MANY NEW ADDITIONS TO THE UNIVERSITY FACULTY

Get Next and Know Who’s Who, and When — Registration Continues.

The twentieth year in the history of actual instruction at the University of Idaho opened on the 18th with a very gratifying enrollment for the first day. Thir-teen counties were represented in Idaho among the new students and the number of old students returning was unusually large. Dean Eldridge is much interested in the fact that a surprisingly large number who had left college before in account of financial difficulties are registering this year. Registration still continues and students will be dropping in for a week or more. It is too early for an estimate, but already it is evident that the College of Law and the College of Agriculture will show distinct increases.

The faculty now numbers fifty-eight, including the following valuable additions made by President Maxeian during the summer:

- D. C. Livingston, associate professor of mining, was graduated from McGill university, Montreal, in 1905, and has spent four years in various mines in British Columbia, was engineer and superintendent for several companies operating in B.C., and at the time of his appointment was engineer for the McConnaughy Copper company, one of the largest Phelps-Dodge properties in that district.

- Charles A. Bierwalt, associate professor of geology, has received the degrees of A. B. and A. M. from Colorado university, and will receive his Ph. D. from that institution this fall. He spent one year as instructor in the department of mineralogy at Columbia in charge of the work for mining engineers, and for the last four years has been instructor in economic geology at Cornell.

- Miss Laura D. Bense, instructor in domestic science, graduated from Carroll college, Wisconsin, in 1905 and for two years taking special training in domestic science at Pratt Institute, Brooklyn. She taught in the Milwaukee training school for one year, and at the time of her appointment was supervisor of domestic economy in the Pesquetto public schools.

- Lyman P. Wilson, associate professor of law, was graduated from Knox college in 1904 with the degree of B. S. In 1907 he was graduated from the University of Chicago as doctor of law. Before going to that school, Mr. Wilson served two terms as city attorney of Galena, Ill.

- Dr. Shirley G. Patterson, associate professor of Romance languages, received the degree of B. A. from Amherst college in 1905; M. A. from Cornell in 1909, and Ph. D. in 1911. He taught Spanish, German and French in the New York City high school from 1905 to 1908, and at the same time was a graduate student of Romance languages at Columbia. In 1908-09 he was a resident fellow at Cornell, and in 1910-12 Cornell traveling scholar, in Maestria and Paris. The next year he spent at the University of Chicago as instructor in French and Italian.

- F. S. Kenyon, of Pullman, is assistant inorganic chemist, instructor in inorganic, mineralogy, and assistant agronomist of the experiment station received his Bachelors degree at Washington university in 1907. After graduation he worked for a year at the bureau of plant industry and had charge of one of the dry land experiment farms located in the Great plains region.

- Karl J. Thuefe, assistant bacteriologist of the experiment station, took his B. S. degree from the University of Wisconsin in 1907. After graduation he accepted a position as a bacteriologist with the B Ernst Creamery company in Denver. Later he was dairy bacteriologist with Morris & Co., Chicago.

- L. J. Corbett, associate professor of electrical engineering, was a student at the University of Idaho from 1894 to 1900, and while there was awarded the Kendall scholarship for two successive years. In 1900 he went to the University of California, and, by taking extra work, completed his courses in 1902. He then entered the employment of the General Electric company of Schen-ectady, N. Y. In 1904 he was...
Another college year has opened; a broad field of student activity is now lying open to our university students. College life will be animated, events crowding thick and fast upon one another. Things will be done. And how? And by whom? That the future will decide. But the important point is that every one of us, as yet uncalcified, loyalty to one's self—to his best interests personally—as well as to his school, demand that each and all spring to grasp and hold every opportunity that comes along.

The intensity of the work of each individual is the measure of what he is worth to himself, and to his college; and the application of this principle, though extended to freshmen, applies with equal appropriateness to other students. Then do things. One cannot do too much; and don't hesitate to accept more work, no matter what it is, that falls in your way. Besides, as an opportunity to develop your abilities, and a woman who has been "the black shelf from which you gathered" by "showing the things that you can do," get busy—active. Show that you're alive by moving—doing things. Judgment is based on what you have done—not on what you can do—and will be. No one cares a rap for that. Get the Idaho Spirit—do things—for yourself, too, but most—for Idaho. The remainder of the Argonaut staff will be appointed in time for the issue printed two weeks from today. Since prominence in student affairs is the only standard of measuring students among students, here's your opportunity. Take it. Every department of the university will be represented; even if additions to the staff have to be made, representatives will be wanted from every student quarter. If the applicant proves valuable a place will be created for him.

SPEED in obtaining copy, its completeness, reliability, and neatness will be the points specially noted in the awards. Copy need not be typewritten, but a smooth, legible hand is required. Place all copy in an envelope addressed to the editor of the Argonaut, and leave it in the publicity office, the first floor down the hall(north) from the Business's office.

Many New Additions to the University Faculty.

(Continued from page 1.)

with the Union Iron works, San Francisco. For the last five years he has been engaged in independent work as consulting engineer.

Dr. John Kostailek, instructor in chemistry. Dr. Kostailek took the degree of B. A. and M. A. from the University of Wisconsin and Ph. D. from Illinois, making organic chemistry his major work. His practical experience includes work with the Oliver Mining company of Kedlock, Minn., the city asphalt repair plant of Millwauk ee, and the Goodrich Rubber company of Cleveland.

C. V. Bohrman, a graduate of the horticultural department of O. A. C., is gardener for the horticultural department here. This department also has a teaching fellow, Clyde Beard, '09.

The department of bacteriology also has a teaching fellow, C. L. McArthur, a graduate of the Oakland Agricultural and Mechanical college.

Besides the above appointments there have been a number of promotions among the last year's faculty members. Among these are: C. Tull from assistant professor to associate professor of the English language; C. L. Larson from assistant professor to associate professor of mechanical engineering and Justin Delury from assistant professor to associate professor of geology and mineralogy. Professors J. F. Nicholson, William Hale, Wicks and L. E. Chidester occupy full professorships instead of associate professorships, as during last year. Dean Elliot's place in the school of agriculture is taken by Prof. Carlyle; Professor Isdins is professor of animal husbandry and principal of the practical school of agriculture. In this law department Otto Eddy McCutcheon takes the place of Judge MacLean as Dean of the college of law and professor of law. Professor Wilson takes the post of Professors Durfee, C. H. Wilber is assistant professor of law and secretary of the college of law.

ABOUT THE CAMPUS.

The first Executive Board meeting of the year will be held next Tuesday evening in the Ad building.

Henceforth the Argonaut will be printed on Tuesday and delivered on Wednesday.

Chas. Fields, '14, has left school and gone to Geneva. His return to school this semester is doubtful.

Bruce D. Mudgett, '08, spent the summer vacation months in Moscow visiting his parents. Since his graduation, Mr. Mudgett has attended Columbia and the University of Pennsylvania. He is now an instructor in the latter institution, and is working for the doctor’s degree.

Misses Margaret and Nellie Keane left Saturday for Lewiston where they will register at the State Normal School.

Misses Gretchen Zumbach and Margarett Stolle, both members of the Gamma Phi Beta sorority, left Saturday for Kendall. They will teach schools in the city schools at that place during the coming winter.

Captain Stoneenberg, a former commandant of the university cadets, spent a few days in Moscow preceding registration. He reported a pleasant time in renewing old acquaintances and memories in and about town.

George H. Curtis, the fourth Rhode scholar from Idaho to complete his course there, has arrived in Boise. He has not yet definitely decided what line of activity he will follow in the future, but it is confident that the inspiration and experiences derived from his work there will prove a golden field for his coming work that he may choose.

A message given by an expert workman will remove all that summer dust from your face. Visit Russell's shop and be convinced.

Mr. and Mrs. George M. Smith, 7th and 8th grade teachers at the school, will leave Saturday for their summer home at cabin.

Old style and out of date bawais
remodeled in the most stylish manner
at the Hotel Moscow shop.
The young man who is dressed correctly bids for influence and the respect of others, and he gets it.

And when he possesses those assets he is successful. In showing that he is particular about this important matter, he also shows that he will be particular about others.

In selecting our showing of Fall and Winter garments this year we have gathered together brands from the world’s most famous makers.

Principal among these are The L System Clothes—conspicuous for their exclusive fashion, fabric and superb tailoring.

The “L” System CLOTHES

are based upon an exclusive idea to fit a man’s character.

There is a “something” about these renowned garments that make them harmonize with a man’s personality—that gives him an individuality—set him aside favorably from other young fellows. It’s in the careful hand-tailoring, the superb fit, the drapery and the fashion.

We will be glad to show you the many new models for this season—show you what a difference The L System Clothes make in a young fellow, and what a saving this store makes for your purse.
