaragua from becoming a center for drug trafficking, and to prevent massive numbers of pro-democracy Nicaraguans from entering the United States.

He indicated that he does expect an increase in the higher education budget to at least $55.5 million. Last year's appropriation was $28 million before the 3.5 percent budgetary holdback. Rep. Boyd, a member of JFAC, said that the university might gain more in the form of one-time expenditures such as the permanent building fund. He said that he wished to work with President Gibb in prioritizing one-time expenditures for the university.

Sen. Norm Dobler, D-Boise, said that the building fund budget currently being considered appropriately about $2 million to the UI library. She realizes the need in the library, but believes that the money would be better spent on laboratory equipment. The higher education budget is scheduled to be considered last by the JFAC.

The House supports Reagan's request for Contra aid

Ask any Navy pilot. It doesn't come any more thrilling than this. Landing an F-14A on the rolling deck of a carrier at sea is a challenge that tests the skills of both.

Navy flight training, Navigation, Aerodynamics, and Turbojet engines are taught along with the airtoair thrills.

Navy pilots and flight officers get down-to-earth skills, too. It's not a box camp.

College graduates get leadership and management training of a lifetime at the Naval Academy. It's challenge and responsibility of a lifetime.

You can't beat the rewards either. An excellent salary, accelerated benefits. And opportunities to move up fast.

Lead the Adventure is a Navy pilot or flight officer. And it pays good. Contact your Navy Officer Recruiter or call 1-808-327-Navy.
If you want potatoes...

Rep. Christopher Hooper, R-Boise, may have thought that there were no students in the House gallery last week when he took to the floor and said that UI students are not opposed to an in-state tuition increase.

Rep. Hooper, who attended UI law school last semester, told other legislators that there was no student response to a letter he wrote to the Idaho Argonaut saying that students did not help with the funding of the universities and should pick up the funding share proposed by the Legislature's poor record of support for education.

His low opinion of students became apparent when he told the House that all students are frugally aware of their problems. He said that if students disagree with him because they did not throw potatoes when he went to lunch in the Wallace Cafeteria the day the letter was published.

That may be how Rep. Hooper and his comrades in the Idaho Legislature behave when they disagree with someone, but that is not how UI students do it.

In the true spirit of intelligent democracy, students sought to answer his poor arguments with sound logic. But no answer from the floor of the House.

Rep. Hooper's claim that the students at UI did not respond to his letter is completely off base.

Within three issues of the publication of his letter, this paper responded in an editorial signed by last semester's editor, John Hecht, and also the current editor.

In that editorial, titled "It's an ill wind," it was pointed out that the problems of higher education are not caused by UI students. Last semester, UI's enrollment had more than doubled in the last five years. Most of this money has been used to support programs and expenditures which otherwise had been cut back. The increase was legal. It would be levied to fund these areas and more.

"But these fee increases have not produced a net gain for institutions. Instead, they have substituted for the constant-dollar decrease in legislative appropriations, " (Oct. 1, 1968).

In fact, the current editor of the newspaper challenged Rep. Hooper to a public debate on the issue. Rep. Hooper, who has been in office for five weeks and finalized the debate, would begin the discussion of legislative appropriations. The debate, during the legislative session, he should not be telling people that students are not opposed to in-state tuition when, in fact, they are.

— Douglas Jones

Winter sirs and spring haircuts

Spring is a season of rituals. Modern fertility ceremonies involve make-up instead of masks, and strutting to the rhythm of guitar riffs instead of drum beats, but the result isn't much different.

The old pagan rites aren't dead; they have just taken new forms.

But I don't really know much about fertility. I'm more of an expert on the mundane rituals of human existence, like making love and spring cleaning.

There is a peculiar color in the spring: winter thought patterns seem to fly out the window on the first warm day. A house that is a little bit stale and slightly cluttered but basically comfortable is suddenly irresistible, just because of a south wind and sunshine.

That first spring morning can fill a person with one thought, one drive greater than any human desire to eat, sleep or reproduce. Walls must be washed, rugs shorn, floors swept. The house must be cleaned, and cleaned now.

It's an inspiration so real and complete that it is the most little thing on earth to divine rebellion.

I've never experienced a feeling like that, but I've been in the way when someone else has. Human beings divinely inspired to clear are dangerous.

I generally leave the house and face a dangerous ritual of my own — the spring balding.

It's at least as religious as cleaning. Most spring haircuts I've received have been divine punishment for winter sins. When I was a young man, my brother and I had a crew cut. We didn't even know we were getting what we thought of it; he had a crew cut and it worked for him. Finally he washed his hair out, his aunt's parakeet landed on his head, couldn't get a grip and fell off. It hurt his feelings. Time for a change.

The next few years were the era of bowl cuts and the feared electric clippers. Our electric clippers were on the feeling edge of clipper technology. You couldn't see the blades, it just buzzed and the hair fell away.

But it had problems. I remember sitting in the red barber chair in our basement, the plastic apron like a noose around my neck. The clippers weren't working right, and my dad would clip, shake his head, say "Hrm" and take the clippers out to the bench.

Then he'd clip some more, then go back to the workbench. By the time he had the clippers back in working order the hairline on the back of my head was about five inches above the collar.

That made me quite popular at school the next day, of course. High school brought relief from the balding cuts and the dreaded clippers, and my brother and I reacted by going for the long, and snugly, look. It was pretty good as revenge against our parents, but I don't think it helped win friends or influence people.

Sometimes between then and now I've debated getting a one-sided haircut, if for no other reason than to avoid the long one-

sided schedule. When I first arrived in Moscow, before I landed a lucrative job with the Argonaut, I couldn't afford the more established salons, and was stuck with a center part down to my college.

I'd go in, put down my three or four dollars and wait for a student who looked like she had come straight from seeing the Rocky Horror Picture Show for the 4th time running at my college, and apron, and think of my sins. I think only one of my haircuts there actually got a student kicked out of school, but I'm sure some others came close.

I'm happy to report that things are easier now. I frequent a salon where one of the four beauticians is actually fairly normal looking, and she has done a good job upon occasion. It's still not easy.

I'm psychologically unable to call ahead for one of their appointments, especially since the business includes hours for contemplating the horrors of a haircut. That means I have to take chances on getting the one person I trust being stuck with one of the frustrated punk rockers who also work there.

But no matter how bad the result, I love having a good, and paid for, and my sins, and I've gotten out of spring cleaning.

letters

Don't play God

Dear Editor,

In response to Karen's letter responding to Linda's letter, I am a little surprised at Karen's tone of play God by having her "personal freedom to express my own opinions. The issue in question here is not an issue of biological fact, but interpretation of those facts.

I resent the imposition of your ideas and others’ opinions on my ideas and attitudes.

Although I may not agree with your ideas, I am not (as you call it) "playing God" by trying to make you see things my way.

No one has the right to do so, and I don't know about you, but I don't want anyone telling me what to think. I'm not trying to change anyone's mind. I just want to protect my own right to express myself. Karen has the freedom to express her own freedom of thought and action (as guaranteed in this country's constitution) but would it be a reality?

I hope that women in America can continue to make their own little decisions like this means sitting for hours contemplating the horrors of a haircut. That means I have to take chances on getting the one person I trust being stuck with one of the frustrated punk rockers who also work there.

But no matter how bad the result, I love having a good, and paid for, and my sins, and I've gotten out of spring cleaning.

A bigger threat than AIDS

Victoria Seoer
Columnist

Even being as sheep themselves, some rise from the ashes, and stand atoned. W.
Wendt, in Argonaut with that. Institute, that grades. From time homosexuall
the security education's once we imcal and pa-
The last is an offering more deadly than AIDS. It's called homophobia. And to the health of a society, it's very destructive because it's symp-
tomatically of great cost just to any task, but all kinds of persecution. That's the real lesson.

To allow people the right to their own lives doesn't mean we personally approve and copy all that they do, but it does grant us each the freedom to think and to be a person, the color of a person's skin is not a barrier to friendship. A person's religion doesn't have to predominate his contributions to socie-
ty. AIDS is not a threat to humanity.

What I record from is sheep in wolves' clothing, and people too blind to see the difference.

The unmentionable epidemic

Dear Editor,

In response to Holly Bickerton's comments regarding the upcoming Honors Day Convoca-
tion at Idaho State University, I think you very much, Ms. Bickerton, for laying to rest the issue of promiscuity that is further promoting the stereotype of college students as raving but animals in search of the next party.

Even in the best of all possible worlds, some students do care enough about their classes, grades, and this university to attend a ceremony on a (gasp?) Friday afternoon honoring academic excellence. We are, after all, students through faculty and academic failure. Far be it from the Faculty Council and others who planned this ceremony to deprive you of the most urgent beckoning of alcoholic beverage on a single afternoon out of the entire academic year.

Honors Day, April 11, will be very unique and special day for the many students to be recognized, along with attend-
ning faculty, administrators, and waiting parents. It's too bad that the event could not be marred by such callous and ignorant standards.

I recall with amusement when the AIDS Senate was up in arms over me talking about AIDS, and then expressing the hope as a member of the Senate truly interested in the disease as a whole that our representatives would think that the UI was simply a "party school." With comments such as those issued by Ms. Bickerton, there is no way that the leaders we are supposed to elect would think of themselves as a "party school." And if you think of the disease as a whole, it is abundantly clear that the Senate has a lot more to learn about AIDS than gays do.

Dear Cheever,

Leave abortion well enough alone

Dear Editor,

In response to Christopher Westmoreland's letter, I would like to commend him on his expertise concerning the facts of fetal life. Just when I thought abortion was an ethical and medical issue, issue, issue, it made clear that we all have an ethical and scientific point of view of a fetus. He also said a fetus is capable of surviv-
ing (outside the womb). I am informed he meant it. I was wrong. Why, then, is the human gesta-
tion period 9 months? Does it spend the remaining 4.5 months growing bigger, or does it begin developing its person-
ality and consciousness, the mysteries of the universe? It seems to me a baby is not ready to be born until 9 months when it is ready to develop fully, but independently, as a completely human being.

I don't deny it is living, nor do I deny its potential. It's just nearly all the way that parents plan and provide for in preparation and the process to conception to birth and all the conditions. After all, you perhaps think of the feelings of the person who is loved with a choice she will have to live with the rest of her life. Many unwanted, unloved, abused, and neglected children are cute as babies, but grow up to be those who need welfare, who receive your support, who are rejected by you. This is an issue of the end of life. We all pre-
fer to be so holistic and "morally" when this issue pops up. Realistically, do you think mankind is at night worrying about the personal decisions others in the world are making?

Estimation is the most dramatic event in a woman's life and she is ultimately the on-
ly one affected by it, not you, effect on the next generation. The woman herself, according to the data, is Keyboard, had sex with other persons, is satisfied with the amount of love she receives. It is time that we reject the role of the only solutions to our troubles, but rather accept-
ance of different ideologies and people's rights to do what's best for themselves. I am a step closer to giving us all a peace of (mind). Instead of rude, profane, noxious words and combat, it is a love and desire to bring all cultures together.

The virus, as you have pointed out, is spreading rapidly and infecting at least 300,000 Americans will contract AIDS. The virus of the strain that is spreading is the one that is spreading from infected women to man in woman. A possible method of transmission is thought to be the woman's body's blood that can be seen in her vagina from either her menstrual period or an infected penis.

In the United States, the average cost of treatment is $147,000. This cost is usually borne by the state and federal governments. Therefore, treatment for the 300,000 future AIDS pa-
tients could cost us, as Americans, $42 billion in 1996. In spite of these facts, Congress has allocated only $238 million for AIDS research for the 1986 fiscal year. More alarming, the President's 1987 proposed $500 million AIDS research budget asks for $1195 million. $43 million of the President's AIDS allocation.

Many of our nation's leaders are afraid to confront the AIDS challenge for fear that their own sexualiti-
ety and morality might be questioned. The "epidemic of fear" that AIDS engenders includes fear of being stigmatized or AIDS or openly helping AIDS victims.

We must ask our elected officials to enact a massive AIDS public education campaign. Presently, education is in the best vaccination. Also, we must ask this Administration and Congress to have the fiscal wisdom to allocate a large chunk of the $42 billion AIDS budget.

By acting with courage in the face of the AIDS epidemic, we will prevent the lives of millions of newborns and adults from being lost. Furthermore, we will prevent those who have yet to be born from being left behind. It is a great time in which we can steward the future of new lives.

Grey slugs at night, still alright
Grey slugs in morn, barefeet be warned

By UI News Bureau

Slugs — Yuck.
As the weather warms up, slug eggs are hatching all throughout Idaho. Soon they will be among us again. But all is not lost, said Hugh Homan, UI College of Agriculture extension entomologist. Our resources are vast.

"Slugs are not really classified as a major pest to commercial growers in the state. In southern Idaho they tend to thrive in irrigated yards and gardens due to the consistent abundance of water. But nothing is truly a pest until it affects you. When you walk out on the patio in your bare feet in the morning and step on one, you’re affected."

Homan stands up for the rights of insects, but acknowledged that there was little to say positive about the little slimy creatures.

"It is difficult to say anything good about slugs. They are important in aiding the decomposition of matter," he thought for a moment longer. "They’re good goose feed."

There are three kinds of them in the state. The small grey slug is the most common one. The large spotted slug can be up to four inches long and the greenish black European slug can extend to six inches.

Slugs will damage just about all vegetative material in gardens, cold frames and greenhouses, rasping off the surface of leaves and seedlings with a tiny horn. Because they are nocturnal and come out of hiding places at night, slug trapping is difficult. But they do leave an infamous and easily noticed trail. It is made up of mucus.

"Slugs require high humidity so they are found under boards and logs, in cellars, springhouses and rock piles. Along foudations and in damp refuse and compost piles during the day," Homan said. "At night the slugs travel on mucus trails they secrete and this route can be seen the next day, making it possible to find their hiding places so you can know where to treat or destroy habitat."

With a wet and fairly mild winter behind us, slugs should be popping out all over this spring, said Homan. But people plagued with slugophobias can rest — there is one positive side. The creatures only get to live for one year.

Cavannah’s PALOUSE CONFERENCE SPECIAL

Cavannah’s has a special offer for your 1986 conferences. Plan your conference with Cavannah’s Motor Inn, Moscow, and receive:

• Complimentary Meeting and Banquet rooms.
• One complimentary jacuzzi suite with each conference (minimum of 15 rooms required)
• Special, flexible conference rates
• 10% discount on all conference banquet events (hospitality functions not included)

Cavannah’s specializes in conferences and banquets for up to 240 persons. We pride ourselves on our flexibility and creativity in providing you with individualized and personalized service. With Cavannah’s General Manager and Catering Manager involved in the planning, your conference is sure to be a success.

Call Cavannah’s General Manager, Todd Bailey, at 882-1011 or 352-1613 for details and to reserve your space now for 1986.

Remember this stuff! Hopefully walks like this down Hello Walk will not come again the rest of the semester. Photo Bureau/Randy Haynes.

Women’s March programs

"How to Speak Car" and a presentation by a Seattle-based artist head the list of the March programs at the UI Women’s Center.

Notly Schmidt, a Moscow Business woman and a seller of automobiles, will discuss the "how-its" of buying a car today at 12:30 p.m.

On Wednesday, from 3 to 5 p.m., artist Sarah Trofimov will give a slide presentation depicting what she terms her political and spiritual growth. Trofimov, who has several works on display in the Washington State University Gallery, centers her work on female mythology.
OLAY OUTDOOR PROGRAM 1986

Palouse Triathlon: A physical challenge for the fit

By Chris Schulte
Sports Writer

With warmer temperatures of spring, hearts begin to turn to the activities of summer. The days on the beach or at the lake working on the tan are approaching very rapidly. Before those days, though, comes the agonizing job of shedding those extra pounds one has put on during that long, cold, dreary winter of sitting in the house studying or watching the tube. Many have found that the quickest and easiest way to do this is to take up the sport of jogging or running, depending on one's pace.

For those people who are just looking for a way to fit into last year's swimsuit or tennis clothes, running is great, but for those who are up for a real challenge, the Triathlon could be for them.

When the Triathlon gets mentioned many people immediately think of the crazed lunatics over in Hawaii who compete in the Iron Man Triathlon. This is the Triathlon of Triathlons where the competitors swim 2.5 miles, bike 120 miles and then conclude with a complete marathon of 26.2 miles.

For the more civilized members of the UI student body and faculty, the Intramural department is offering its second annual Palouse Triathlon. This competition will consist of a 1500 meter swim, 40 kilometer bike ride and 10 kilometer run.

According to Intramural director Deb Norum, the race had over 100 participants last year. "We're hoping for a good turn-out this year also. There will be divisions for teams and individuals, and merchandise prizes to the winners," Norum added. Norum also mentioned there will be divisions for individuals or for teams. If you feel you could handle a leg of the race, go out and find two friends to take the other parts.

With the race scheduled for April 19th, time is short, so the most important thing is to get started right away. Women's track coach Scott LorcK added some words of advice to the runner or athlete just starting out, "The most important thing is to go into the training with some well defined goals and to have fun. The most important thing about fitness is to make it enjoyable," LorcK said. "It's important also to take it slow and not expect too much too soon," he added.

With this event as a goal, it will also make the exercise easier to do. With the conclusion of the Triathlon then it will also be easier to continue an exercise program right into the summer months and make the body you have something to be proud of on the beach during the dog days of June, July and August.

Entries to the Triathlon are available in the Intramural office in Memorial Gym. The cost is $10 for individuals and $30 for teams.

It must be spring because.....

By Lance Levy
Sports Editor

Back in January there was much talk that spring would be late, but now it seems as though spring has come and gone. Next year we will have had some to believe that the harsh Palouse winter is over. How wrong they were.

One day during that warm spell, I saw a fellow student on campus dressed in shorts and a t-shirt, and I remarked, "Don't you think you're being a bit optimistic?" He reasoned that if he donned spring wear, surely spring would arrive sooner, right? That evening temperatures fell, along with about six inches of snow.

At that time, the bright Palouse once again became the dreary, cold wintry land empire. Students appeared dressed in woolies and Gore-tex, while the baggies and sandals were mothballed. Sales of hot chocolate and snowmades rose, and bike racks were filled with Old Man Winter had returned.

But as quickly as he arrived, the old man up and left us again. For good? I'm sure we all would like to believe this. I don't really miss the guy. And there are signs all over campus telling me that spring is here, perhaps not on the calendar, but in spirit.

Students playing Frisbee-Golf outside the PEB where just weeks ago there were sled tracks, the UI boys of summer playing pepper at Wicks Park; softball teams practicing for upcoming Intramural play; Hacky. Sackers standing in the UC between classes; and all those multi-colored shorts and risque skirts that were stashed away are being brought out of its Flight and into the visible eye.

I've also noticed a change in people's state of mind as we welcome this spring. Temperatures can be cold, gray days of winter often have a numbing effect on our social being, a way are forced into drastic measures to stay warm. As spring brings the flowers to bloom, it can also melt our negative feelings and instill life.

Sure, we are now halfway through this semester, spring break is behind us, and we're stuck here until mid-May. You know the feeling, when you have to drag yourself to your late afternoon class as your cohorts are heading to Boyer Park. And maybe the professor will have a heart and hold class outside, or cancel it outright. New.

OUTDOOR PROGRAM 1986

Outerwear: ‘roughing it’ with style

By Christine Pokuha
Staff writer

You can sweat all you want playing tennis, running or cycling and still look good this spring. Last season sportswear merchants are getting in the latest and sportswear for spring and summer. ‘86. "When the truck comes in, we can’t wait to rip the boxes open and see what has arrived," Lisa Kaiser, Sunset Sports sporting goods manager said. "We are getting in a lot of fun colors this spring compared to last spring where we would say ‘Great, another pair of white shorts.’" she said.

Tennis, running, cycling and softball wear are the four main categories of new spring outerwear along with basic sweats. Nylon suits with matching shorts and tank tops in pink, white and blue from Nike are ready for spring athletes or those who want to look good and be comfortable.

Cotton replaces polypropylene as the material "buzzword" this season, Kaiser said. Polypropylene keeps you warm but "is really hard to get an odor out of," Kaiser said. Even running shorts are 100 percent cotton, she said.

White will, of course, be worn quite a bit in tennis wear, but it will be paired with fresh, new colors—bright blue and pink, Kaiser said.

Wild print on running tights are new this spring but "they may not last as much for this area," Kaiser said. However, wild print covers much of Nike. Perfections. Kind and other brand’s running shorts.

"Tights in general will be even bigger than last year and they blew out last year," Kaiser said. "It almost became more fashionable than practical to wear them." Tights are also used by cyclists, Kaiser said, but cycling wear is more standard. "They usually wear black with maybe one color and cycling shorts are billboard (display a brand name)," Kaiser said. Last year Sunset Sports introduced white cycling wear. It’s still on their shelves, Kaiser said. Another new item in cycling wear is the triathlon suit or one-piece body suit. It consists of a Lycra tank top and shorts and can easily be worn over a Speedo swimsuit, she said.

"Biking is more intense up here compared to Lewiston, so we tend to get a lot more biking wear," Kaiser said.

Softball and baseball coaches can find a new line of shorts from Nike brand and can expect four or five brands of uniforms to choose from plus a variety of baseball shirts, white with colored sleeves.

John Trout, "a world class runner," is the manager of the shoe department at Sunset Sport and "he knows his feet" and what shoes to order for this spring’s runner, cyclist, baseball player, soccer player and aerobiscoker, Kaiser said.

The Ladies Workout shoe section features a new highstep aerobic Reebok in red or black. Men’s Workout has a yellow and black "Bloomday" designed by Nike especially for the Bloomday race.

To go along with these hot new shoes, this spring’s sports specials are running socks made of polypropylene toewith sweat (take moisture away) and "fun new tennis socks," Kaiser said.

"This spring you can be covered from head to toe and look sharp too," Kaiser said. "All you have to do is get in shape."
Hook, line and sinker

By Kellie Grevellie
Salt Water

With the onset of spring, a certain restlessness sets in. A fever, commonly referred to as Spring Fever, bothers us to bring out shorts, sunglasses, frisbees, softballs and bats, but most importantly for the outdoorsman, fishing poles and line. Yes, with spring comes the fishing season, and once again the wilderness draws much attention.

Although the official first day of spring is March 22, the fishing season won’t mark its beginning until April 20 for most locations, while others won’t open until May 4. For official opening dates of your favorite fishing hole, check the Idaho Regulations for further details.

With the water level at its peak during spring fishing, there are certain techniques that have been found to help fishermen. The first consideration is bait. Avid sportmen declare that worms, especially night crawlers, are the best bait. This is because with the streams so high, worms tend to float into the waterway. This makes use of worms the most natural and most efficient bait.

It is also thought that earlier in the season, fish stay at the bottom of streams, due to the cool temperature of the water. Therefore, the line should be weighted, so that the bait may float to the bottom.

From this point, techniques vary greatly depending on the fisherman and the locale.

Speaking of local, some places for fishermen to wet their lines include Spring Valley, Moose Creek, Loctha and Selway. The Lochsa and Selway are good fishing. UI student Matt Becker says of this area, “there is a hungry fish in every hole and the country is pretty too.”

For those who don’t mind a long drive, Dworschak Dam in Orofino, ID is known to have huge trout and again the scenery is excellent.

But no matter where you fish, every season you’ll hear wild fishing stories, so be prepared. The wildest one told to me so far has been UI student Ron Hintz’s tale of his fishing adventures on Paradise Creek, which is located by the SUB. It is here, that he apparently caught a 17 pound steelhead. His roommate, Darwin Baker, supposedly can verify this account as an eye witness. But no one will ever know the truth of this tale.

And so, with a new season, there is bound to be fresh stories to be told — some will be true, some will be stretching the truth, and many others will be so far fetched that one will have to set aside skepticism.

On and off-road biking on the Palouse

Moscow, and the Palouse, are not known as bicycling hotbeds in this country, and probably never will be. But that won’t deter increasing numbers of two-wheelers from getting out on the roads this spring.

“One thing about cycling is that it has always been popular, from the turn of the century on,” said Roger Ames of Velo Sport, a local bike shop. “It’s an integral part of our society that people take for granted.”

But here on the Palouse, cycling as recreation and as a sport is growing in popularity.

The increased popularity of the bicycle as something other than an efficient mode of transportation is due in large part to the emergence of the all-terrain or "Mountain" bike. Sales of these virtually indestructible cycles now account for 40 percent of the market.

“They’re so much more versatile than a recreational or touring bike,” said Walther. “The bike can take the abuse instead of your body.”

Ames agreed and said, “A lot of people who would have gotten a touring bike are getting mountain bikes. In the last year mountain bikes have spurred popularity.”

"I had an atypical vacation up North"

By Buddy Levy
Staff writer

Most people travel south for spring break to get away from the cold, harsh winter that Moscow offers. Not me. This year I headed north, to Schweitzer Basin; north, to socked in skies and a grand total of two hours of sunshine; north, to one of the more scenic and little known resorts in the west. Indeed, Schweitzer is Idaho’s best kept secret. In my estimation, this was not a typical spring break, or I would not be boring you with its details. In fact, it wasn’t really a vacation, because what I was doing was work, by definition. At least they were paying me to do it. I fall down for a living, literally. What’s he going on about?” you’re asking. Well, for the last four winters my partner and I have been working for Warren Miller Ski Films, putting together comic ski sequences for his yearly feature films. In the words of rival ski film maker Dick Barrymore, “It’s good work, if you can get it.” In a word, what I do is intentionally fall out of ski lifts, into rivers, and down very steep slopes for fun and profit. I have been lucky to “fall into” this kind of work. It is exciting, exhilarating, and is getting to be lucrative. But it can also be very trying on the patience.

For the first couple of years, getting pulled out of my boots and running along the snow in socks, “free planting” into rivers, and diving off cornices was fun, and the novelty of being in ski movies was enough to keep me going. But it gets cold, and freezing gets old. What we do as film is contingent on the weather, and there is a great deal of waiting involved. Life as a Comic Ski Stunt Man ain’t all it’s cracked up to be. What really made this trip was my discovery of Schweitzer. After having filmed for the last few years in Sun Valley and in Cal., I convinced the Miller folks to film at Schweitzer, a lesser known resort. Eleven miles from Sandpoint, for those of you who don’t already know it, is a small stripe of paradise. Growing up in Sun Valley left me a bit spoiled as far as skiing goes, but Schweitzer was far from disappoint¬ing. Indeed, it has some strong points that Sun Valley lacks. When the weather was too rough for filming, I was off sampling the slopes. The view from the top is delightful. Luke Pend Oreille shirnes in the distance, a fresh, clear pool in a basin of green. While Schweitzer has less vertical drop than many resorts, it is well planned out, with its lifts accessing the runs efficiently. It has two separate sides to ski, the Schweitzer side and the Colburn side, each offering excellent terrain for skiers of all abilities. Probably the most noticeable and pleasant experience was the weather. The weather was the best of a bad spring year, and there were, at the time, very few people around. But you’d never have known it if you were actually there. Everyone was in a good mood, smiling and laughing as the rain washed away the snow on the southern exposures. The people are up there truly enjoying their work and their area. They are what make Schweitzer the experience that it is.

We managed a week of filming, and despite nasty weather were able to get what we were after. I left the area without a body cast — no broken bones, but a bit bruised. Meanwhile, I confirmed for myself what folks have been telling me for years. North Idaho is a state of mind.

Cycling, from page 9

Along with the increase in popularity comes technology into the cycling world. Cyclists can now buy computers to mount on their handlebars to monitor speed, distance and other functions. But high quality frames and components are more crucial to the working of a bike. And Walker sees the increased quality as a benefit to the buyer. “You can get a lot for your money,” Walker said.

For example, the Stunt Jumper, the first production all-terrain bike, made by Specialized Co., sold for $875 when it was introduced in 1983. The same bike, now called the Rock Hopper, sells for $425.

Technology and competition are responsible for this trend, according to Walker, and the same applies to racing and touring models.

Aside from off road riding, which mountain bikes are ideally suited for, racing and touring have also gained support in the area. Club Velo, a community cycling club that is in part sponsored by America Velo Sports, is a United States Cycling Federation (USCF) licensed club with a goal of promoting riding. Club Velo sponsors weekly time trials to give riders a chance to compete and improve.

Club Velo also offers benefits to its members other than riding experience. Members get a 10 percent discount on merchandise from Velo Sport for their $15 yearly membership fee. Upcoming cycling events will include the weekly Club Velo time trials, while the local racing season will not get started until this summer. In June, Northwestern Mountain Sports will help sponsor Moscow VeloMadness when a 12-mile trek to the top of Moscow Mountains and plans to sponsor a criterium in conjunction with the Lewiston Hill Climb race, according to Walker.

28-59 spells doom for Trumbo

By Kathy McCamley
Sports Editor

UI basketball coach Bill Trumbo was fired after his third straight last place finish in the Big Sky conference.

Trumbo, who compiled a 28-59 record at the UI, including this year's 11-18 overall record, had some very large shoes to fill when he took over the helm vacated by Don Monson. After three losing seasons, the coach didn't have the right stuff to fit correctly into athletic director Bill Belknap's department of successful teams — of winning and large fan attendance.

Trumbo was given the bad news while he was in Cal, visiting his relatives and recruiting for the next season. According to Sports Information Director Don TeBeau, Trumbo arrived in Moscow Friday evening to prepare his family for a destination unknown.

Gary Mendenhall and Pat Raferty, an assistant coach under Trumbo, were also dismissed. Mendenhall played for Trumbo at Santa Rosa Junior College in Ca. Raferty was an assistant coach at Northern Arizona for two years before coming to the UI.

Trumbo was well-liked by the players and people who worked with him, but Belknap let the "nice guy" go before he could rebuild the program that fell after Monson left. The bottom line to Trumbo's dismissal was the dollar, something that has steadily dwindled during Trumbo's career.

"It's all part of the business," TeBeau said from his home Sunday afternoon. "We were 2000 people below the average attendance in the Big Sky this season, and 1500 people per game." Idaho State was second from last with 2900 per game, he said. "They (the athletic department) had to do something."

Weber State and Montana State had the highest attendance records, with well over 7,000 fans attending each home game.

TeBeau went on to mention that although Trumbo had an "awful lot of support from the big boosters," private and business contributions to the athletic department getting the fans into the Kibbie Dome was what determined Belknap's decision to fire Trumbo.

"If the fans would have supported the team it would have been different," TeBeau said, adding "we couldn't go out and sell the program."

In the '82-'83 season, Monson's last at the UI, the attendance average was 7600 per game, translating to ticket sales revenues of $107,343. Trumbo's last year's average was 1990, or a ticket income of $50,000.

The selection process for Trumbo's successor will begin this week when interviews will be held, TeBeau said. Speculation has produced many names in the running for UI's vacancy, including the College of Idaho's Marty Molly; Barry Collier, Don Monson's assistant at the University of Oregon and UI Loyola Marymount (Ca); assistant and former Gonzaga head coach Jay Hillock; Spokane Community College coach Sum Branch; Don Zerch, head coach at University of Puget Sound; and Pat Douglass, head coach at Eastern Montana College.

However, as large as the field is, it will not likely produce the new coach, TeBeau said.

TeBeau said that business is business, but the firing brought some hard feelings in the athletic department.

"He's a good guy," TeBeau said. "When these things happen it makes things harder. Some people that were close to him had a long, hard week."
Women hoopsters make NIT

By Tom Liberman
Assistant Sports Editor

Idaho was put out of the hunt for an NCAA berth by Eastern Washington over spring break but the team received good news when it was announced that they would participate in the eight team NIT tournament.

The National Invitation Tournament includes among others Tennessee Tech who the ladies defeated earlier this year in the Mid America Classic. The women’s first round game will take place March 20 in Amarillo, Texas.

In that game the ladies will take on 21-6 Fresno State with the winner of that game going against the winner of the Notre Dame-US International match-up.

The reason the ladies did not get an NCAA berth was EWU’s two point win over the Vandals in the fourth meeting of the two teams. The Eagles downed the Vandals 62-60 in the first round of the Mountain West Athletic Conference playoffs.

Idaho had beaten the Eagles in their three previous meetings but the inspired EWU team led the Vandals for most of the game and made the winning bucket with two seconds left.

The UI fought back from big deficits in the game to tie it up at 60. The Vandals had the ball, but turned it over and EWU put in the winner on an offensive rebound by Eagle Lisa Danner.

The game marked the end of an era at the UI as the Vandals will graduate four of their five starters with All-American candidates Mary Raese and Mary Westerwelle leaving. Idaho Head Coach Pat Dolrazt finished her sixth season at the UI with a 130-39 record and her second consecutive post-season playoff berth.

Although neither Raese or Westerwelle received All-American honors, both were named to the First Team All-Conference team. EWU had three candidates and conference winner Montana placed one player on the first team.

Also making All-Conference were Idaho guards Neta McGrew who was named to the second team, and Robin Behrens who was an honorable mention.

Both McGrew and Behrens finished their Idaho careers, Behrens with the all time Idaho steal record and McGrew with the UI single game assist record.

Must someone
Always lose?

Opinion

By Tom Liberman
Assistant Sports Editor

Once again we have reached the NCAA basketball playoff hoopla that will pervade the airwaves for the next few weeks of basketball fans’ lives.

Watching one team after another fall by the wayside with players who have given their all, feeling the despair of defeat, makes me a little sad. Montana State wins a huge victory in the Big Sky playoffs and then must play again lose to St. Johns in the first round of the NCAAs.

The present format does not allow schools like the UI to be winners at the end and that is unfortunate.

Every game has a winner and more importantly a loser. The loser goes home and tries to

Bill Trumbo, cut short a year too soon?

Greg Klmer
Sports Columnist

Welcome back, that is for some of us coming back after break.

While vacationing in one of the exotic vacation paradises this past week, you may have heard that University of Idaho basketball coach Bill Trumbo will not be retained as head basketball coach.

The hierarchy of Idaho's oldest collegiate institution decided that three years of coach Trumbo is enough. Although many will disagree, I question these "basketball brains?" decision and the manner in which they pulled off the roundball relegation.

It was a few weeks back that UI officials grounded Trumbo and UI assistants Pat Rafferty and Garry Mendenhall's recruiting allowances. That move will definitely help out next year's chances.

They said when they froze the recruiting expenditures that the move had nothing to do with Trumbo's status at the UI. That must have really helped him concentrate on the playoffs, huh guys?

Calling Trumbo at his folks' home the following day after the Big Sky tournament was a little cold. Even morticians wait a few days to send the bill.

I believe the UI could have done a good deed to themselves, as well as Trumbo and the team's tournament hopes, by telling Trumbo beforehand where he stood.

If it was up to his team's performance in Reno, tell him. The Vandals could have dug down for something extra, in hopes to keep Trumbo on Idaho's bench. Nothing like a few valets dressed in silver and gold hanging on Reno's Lawlor Events Center referees to give somebody a little motivation.

If they wanted to give Trumbo another season, tell him. It would have been one distraction out of the way for Trumbo and his team. It seemed to work for Stu Starner and Montana State.

My congrats to MSU on their three day hot streak and the St. John's game. If I were as hot as Tony Hampton, I'd have put my life on the crap table for double O's.

I've always been a believer in giving a coach his four years. Let his first recruiting class get through with their stint. The Vandals are young, very young.

In the last two years, Idaho has lost four seniors, three this year.

Trumbo would have returned a very strong team for next season — HB team. Something most all of the senior-dominated teams in the Big Sky cannot say.

Leading the way of returners is guard Kenny Lockett, a 2nd team Big Skier as a sophomore. Along with Lockett, throw in Big Sky honorable mention big man Tom Statlick, red-shirts Ulf Spears and Steve Adams, talented guards Chris Carey and Barry Heads, big men Paul Verret, Matt Gregg and Brian Coleman, along with four scholarships, and you've got Idaho's first contender since the Monson days.

Now we are forced into a very tight spot. The above mentioned players can leave if they see fit to depart. True, the UI can put down a type of restraining order that blocks any school from giving these players a scholarship for a year, but all a particular school would have to do is find some alumnus or booster to give that particular player a $17 an hour job in the off season to compensate for the full ride.

See Too soon, page 14
Losing, from page 12
dream of doing better next year.

tional Champion and only one
team can end its season on an
up note. Either you lose in your
conference playoffs or you lose
in the NCAA’s.

Supposedly, America wants a
winner, but all we seem to get is
an endless stream of losers. Can
you expect Brown University to
play with Syracuse? 102-53
says you cannot.

Why can’t Brown be allow-
ed to finish its season with a lit-
tle joy? Why cannot the seniors
on that team be allowed to avoid
humiliation?

In the Division I NCAA foot-
ball championships there are a
large number of Bowl games
and each team that makes a
Bowl can win its last game. This
is much more dignified in my
opinion.

Having finished in third,
third, fourth, and third in water
polo State Championships in
high school, I empathize with
the players who get close but
ultimately feel defeat even if
they have won 90 percent of
their games.

It is a real shame when we
have to put young men and
women not much older than 23
through torture test after torture
test.

Most basketball fans
remember North Carolina’s
dramatic victory over
Georgetown in 1982, but who
remembers the G’Town player
who was the ball so Janese
Worthy of NC and lost the
game? I do not.

It is the unfortunate fact that
for every winner there is a loser.
It would be nice if we all could
be winners, but that just isn’t the
way it works.

Already in the men’s tourna-
ment there have been three
buzzer beaters who sent one
team into jubilation and the
other into despair. I do not see
why the vast majority of college-
loop players, having worked
hard all season, must end the
season on a down note.

I thought it was the 1976 Winter
Olympics when in a 50-km
cross country ski race the win-
ning time was .001 second bet-
ter that second place. Cooler
heads have now prevailed and
in most longer events the times
are only kept to .01 seconds and
any tie at that level is a tie. Is it
that important that someone
wins?

It seems to me that we would
be better off going to a format
where many more teams can
end the season on a good note
and seniors playing in their last
games can go on with the rest
of their lives with the taste of vic-
tory in their mouths.

Many will say that this is not
the American way to do things
but that is how we Americans
change.

Too soon, from page 13

And there are a number of
Pac-10 schools drooling over
a talented guard like a Kenny
Eggert, right? The fact is
Bill Trumbo stepped into a
very tough spot — that of follow-
ing Monson with the cupboards
bare.

I am as big a Monson fan as
anyone but he had the luxury
of stepping in with a great player.
Donnie Newman, already on his
roster. It’s pretty nice for a head
teach to tell prospects like a
Kellerman or a Hopson that they
could come in as freshmen
and play with a guy who was
drafted by the NBA in both his
junior and senior campaigns.

Trumbo came in with Pete
Prigge and Stan Arnold as lea-
towers. Not exactly what I would
call drawing cards.

At the Division I level, it takes
awhile to get on your feet.
Although 28-59 at Idaho, the
Vandals, under Trumbo, were
showing some good signs of get-
ning back on those Adidas.

Nobody beat Montana State on
their floor this year, except
Monson. We got Montana at home,
something we haven’t done
since ’81. Monson didn’t even
score. We went struggling through a tough season, the
Vandals fought back from a big
deficit at Boise to knock off ISU
in the final seconds to split with
the Broncos and save face in
Idaho; we also split with ISU.

And ask Bobby Knight what he
thought of Trumbo’s team after
their matchup in the Hoosier
Classic this season.

I want to wish Bill Trumbo
all the best. I think he will do
well in his basketball career.

There is a lot of respect for Bill
Trumbo amongst the west coast
basketball coaches and I hope
he finds a job at his liking.

I would also like to wish
whoever will be his predecessor
at Idaho an awful lot of luck. It’s
going to be a big job.

I wish him a lot of courage
and a lot of ability to step into
a program that is recruiting in
the middle of the hottest time to see talent.

JC and high school tournaments
are over.

Oh well, maybe in a few years
Idaho will be back playing
basketball in March. Bill Money
says Bill Trumbo will be.
Is the Hartung Haunted?

More convincing are instances where the radio has changed stations for no apparent reason or has been physically unplugged while having nothing to do with the radio. A radio has been in costume storage. The floorplan of the costume shop is such that anyone walking into the room must pass the radio area, and thus, it could easily be unnoticed.

Graduate Actor Sheldon Haas spoke to me when I was looking for a pair of shoes for an upcoming production. He had been in costume storage for some time and had had trouble finding them. He told me that none of them fit. They were all the same size and left me wondering if a pair of shoes fell from the third floor where Sheldon said the shoes would fit and somehow ended up in storage.

Pat Moon, a former shop worker, told me that while he was working on the theater one night after a recent run of a show, he and a friend were sitting in the audience and realized that the lights were not working. They were startled to hear a woman's blood-curdling scream from the stage. The doors were locked and there were no people in the building. The third, in Pat's words, was the most frightening thing he had ever seen.

Anita Biggs is a theater major and has been stage manager for many plays. One of her current projects is to turn off all lights, think of something else after everyone has left the theater. Anita told me that several times.

Shopping: The meaning of life?

Sarah Kerrush
Entertainment Editor

Darlings, I was sitting in my lemon Yves St. Laurent suit ($500) the other day complaining about the price of designer clothes to my friend, who was wearing a maroon Little Chinaberry suit ($380 off the peg). When she told me about a series of books called Born to Shop. Each book is a guide to designer shopping in the great shopping centers of the world. These unassuming books, despite their modest enough portrait covers, are a godsend for those of us who are like me when it comes to shopping. I course not to shop in a store, but I am not about to talk about grocery shopping in Rossie's. I am interested in places where we can take in such places as Halloway's, Bloomingle's and Harrod's, and that is what the books are about.

If you are bored of shopping in Paris then there are holes in shopping in Hong Kong, Italy and England. Of course during the summer break you could go to all four places.

I must confess I have, with the help of a group of Beverly Hill Billies, claiming to be a small group of ordinary women, just like you, who have decided to get rid of their retail. The motto of these "ladies," who cannot sleep, who cannot work for more than a few hours at a time, is "A museum is a museum but a bargain is forever.

I have learned a lot of useful information like how to tell a fake Cartier watch from a real one at the top stroke of the V part of the VI is not a line but the word 'Cartier' and how to know if you are buying the ultimate in fashion designer bargain.

Born to Shop in France is for those who like to spend time taking three and a half hours to cross the Atlantic from New York to Paris where you can get a French restaurant and read them there on verre de vin and les escargots (approximately $20).

Aiming to the books, research is essential for good bargain hunting. One of the "ladies" had the unfortunate experience of placing an order for a Charles Jourdan tie in Paris for $20 only to find it on sale in the United States but for $4.18. It is the most frightening night of her life.

Sarah Kerrush
Entertainment Editor

Dave Foster, another graduate student, related stories from former department employees. He told me that several technical directors and designers have been there in the highly esteemed way by which they are used to make their performance. Those who have been there have found themselves to be a group of people who have been able to find out what causes the darkness. Other people in the building away from all light switches, and there were no power outages.

Director Forrest Sears told me of his one and only experience with the Hartung "ghost." During a technical rehearsal Forrest thought the light on stage looked wrong and upon turning around saw a strange, multicolored light coming from the stage. The light was in the right area of the stage. Forrest Sears felt the room had been visited by a spirit and was never seen again.

Wendy Fountain, a UI graduate, told me that once in her first show she was working on a set, and something caused her to feel uneasy. She saw the reflection again. Wendy told me this story with such sincerity that it made me feel scared.

Most people at the Hartung refer to the "ghost" as Oscar and say that he was a construction worker who fell from a high wall to his death. Others, like Anita Biggs, think that the ghost is Jean Collette, a former director of the theater department and a major driving force who made the theater department what it is today. Anita believes that Collette's ghost came to the theater in the costumes, props or furniture. That story was proven false by Forrest Sears by the simple fact that Jean Collette was alive to see the first few shows at the Hartung and even heard the first few ghost stories that were started at the theater.

I don't want to give the impression that everyone at the theater believes in ghosts or that there is even one here. But there is one at the Hartung, David Billingsley has big doubts. He says when he is finishing touches made and he remembers hearing some one say: "All theaters have ghosts, why doesn't ours have one?"

Dave also remembers coming back from a two year sabbatical and hearing stories of spectral happenings that were supposed to have happened when he was there before, but he did not remember those things happening. For these two reasons Dave believes Oscar is a hoax.

From the early aperas, all theaters have had a tradition of having one or more ghosts. This and the fact that many of our players spend months of time at the theater, and some are in the area all year, make it all the easier to have a ghost story. Some people have a more natural fear of the unknown, and others have a love for the unusual and the mysterious.}

Is the Hartung Haunted?

Some people have a more natural fear of the unknown, and others have a love for the unusual and the mysterious.
PIZZA: No matter how you slice it— it's big business in Moscow

By Sharon McIntosh
Managing Editor

Although the origins of pizza remain shrouded in mystery, it is a well-known fact that pizza has practically become the 20th century's fast food for most college students. In fact, there are seven places serving pizzas and Italian-style dishes in Moscow, and it's obvious the pizza business is no small potatoes. Upon taking a pizza tour of Moscow, you'll find you don't even have to leave home to be served.

Pizza Perfection: Opened last August, it's the newest pizza place in town. Pizza Perfection is a viable alternative to delivery pizzas with its reasonable prices, free delivery within 30 minutes and two free pops with any order. Manager Dana Sellar's said that the sauce and use of blended cheeses makes Pizza Perfection pizzas different than the rest.

The busiest times are Fridays and Saturdays, he said, because of the Pizza Perfection's daily special of buy one pizza, get one for free. For example, two large pizzas are $12.90 plus tax, compared to the $15.90 regular price. We were told the busiest times are Fridays and Saturdays between 5-7 p.m. and 1-2 a.m., or "after the bars close." Between 5 p.m. and 7 p.m. Domino's delivers about 100 pizzas, and between 1 a.m. and 2 a.m. it usually delivers 30 to 40 pizzas. A large two-topping pizza is $11.20.

Other places that deliver are Gambino's, the Rathaus Pizza Shoppe, Karl Martz and Pizza Haven, but since these restaurants do the majority of their business within the stores, we'll take a tour of those places. Gambino's: Probably known for its fishbowls and full Italian menu, it has the only delivery pizzas that are made while they travel to the customer. Owner Don Roskvich said that orders are 'on the run' and the restaurant's delivery drivers take the orders to the van. The order is made in the van and is cooking enroute to the customer. It is said that when it's delivered at the store, he said the busy time is 5-6 a.m. on the weekdays and weekends, and although he couldn't come up with an exact number of pizzas made, he did say they make "quite a few." He added that 60-70 percent of the pizza orders are for delivery. Roskvich said that Gambino's makes its own sauce and dough and that all fresh ingredients are used.

A large two-topping pizza is $10.10.

Gambino's will be offering a four-topping large pizza with two soft drinks for $10, he said. This large, new, (still outdoor) patio should be done by next Saturday, he added.

Pizza Hut: Next to the Moscow Mall on the Troy Highway, it is currently in its sixth year of operation. Manager Richard Waller said that lunches are busy, with little pizzas being the most popular during that time. He said Friday and Saturday nights are the busy times when around 200 pizzas are made. Pizza Hut also has a variety of other items, such as Frazz, 50-cent soft drinks, hot dogs and beverages. Pizza Hut is a part of the Pepsi-co food chain, so it has a lot of research and training behind the product, he said. He added that 90 percent of the pizzas are sold during the dinner hours.

Gotcha Games: hunting with a twist

By Matt Helmick
Staff Writer

Your pistol is triggered instantly in a sweaty palm. You eye your surroundings carefully, aware that at any time your adversary might appear, attempting to shoot you before you can sense his presence. You watch, waiting for the slightest sign of your opponent. Suddenly, you catch a peripheral glimpse of a figure to your backside. You turn to fire, but it is too late.

You hear the sound of your opponent’s weapon firing and you feel the impact of the projectile on your chest. You sigh as you regard the blood-stained splash on the front of your jacket. “I’m dead,” you think to yourself. You are initially dismayed at this realization, but you remind yourself that it is just a game and that there is always next time.

The above scenario is a narrative example of a Gotcha Game, where players simulate games of armed combat using lightweight water-powdered pistols that fire paint pellet projectiles. Although there are different variations of the game, the general object is to be the last person standing. Competitors take these pistols to some non-competitive training sessions and shoot each other down using the paint guns. Hits are determined by the red mark that is left when one is struck by a paint pellet.

Gotcha Games have become a trademark and name for the business Bill Owens brought to the Moscow area. Owens rents the paint pistols and accessories out of Paul’s Pawn Shop in 209 S. Jackson. Owens, a recreation major, said that he came up with the idea of bringing this game to Moscow when he became aware of the reasons people hunt animals such as deer and elk.

"Everybody I interviewed said they hunted for the sport of it," Owens said. "I thought about that for awhile and I thought, I bet it is fun to chase after something and to track it and to finally narrow down on it and get it."

Although Owens recognized the fun in hunting, he did not think it was fair to hunt an animal unless you are that same animal being hunted. With this thought in mind, Owens decided to bring a game to Moscow that included the excitement of hunting, but excluded the actual act of killing. Hearing of similar games taking place in the U.S., he did some research and then purchased the pistols.

Owens now rents the guns and develops games to be played with them. One of these games is called Road Ambush. In this game, two groups of people are let off half-a-mile apart from each other along a secluded roadway. The object is for the two groups to meet and then shoot it out. Each individual in the game carries a card for the tallying of points that are scored when they are hit.

Hits to a person’s body stops play. If you are the person shot, you can pick up the person who shot you comes up to you and fills out your card. A body shot is worth five points. After a body shot is made, the two opponents can no longer fire upon one another. If a person is struck on the limbs, play still continues. The arm shots, however, are only worth two points.

Owens said that games such as this are popular in the East. Chicago he notes as having particularly large games including 150 or more guns. Other games can be found more locally, however. Snookalumpie has some large games and Snapakazi leads as a small one.

When considering these games, safety is obviously a factor that comes to mind. Because these games use a project

weapon, caution and discretion should always be taken. The guns are accurate up to 100 feet, so they have some power behind them. If the participants in the game are wearing protective eyewear, there is little chance of injury. Owens points out that he always uses protective goggles at point blank range. Because the paint pellets might sting a bit but there is no real harm.

A concern of both Owens and SAS is where the guns can be used. Jim Busey of SAS has stated that the guns should not be used in the open field if someone is caught using the game. People who are involved will be subject to punishment since using such a device is against the local laws. However, some individuals have been known to use the paint guns on campuses.

Owens also said that they have written to local law enforcement officers to see what they will be using for organized games.

As a major reason, Owens wants people to be careful about where and where they use the paint guns is because a police officer might mistake a paint gun for a real gun. Owens said there has already been one case in the U.S. where a person was shot and killed by a police officer because he thought a person was holding a real gun. Owens does not want to see that incident repeated in Moscow.

Owens has a contract on the proper use of the guns that he has people running the game signs. He points out, however, that this contract will not insure that people will use them off campus if they rent guns here. "I can’t guarantee what people are going to do with them," he said. “Responsibility is the big thing. This is an adult game and because it is for adults, there is some responsibility involved such as not hitting innocent people and not destroying property.”

Owens also pointed out that Gotcha Games has some values other than fun. The Latah County Sheriff’s Department has made a commitment to use the paint guns for training purposes. The paint guns allow training scenarios with pressure situations involving display. With the paint guns, shots can be fired without any death or injury.

For the past 23 years, the BYU MBA program has built a reputation as one of the leading business schools in the West and in the entire nation. Find out more about the school with:• Several Areas of Management Emphasis• Joint degrees with:—Law School—Masters of Accounting—Masters of International Business• Broad Geographic Career Placement• Accredited by National Corporations including numerous Fortune 500 companies• Career Advisement Office• Average Starting Salary Above $36,000 in 1985

The Quiet Earth
By Sara Donor

End-of-the-world movies have been made before. In fact, the threat of a nuclear holocaust has been a favorite theme for many years. But even in recent years, the scifi motif has become so common that it is difficult to imagine anything out of the ordinary. That's why a movie like "The Quiet Earth" is welcome.

"The Quiet Earth" is a film that explores the concept of what might happen if the world were to end. The story follows a group of people who are left behind as the world computer goes haywire and begins to destroy everything in its path. The film is a powerful exploration of what it means to be human, and what it means to be alive.

The film is directed by Robert Wise, who is known for his work on "The Day the Earth Stood Still" and "The Andromeda Strain." The cast includes such well-known actors as Richard Dreyfuss, Whoopi Goldberg, and Brooke Adams. The film is a must-see for fans of science fiction and for anyone who is interested in the idea of what it means to be human.

If you enjoy "The Quiet Earth," you may also enjoy other films that explore the concept of the end of the world. Some other notable examples include "2012," "Armageddon," and "The Time Machine."
No assigned parking for married students

By Becky Bailey
For the Argonaut

The UI Parking Committee plans to eliminate assigned parking spaces in married student housing parking lots, according to Committee Chairman George Malm.

George said the committee will ask the assistant director of family housing to convert all married student housing parking lots to non-assigned lots.

Some married student housing lots, such as the Birkdale Village Apartment lot, are already non-assigned lots, but a few have not yet been converted. George said.

In the past, residents of married student housing lots, such as the Birkdale Village Apartment lot, were already non-assigned lots, but a few have not yet been converted. George said.

Transit Fair helps parents

Transit Fair, an event designed to help answer some questions about education and employment, will be held March 27 from 7 to 9 p.m. at the Moscow Community Center.

The Fair is a followup to Transit and Employment Project (STEP) at the UI in cooperation with the Moscow School Board.

The event will provide an open forum for transit teachers and representatives from local resource agencies to meet.

Resource agencies represented include the Adult/Child Development Center: Vocational Rehabilitation; Social Security; Health and Welfare; Palouse Industries, Inc.; Stepping Stones; Idaho Commission for the Blind; Coalition of Advocates for the Disabled; Special Siblings; and Moscow High School.

Key speaker for the Transit Fair will be Sue Hovey, an educator for parents who will address the role of parents of children with special needs. Leslie Hovey, a graduate of Moscow High School, will talk about her experiences in special education classes, her present job and her plans for the future.

Each agency will have a table display and offer information, application forms, business cards and other resources.

The event is free and open to the public.

Shutting books between schools

By Lisa Fuller
For the Argonaut

UI students can borrow books from Lewis-Clark State College through interlibrary loan at the front desk at the UI Library.

UI keeping more freshmen, WSU tightening standards

By Tiah O'Keefe
Staff writer

Tightened admissions standards at the UI and Washington State University during this year's freshman advisory program may lead to a decrease in the freshman dropout rate on the two campuses.

As of next fall, both universities will have new requirements for admissions. A big change at the UI must have graduated from an accredited high school with at least a 2.0 grade point in specified courses. Out of state applicants must graduate in the upper half of their class. Before, the in-state applicants needed only to have graduated from an Idaho high school, and the out of state applicants needed to have only graduated in the upper three-fourths of their class.

At WSU, applicants must have a minimum G.P.A. of 90 last fall and the required admission standards for freshmen which is a score based on high school transcripts, pre-college test scores, average and pre-college test scores, 95, a notch below next year's requirements. According to Matt Tein, UI registrar, admissions standards will be more strict at BSU, ISU and LCSC as well as at the UI. This is expected to bring the dropout rate down in the state's colleges.

Anytime you tighten admissions standards, you reject out those who do not fit, and the drop-out rate will go down." Tein said.

The percentage of freshmen who dropped before the 86 spring semester was 86 percent, the lowest figure since 75. According to Stan Berry, WSU admissions director, the freshman dropout rate at WSU is around 1 1/2 percent. Although unwilling to declare the program a success until next fall, Tein said it appears that the decrease in UI's drop-out rate among freshmen is due to the freshman advisory program which began last fall.

Tein said George Simms, assistant director of University Admissions, was the mastermind behind the program, which makes these freshmen receiving D's or F's in their classes understand them to their advisors.

"In the process, advisors found students who were in complete isolation from the university," Tein said.

He said that the results, both in returning freshmen and grade point averages for the freshman class were the best at the UI in ten years.

Tein said the administrators of the program were waiting to see how many of the freshmen returned next fall for their second year. The percentage of non-shows for the second year last year was quite high. "We're expecting that decreases next fall," he said.

Joe Heimman, WSU's curriculum advisor program, said WSU's advising program for freshmen similar to the UI's. Also, freshmen have to receive mid-term grades at WSU. He thinks that the drop-out problem is due to something other than academics, though the freshman program, and they don't find college what they had expected," he said.

For the future, Tein said there may be faculty advisors assigned to each freshman in group, "to serve as a liaison between the student and the campus. They are many professionals on campus who are here to help the student. We want to identify them to the students," Tein said.
Librarian to speak on the importance of information

President of the American Library Association, Beverly Lynch, will visit UI and WSU Wednesday. She will speak on "The Importance of Information in an Information Society," at 10:30 a.m., in the Library Conference Room at UI, and at 2 p.m. in the Kamiak Room of Holland Library at WSU. The programs are open to the public.

Currently the University Librarian at the University of Illinois at Chicago, Lynch served as executive secretary of the American Association of College and Research Libraries from 1972 to '76. With degrees from North Dakota, Illinois and Wisconsin universities, she has held library posts and taught library science at Marquette University, Yale University, the Plymouth Library in England, the University of Wisconsin, the University of Chicago and the University of Texas. Lynch's research interests are in the study of complex organizations, and last year published a book, "Management Strategies for Librarians, a Basic Reader."

Her lectures are part of a series on library issues sponsored by the Visiting Lecturers Committee of WSU, UI and Lewis-Clark State College.

Faculty Council meets today

Items to be considered at today's Faculty Council meeting include the State Board's proposed changes in the financial exigency policy and staff-reduction procedures along with "graduation Cum laude and Summa cum laude."

Fiction and fantasy literature competition

Moscow Science Fiction Conventions, Inc. (MosCon), in an effort to further science fiction and fantasy literature and art in the Palouse Empire, is sponsoring a competition in these fields. The competition is open to any resident of the Palouse who has not been professionally published in the science fiction/fantasy fields.

Entrants have until June 1 to enter their original works, which will be judged by professional writers and artists. There will be both cash prizes and gift certificates awarded, and first winners in each category will be chosen. The first place winner in each category will have their work published in the '86 MosCon VIII Science Fiction Convention Program Book.

A complete list of rules and prizes may be obtained by writing to Beth Pinkbinder, MosCon, P.O. Box 8521, Moscow, ID 83843, or by calling either 882-0364 or 882-3672.

To protect you, calls charged to your number will have to meet with your approval.

We want to protect you from fraud or mistakenly having long distance calls billed to your number. So we require verification on all pay phone calls billed to a third number. That means if your number is to be billed, an operator will ask either you or someone at your home or business to approve each call when it's made. If the line is busy or nobody answers, the operator won't complete the call.

If you place a third number call yourself, you do have billing alternatives. You can call collect or pay for it in coin. The fastest, easiest way, however, is to charge the call to a Mountain Bell Calling Card.*

But should someone want to charge a call to you, we'll make sure it meets with your approval. That way, calls you don't want to pay for aren't made at your expense.

For the way you live.

Mountain Bell

*To order a Calling Card, call your service representative.
Glaciological and Arctic Institute: Classroom in the Alaskan icefields

By Lake Puett

Staff, Mines takes

"Nature without learning is a blind thing — and learning without Nature is an imperfect thing," Maynard Miller, dean of the UI College of Mines and Earth Resources, believes this quotation from Plutarch best describes the concept of the Summer Institute of Glaciological and Arctic Sciences.

The Institute is located in the Juneau Icefields in Alaska. The summer session gives students the opportunity to observe and study a variety of earth sciences in the fifth largest icefield in North America, according to Miller.

Students involved in the program attend lectures at pertinent field sites, participate in demonstrations with instruments and materials in the field and record scientific measurements under supervision, if necessary, or under their own direction.

Courses are offered jointly by the UI and the University of Alaska-Juneau. Students are able to earn 12 credits during the eight-week program. Field camp credit can also be earned.

Possible areas of study are environmental, terrestrial and glacial photogrammetry, glacial surveying and mapping, glacio-ecology, lichenometry, periglacial geomorphology and pleistocene stratigraphy, continuous mechanics, glacio-meteorology, mountain climatology, glacio-hydrology, exploration geophysics, mineral prospecting and bedrock geological mapping.

The students must hike with backpacks over 150 miles of rugged mountain terrain and glaciers just to get to and from the research site, Miller said.

Because much of their work is also conducted in a wilderness environment, the first training they receive is a course in survival skills, Miller said.

The research program began 20 years ago as a research project for the Office of Naval Research. The research was intended to study the trends of arctic sea ice over the North American Sea and Antarctica because of the Navy's polar submarine missions. The project continued to be funded by different sources over the years and in 1959 its administrators began to give academic credit for those doing research there.

"Since then," Miller said, "Education has been the primary thrust of the program."

Miller is founder and director of the program. Other staff members from the UI are George Williams, Scott Morris, Kenneth Spreiske and Harley Johansson.

Students who have recently been involved in the program are David Lubin, Bob Fredericks, Dana LeFevre, Dan Welch, Eric Peterson, Bill Davidson, Jim Zarubica, Robin Brown Law, Tara Ray, Bob Hammond, Tom Krom, Tom Carter and Mike Mitchell. Staff assistants are Wray Feathersdon and Alan Ward.

"We have had, over the past 10 years, upwards of 50 of our College of Mines students involved in the program," Miller said. "And over fifty master's and Ph. D. theses have been done on the project."

The summer session each year includes between 80 and 100 students and faculty members. Miller said, "Last year the student-teacher ratio was one-to-one. We had 35 students and 35 instructors. That's the best learning situation you can find."

Research being done in the icefields has helped to raise money for future summer sessions. Miller said. For example, this week a pledge of $1,000 was offered by Terris Moore, professor emeritus of the University of Alaska, after he read a weighty report on climatic variations published last year as a result of research done on the icefields.

Williams, who specializes in geological mapping of the icefields, is also firmly committed to the summer program and its effects on students who participate in it. "I think the students who go through the program end up very strong in the sciences and become first-rate professionals," he said.

Those students who attend at least one summer session make a career out of one research field, according to Williams and Miller.

Miller believes the real success of the program is the "involvement learning" which takes place when students participate in such a program. "Instead of taking nature to the classroom, we take the classroom into nature," he said.

"In the first few weeks we teach the students how to live with and observe nature, and that makes all the difference in terms of motivation and effective learning," Miller said.

Students are offered scholarships that are being offered this year to students at all levels, including high school seniors. Students interested in participating in the program, either as scholars or without, should apply now at his office. The cost for the summer session is $1,090. "We believe that students and professors grow under stress," Miller said. "Because this is a wilderness environment, the stress level is high, and these students have one heck of a lot of fun. They make lifelong friends because they are living and working together very closely in this very challenging outdoor environment."

Students on the 1985 UI Glaciological and Arctic Institute trip at Icefall, on the Juneau Icefield, Alaska.
Tuition, from page 1

and university students now are

sponsored fees and cannot be used to

pay instructional costs. The

money can only be used for such things as activities and cer-

tain building costs.

One of the sponsors, Rep.

Michael R. Simpson, R-

Blackfoot, said those reaping

the benefits of an education

should be willing to pay their

share of the costs. The

marketplace will keep costs at a

reasonable level, he said,

because students will go
everywhere if it is too expensive. Rep.
Pete Black, D-Pocatello,
said higher costs will prevent

people from going to school. He

added that an educated

population produces more in-

to come and expand the tax base.

Rep. Christopher R. Hooper, R-

Boise, a law student at the U.

said there is no question that

higher education needs more

money, but 75 percent of the general

fund already is being spent

there. Hooper also said he

thinks it is wrong that anyone

who goes out of high school can

go to a university.

Pushing up the cost of educa-
tion will drive a wedge between

the well-to-do and the poor, said

Rep. James R. (Doc) Lucas, R-

Moscow. He asked how the

children of Idaho's farmers,

mine owners and loggers can go to

college given the present
cynthia and the cut in federal

financial aid programs.

Putting the burden back on the

students would make people

think about their responsibility for

their own actions, said Rep.

Ron Crane, R-Nampa. The free enter-
priest system does work, he said,

and nothing is free.

Lotertry, from page 1

were to pass.

To kick off the initiative to be

successful, it must first receive

about 33,000 signatures on peti-
tions for it to be placed on

the ballot. Than a majority of

toters must approve it in the general

election.

calendar

- Forest Park Program: The

Palouse Group Sierra Club is

sponsoring a slide program on

North Idaho forest plans.

The presentation will be held

Thursday at 7:30 p.m. in the

Life Science Building Auditorium.

- An Entrepreneur Meeting

will be held in the SUB Russell

Room 7 p.m. Wednesday.

- Christian Science Lecture:

Mr. Bruce Fitzwater, C.S.B. will

be giving a free lecture to the

public, entitled "The Logical

Certainty of Christian Science

Healing."

- Fitzwater is a member of the

Christian Science Board of Lectureship

and is an authorized teacher and

practitioner of Christian Science.

The lecture will be held

Friday at 7 p.m. in the Galena

Silver Rooms, SUB.

- Campus Christian Center: A

coffee-hour reception will be

held for Fr. Charcour, a Melkite

Priest from northern Israel, and

Dan Simmons, an ordained

pastor of the Evangelical

Covenant Church, who are participants in

this year's Borah Symposium.

It will be held Friday at 10 a.m. in

the Main Lounge of the Campus

Christian Center.

- Campus Christian Center: A

Bible study will be held Wednes-

day at 4 p.m. in the Main

Lounge of the CCC.

- Kayak Pool Session (open):

Wednesday, 7-10 p.m. at the

Swim Center.

- Sea Kayaking in the North

West: A slide show by famed

sea kayaker Wayne Hatch of

Portland, Ore. will be held

Wednesday at 7 p.m. in the

WUSI Club. Admission is free.

- Mt. McKinley '85 Climbing

Expedition: A multi-media

slide show by Outdoor Program

Coordinator Mike Beiser will be

taped on Thursday at 7:30 p.m.

in the SUB Borah Theater.

Admission is free.

The Contest:
Domino's Pizza will award free, a pizza party to the group purchasing the most pizzas starting March 16, 1986 and running through April 4, 1986.

The Rules:
1. Domino's Pizza will keep a record of exactly how much pizza is ordered and delivered to your floor, section or living group by dollar amounts. Any pizza ordered during LUNCH and any pizza over $13.00 will count twice. (Lunch hours are from 11:00 a.m. to 2:00 p.m. daily.)

2. The dollar amount per capita will be used to determine the contest winner. (This way every floor, section or living group, no matter what size, has a chance to win.)

3. The free pizza party will include a large, 24" Domino's Pizza for every 3 people on your floor, section or living group and a Coke® for each person. You may have the party anytime between April 5, 1986 and the end of this academic semester.

4. Each floor, section or living group is automatically entered in the contest. Be sure to identify your floor or section when ordering your Domino's Pizza.

5. Feel free to call the Domino's Pizza store manager at anytime during the contest for information on contest standings.
