Student Street Dance Scheduled to Start Mothers Day Weekend Activities at Idaho

I-1 Student Condition Is Said Good

Miguel Kargay Stellin of Pullman, Wash., Stellin was reported in critical condition at Pullman Regional Hospital early in the week after he was taken to the hospital for emergency surgery following an accident at the home of a Pullman couple.

Stellin, a junior at Pullman High School, was reported to be in critical condition following the accident. He was admitted to Pullman Regional Hospital for treatment of injuries sustained in the accident.

NHS M S Of I—Cookie Fancher, Theta, (second) was named Miss U of I Friday night. Other contestants included Samantha Maynes, Miss Idaho; Mary Moletty, Miss Washington; and Mary Jo Whitney, Miss Montana. Miss Idaho, who is Miss America, was crowned at the competition.

"Bookstore On Agenda Of E-Board

The Student Bookstore will be presented to the Associated Students of the University at its regular meeting tonight, according to Bill Lytle, president of the bookstore.

An appeal will be taken to the members of the bookstore to contribute funds for the purchase of new printing equipment.

Other issues on the agenda include: approval of the Executive Secretary; approval of the Executive Secretary's report; an appeal for the purchase of a new printing press; and an appeal for the purchase of a new printing press.

Coed Group Sets Show at Idaho

Orchestrated by the U. women's band.

The Associated Students of the University of Washington are scheduled to meet tonight at 7:30 p.m. in the new Student Center.

The women will be represented by the women's band, which will perform a selection of songs from their repertoire.

Idaho Dean To Lecture At U Of W

Dean of the College of Arts and Sciences at the University of Washington, Dr. Robert L. Howard, will speak on "The Future of the Arts" at 7:30 p.m. tonight at the University of Washington.

Howard, who has been a member of the faculty at the University of Washington for over 30 years, is a well-known authority on the arts.

He will discuss the impact of technology on the arts and the role of the arts in society.

Idaho Site Is Chosen For Center

A project to determine the feasibility of a biological nutrient removal center at the University of Idaho has been approved by the Agricultural Experiment Station, according to Dr. Norm Nye, director of the station.

"The objective of the project is to determine the feasibility of a biological nutrient removal center at the University of Idaho," said Nye. "This is an important project for the state of Idaho, and we are pleased to have been able to support it."

Nye said that the project will be funded by the Idaho Agricultural Experiment Station, and that it will be conducted by a team of researchers from the University of Idaho.

Greenhouse gases, which are a major concern in Idaho, will be the focus of the project.

The project will help to determine the feasibility of a biological nutrient removal center at the University of Idaho.

The Idaho Argonaut

by student no. 4784

NOTICE: Argonaut policy will be that bi-lines will only be given by student body numbers from now on. We should be able to come up with some of the wilder stories that we have read the past few weeks. 

Maybe that's how we should try to compete with the modernizations Activation Contests is contemplating. This method is called the "personal approach" for eliminating personal decisions from personnel-type jobs. They should be able to come up with some of the "wildest" grades that way.

At least this approach is objective. I wish that some of our current students could write more like this, maybe they could get some of the "wildest" grades that way.

Reaction Similar

Maybe some others had similar reactions when they learned that Activities Council was planning to use IBM machines to help them select student committees for ASUI activities.

I used to laugh at other schools when I saw letters the office of the college president bad, and the writer's name and student body number to ease cross checking of the validity of the letters with the help of IBM machines. I used to say that I was thankful we were more personal in our dealings with other students at Idaho.

Our Personality

One of the strongest drawing cards to the University of Idaho has always been that students here are known by name and not just a number. It's ironic that Activities Council is turning to use the impersonal electronic letters to help pick students who might be interested in trying out for a student committee.

But let's get this all wrong. We're not against using IBM machines by using the IBM machines to draw up a list of prospective members to interview for the committees.

IBM machines are supposed to be a solution for having too few students try out for the committees. The theory is that the selecting group knows a number of students who might be interested in them and can call them to interviews that are scheduled. It hope it works.

Vicki is a Cover Girl

Vicki, from UCLA, made a smash hit at Harvard—at least her picture did—she was invited to the California campus over her spring vacation. While there she was lined up with a Harvard student via the same route that some student here tried two weeks ago.

After her big weekend Vicki was interviewed by reporter How was your day?" they asked.

"Great," she said (she was lined up with a good looking Eholo's scholar—or something). But she added in such an unusual tongue—"if you're more permanent thing, you can't get away from the human element."

How to Prepare for a Place in the Business World After Graduation...

The free booklet, "What Does the Business World Want?" can help you decide what type of professions you want to follow.

Randy Klussatt invites you to "Before You Leave College" and find out all the help he has available for recruits.

The Washington Water Power Co.

1141 E. Mission, Spokane, Wash.

The Golden Fleece

by student no. 4784

Denny Bohlin: "Communication is the key. In order to get under the skin of the student who is about to graduate, the doctor's desire is to know the student. A good doctor will have his patients, and the patient will have his doctor. The doctor knows what the patient needs, the patient knows what the doctor needs, and they are working together toward a cure."

Ken Johnson: "I think that it is important to have a good communication between the doctor and the patient. The patient is less likely to take the initiative and make sure that the doctor is aware of the ideas and demands of the patient. The doctor is less likely to be involved in the activities of the patient, and vice versa."

Knapp takes on positive. Will Johnson: "To have a good relationship with the patient, you must develop a mutual understanding of each other's needs and goals. It is important to make sure that the patient is able to express his feelings and needs in a way that the doctor can understand."

Jack Marzilli: "There are a number of areas that should consider the patients and their E-Board. They are: 1) faculty/administrator; 2) a more efficient flow of finances, 3) academic/office management, 4) student involvement in the governance of the university."

"It is important to have a mutual understanding of each other's needs and goals. It is important to make sure that the patient is able to express his feelings and needs in a way that the doctor can understand."

The remainder of this year and the years to come will be better if students are more involved in the workings of E-Board, she says. Will students instead consider the E-Board as a group that will stagnant expansion of stop?"

Dexedrine -- Not A Joke

(ACP) - Dexedrine is taken to help students who desire to... take too lightly by some. They are... by some of the students who have been doing well. The UO infirmary has had dozens of cases of reactions to pop pills on this campus.

The UO infirmary has had dozens of cases of reactions to pop pills on this campus. They are... by some of the students who have been doing well. The UO infirmary has had dozens of cases of reactions to pop pills on this campus. They are... by some of the students who have been doing well. The UO infirmary has had dozens of cases of reactions to pop pills on this campus.

Dexedrine is the brand name for the drug known as Dexedrine. It is a stimulant drug that is commonly used to treat attention deficit hyperactivity disorder (ADHD) and narcolepsy. Dexedrine can cause side effects such as anxiety, restlessness, and insomnia. It is important to use it responsibly and as directed by a healthcare professional.
KUIO FEEDBACK BALLOT
KUIO (950 AM/FM on the dial) is sponsoring the second of a series of “Feedback” programs to give students more familiar with the station an opportunity to speak their minds. This ballot is to be filled out and returned to KUIO at 3 p.m. Tonight’s topic is the $95,000 ASUI Budget. This ballot is provided to give station personnel an idea as to the acceptance of the program and to give students an opportunity to show their opinions to those who manage how the station budget is spent. Please place the completed ballot in the pick-up box at your living group’s broadcast on the fourth.

KUIO Starts Series ‘Feedback’ Featured
The second in a series of “Feedback” programs, presented by student radio station KUIO, was broadcast tonight at 3 p.m. According to Robert G. Lips, Manager of KUIO, the bulletin was aimed at students who were not familiar with the station. Students were asked to name the program in which they wanted to appear, and student opinions will be taken under advisement and considered before the next “Feedback” program.

Gary Strong Shows Special Education Documentation
A special half-hour program dedicated to the needs of students with special education needs will be broadcast Sunday at 6:00 p.m. on KUIO. The program, titled “Special Education,” will feature discussions and interviews with educators, parents, and students. The goal of the program is to raise awareness and provide support to individuals with special needs.

Ruth McDermott
Engagement
Hiram - Cox
A wedding engagement, as reported in the New York Times, was announced between Ruth McDermott, daughter of Mr. and Mrs. Hiram McDermott, of New York City, and Cox, who was not identified. The wedding is planned for the summer of 1966.
Idaho Vandal Grinders 2nd Spring Practice  

The Vandal — their name for the Idaho team — have been busy in preparing for the season. After the successful running of the annual spring practice, the team is ready to start work for the coming season. The team will be led by Coach Harold McCray, who is also the head coach of the football team.

Coach McCray is a well-known coach in the Northwest, having coached at several colleges in the area. He is a former player for the University of Oregon and has been a member of the coaching staff for many years.

The Vandal team is comprised of a mixture of returning players and new recruits. The returning players include several senior players who were instrumental in the team's success last season. The new recruits include several talented players who have shown promise in their tryouts.

The team's practice schedule includes morning and afternoon sessions, with a focus on improving individual skills and team coordination. The team will also participate in several scrimmages and exhibition games to prepare for the upcoming season.

In conclusion, the Idaho Vandal Grinders are well-prepared and ready to take on the challenges of the upcoming season. With the guidance of Coach McCray, the team is poised for success and will be a force to be reckoned with in the conference.
