Student-trained horses for sale tomorrow

Margaret Donaldson

UI senior Jen Hopkins puts Chico through his paces.

WSU, UI students work together in program

Margaret Donaldson

S

students in the Washington State University “Principles of Equine Training” class were waiting patiently, with horses in tow, for the water hose at Hilltop Stables Tuesday afternoon. They were busy trimming and bathing the horses to prepare them for tomorrow’s WSU Equine Training Sale.

The horses presented for sale have been through two semesters of training with students in the class. The horses, which are donated to the program each year, range in training from barely halter broke to advanced.

Students in the class are assigned a horse to train for the semester and present it for sale at the auction. The students receive three credits by taking the lab and lecture.

The class offered cooperatively through the University of Idaho and WSU at the WSU Hilltop Stables. To take the class, the students must have three prerequisites, Animal Science 166 and 369, or prove to the instructor in an interview that they have adequate experience with horses to take the training class.

UI senior Angie Thompson said she took the class because, “I want to learn more about training different types and personalities of horses.”

Jen Hopkins, also a UI senior said, “It looked fun, and I wanted to expand my knowledge and skills about horses.”

The Equine Program at WSU has a total of 22 horses of several breeds this year. Most of the horses are Arabians and Thoroughbreds, but they also have Paint stock, which Thompson described as “spitchoy, like on Bonanza,” in Appaloosa, a Missouri Fox Trotter, and a Tennessee Walker. The horses range in age from 1 to 15 years.

Hopkins said she has learned a lot from the class and will definitely use the training techniques someday when she can afford her own horse.

“It’s been challenging, exciting and fun. It boosted my confidence in the ability to handle horses,” Hopkins said.

The final event for the class, the auction, is also the saddest. The students have each been working at least six hours a week training, and becoming attached to — their horse.

“It’s very sad,” Hopkins said. “If I were practical, I would buy him (Chico) myself.”

The Equine Program instructor, Krista Moreshed, said buyers at the auction want the horses for various reasons, like trail riding or just for pleasure.

“We’ve got prospects for pretty much everyone.”

Summer sessions, programs expand

Evaen though summer is usually considered a break from school, the three months in between May and September can also be prime opportunities for education in non-traditional ways. University of Idaho summer sessions include core courses as well as a variety of supplemental programs.

It is estimated that a college degree now adds over $20,000 per year in increased earning power in the job field.

With this in mind, Judy Wallins, director of the Tutoring and Academic Assistance Center, has designed a new summer session course called Summer Academic Recovery Program, or SARP.

The intent is to help students who are on academic probation, have been academically disqualified, or have low grades.

“Our hope is to help students stay in school. This course might help students clarify goals — retain their focus. Others know their study skills are weak but don’t know what to do,” Wallins said.

Students who decide to enroll in SARP will sign up for two core classes and an additional two-credit academic recovery seminar. Enrollment is limited to 20 students to maintain a good teacher-to-student ratio.

The session runs June 9 to July 16 and is taught by Molly Widdicombe, a staff member from TAAA.

Wallins explains that the idea behind the course requirements is that students on academic probation already have some courses they need to take.

With SARP, students will be taking these courses and receiving specialized assistance to help them in these classes as well as in the work.

The class is open to freshmen and sophomores.

Interested students may enroll between May and September can also be

Another course which offers a unique learning opportunity is the Summer Intensive Spanish Program. The course, which runs from June 9 to July 25, allows students to take a full year’s worth of elementary Spanish in seven weeks.

Scholarships for single parents

Applications due in two weeks

Andrea Lucero

For single parents struggling to pay bills, pass classes and raise children, the University of Idaho’s Women’s Center is offering some monetary relief.

Through the Agnes Blikum Chase Memorial Scholarship and the Shirley Grossman Caldwell Scholarship, the Women’s Center is offering up to $900 to single parents attending UI.

“Going to college is difficult even when you have parents who pay half the bill or the full bill,” said Betty Thomas, director of the Women’s Center.

“Being a single parent makes it necessary to do a lot more balancing. Parents have to make enough time for study, work and parent for single women who are

Today:

**Jazz It Up!**
Dance to the big band sound of Jazz IV tonight from 9:30 p.m. to 11:30 p.m. in PEB Dance Studio Room 110. Dress for the occasion; please no tennis shoes. Phone Diane Walker at 851-2189 for more information.

Celebrate Arbor Day
The City of Moscow and the Moscow Tree Committee will be celebrating Arbor Day with a tree planting ceremony at Lena Whitman School from 8:00 a.m. to 9:35 a.m.

Environment party
Paulee-Clearwater Environmental Institute's annual celebration is tonight from 5 p.m. to 10 p.m. Children's activities, potluck dinner and a dance to Celtic music by Possibilities are all scheduled in the evening's events.

**Tomorrow:**

**Calling all mountain bikers**
A mountain bike ride for physically fit beginners will be held at McCrooke State Park on the Skyline Trail. Meet in the Rossawen parking lot at 10 a.m. to carpool to the trail head. Call Aaron Grey at 851-7943 for details.

**Motorcycle meeting**
The University Motorcycle Club's next group ride is at 10 a.m. Meet in the Tidyman's parking lot. All street legal machines and riders welcome.

**Great big sale**
The Phi Epsilon Omicron Honor Society will have its annual yard sale at 1834 E. D Street from 8 a.m. to 2 p.m.

**Be a volunteer**
The ninth annual Household Hazardous Waste Day is Saturday. Volunteers are needed; call Heather at 852-2925.

**Get your car washed**
The Golden Key National Honor Society's annual spring car wash will be held from 10 a.m. to 3 p.m. in the Benton parking lot. Donation only.

**Rodeo fan alert!**
The UI College Rodeo is Saturday and Sunday at 1 p.m. at the Whitman County Fairgrounds in Colfax, Wash.

**Special Olympics**
The Regional Special Olympics is slated at the Kibbie Dome Saturday.

**Upcoming:**

**Classical studies**
Dr. Frances Powassall of the University of Alberta, Classics and History, will address "The Diagnostic History of Thopompous of Chios" May 1 at 5 p.m. in Adrin. 301.

**Give blood**
UI law students will be hosting a blood drive from 9 a.m. to 2:30 p.m. May 2. For more information, or to make an appointment to donate, write faud92@uiwallas.edu.

**Watch lumberjacks!**
The University of Idaho Logger Sports Club will be hosting the 1997 Lumberjack Classic on May 3 from 8 a.m. until dark at the Logger Sports grounds at the Kibbie Dome. Events to include chopping, cross-cut sawing, pole climbing and more. The event is free of charge.

**Triathlon class**
Triathlon Training and Tryout is a new summer class offered for all levels. It will cover training regimens, nutrition, wet suits and bike aerodynamics. Look in the summer schedule book for more information, or contact the instructor, Mike Collins, at collis400@newell.uidaho.edu.

**Summer health reminders**
Student Health yearly exam appointments are filling up. Don't wait until the last week. There will be no female clinic visit available through the summer. Return say cruises to Student Health prior to dead week to receive credit. Those planning international travel should come into Student Health for immunizations at least six to eight weeks prior to travel date.

**Submit your poems**
Utah's spring poetry contest is open for submissions. Enter your 50 lines or less poem in the contest. Contest deadline is April 15 at 11:59 p.m. at 115 S. Jackson, Ste. 104 or FAX to 833-4420.

HORSES *FROM PAGE 1*

any discipline," Moorhead said. She said they usually get between 200 and 300 people at the auction, and last year 85 to 90 were registered bidders. The money from the auction goes to support the Equine Program.

"Seven years ago they cut the funding," Moorhead said. "Now it's building up again."

The auction begins tomorrow at 11 a.m. Bidders registration will be from 9 a.m. to 10:45 a.m. and a preview of the sale horses will start at 9:30. The sale is at the WSU Hilltop Stables on Valley Road just off Stadium Way and anyone can attend. In case of bad weather, the sale will be moved to the Livestock Pavilion across from the Alumni Hall.

SUMMER SCHOOL *FROM PAGE 1*

The course is taught by three instructors to students who can get an idea of different areas and perspectives.

Rich Keenan, one of the instructors, said the course goes for four weeks, takes one week off, and then finishes with two more weeks of instruction.

"This helps students solidify knowledge at the end. In an intensive course, they need time to digest everything. With one week off they come back re-energized."

After many years of offering this course, Keenan said students have many positive things to say about this kind of instruction. "People are often intimidated by language learning, but people that have taken this course in the past have been very happy with what they learned."

To find out more about other summer session opportunities such as the New York Art Tour, Shakespeare at Ashland, or the Nex Perce seminar, contact Summer Programs at 851-6237.

ANNOUNCEMENTS

I see London, I see France...
The second and third in a "Series in Celebration of French Cinema" will be: *Jour de fête, Wednesday; and Diva, May 7. Both will begin at 7:30 p.m. in Adrin. 317. The films are in French, with English subtitles. Free admission.

"Get educated!"
The Diversity Education Conference will be held Wednesday in the Student Union from 9:30 to 4:30. The event is free.

**Swap your books**
The UI text swap will be May 2 from 10 a.m. to 3 p.m. in the Student Union. Students can bring textbooks they want to sell. The monthly Swap will be held at the same time. To reserve table space, call 855-6454.

**Give blood**
UI law students will be hosting a blood drive from 9 a.m. to 2:30 p.m. May 2. For more information, or to make an appointment to donate, write faud92@uiwallas.edu.

AmeriCorps gets things done
Michelle Kalbetrz

"The end of the school year often conjures nebulous feelings in the air as the future is graduating high school and college students alike. For those looking for something other than the traditional 9-to-5 job, AmeriCorps offers the opportunity to serve communities in exchange for a small living stipend and an excellent array of benefits. "It’s great for people who are graduating, if they’re not sure what they want to do," said Mary Marano, University of Idaho senior and AmeriCorps recruiter. "Or even if they do know what they want to do, it’s a great break," she said. The $4,725 education award is given after the successful completion of 11 months of service. Part-time service, with reduced awards, is also available. The monetary award can be used to help pay back student loans or apply towards further education. "Getting things done" is the motto of AmeriCorps, a program strongly supported by President Bill Clinton. There are currently 450 AmeriCorps programs around the country. Each program concentrates on one or four areas of service: education, the environment, human needs and public safety. "I think it opens your eyes to all the disadvantaged people. There’s a population that people aren’t always aware of," said Idaho TRIO AmeriCorps Member Valerie Johnson. Johnson works at the University of Idaho Student Support Services. Her services include tutoring, mentoring and providing test accommodations for disadvantaged students. "I’m really open to people coming by my office to talk about the AmeriCorps program," Johnson said. "Ultimately, AmeriCorps gives us much to the community as it does to each member. "We’re trying to link people together so they are stronger for the community," said Jeannie Havel, Idaho TRIO AmeriCorps director.

Senate discusses athletics, money
Shane O’Brien

"Oval Jaynes, athletic director as of six months ago, addressed the ASUI Senate at Wednesday’s meeting. He encouraged an open line of communication between the Athletic Department and the university as a whole. "The athletic program at the University of Idaho is your program," Jaynes remarked, "and we want people to take pride in that program. "Jaynes talked about the top priorities of the department, which included the establishment of a women’s soccer team in 1998 and the efforts to get the NCAA to recognize Idaho as a 1A opponent. This would encourage contests with teams that are trying to qualify for bowl games and this in turn could help generate some much needed revenue. The only bill that sparked much discussion was a proposal to transfer $200 from the activities board budget to cover the expenses incurred by the blood and bone marrow drive that was a part of Delta Chi fraternity’s philanthropic effort. At issue was the role of the ASUI in the drive. It was held as presented by Delta Chi and the ASUI, but traditionally, the blood drive was covered by other means. Senate also discussed whether funding for the drive would be a violation of their bylaws. The majority of the senators decided that they were not responsible financially for the event, based on precedent and under the pressure of present budget crisis.

Really?
Sarah Wichlacz

This was the message of Robert Hastings’ UFO presentation on Tuesday.

Computers, cell phone stolen
Police remind students to lock their valuables
Eric Barker

After some recent thefts on the University of Idaho campus, Moscow Police Department officers are warning students and staff not to become complacent about safety in Moscow. "The problem we have is that we live in a good place. People get complacent. People aren’t mindful of their property," said Cpl. Carl Wommack of the NPD. Both staff and students feel at home on campus, which is good, Wommack said. However, he added that people should be aware that there are unscrupulous characters who will steal almost anything.

Wommack’s comments follow the reported theft of two laptop computers and one cellular phone from campus offices. All of the items were taken from unlocked and unattended offices. "The chances of ever finding that kind of stuff are really slim once it is stolen," Wommack said. The solution to such crimes is to keep valuables locked up and out of sight when not attended. Bob Wommick and officer Terry Haldean spend much of their time trying to prevent crime before it occurs. The two policemen, who work out of the campus substation, practice and preach what is known as community policing. "The philosophy of policing stresses crime prevention through community involvement. The officers perform security surveys to teach people measures that can be taken to prevent theft and other crimes. In so doing, they hope to find long term solutions to prob- lems, rather than reacting to crime after the fact. Wommack and Haldeman do not patrol the campus in a traditional manner and point out that the campus sub station is not manned around the clock nor is it call driven.

People should dial 911 for emergencies and call the main station downtown if they need an officer dis- patched. All calls must go through the main dispatcher downtown.
UI students return from NASA

Robert Hall

Their mission was to boldly go where no Vandal had gone before. They came, they saw, they failed on the famous "Vomit Comet." Almost all kidding aside, UI mechanical engineering students Tiffini Rodlick, Jeff Daniels and Josh Wilson did lose their lunch aboard the NASA KC-135A airplane which was used in filming Apollo 13, but what they professed was immeasurable.

"It was incredible, absolutely wild," Daniels said of the weightless experience.

Nathan Stoddard was the only one of the team who was able to keep his lunch. "I've kind of got an iron stomach," he said.

Wilson, a Moscow High School graduate, said, "We have those Sarga full," when asked about the flight.

The students returned Sunday from a 10-day stint with NASA in Texas. Daniels was excited about the scientific aspects.

"It's amazing how much we take for granted. There are many things that are different about zero-G. You can float water in the air," Daniels said. "We put an Alka Seltzer tablet into a floating glob of water and it wouldn't fizz.... You can also barely push yourself off one end of the plane and float. Super Man style, all the way to the other end."

Wilson referred to the trip as one of the most exhilarating and uplifting experiences of his life. Rodlick agreed.

"It was wonderful, unforgettable. It was one of the most memorable experiences of my life. The flight was out of this world. Your body begins to slowly elevate.... It's kind of like an out of body experience.... It's hard to believe it's really happening," Rodick said.

As a little girl, I always wanted to be an astronaut and explore space. I put that dream in the back of my head and moved on with my life. After this experience, I know that I must make this dream come true. If I follow the path I made the right moves and believe that I can achieve my dreams," added Rodick.

Twenty-five teams were selected nationwide to take part in the NASA program.

The UI team was chosen to measure the viscosity of gases during zero-gravity. To do this, the team used sound waves to float a small plastic sphere in an air tight chamber.

The team then introduced a gas into the chamber. Different gases will affect the sphere in different ways.

"The gravity on earth affects any precise measure of viscosity. Under weightless conditions, you can more accurately measure the vibration of the suspended sphere each time a different gas is introduced into the sphere's chamber. By doing this, you can measure a gas' viscosity," Daniels said.

He said the team got some interesting results.

"Sometimes the sphere reacted in ways we couldn't explain. One possibility contributing to the sphere's (at times) odd movement might be the turbulence we experienced on the plane. It vibrated."

The students also met the astronauts who were returning from the recent shuttle mission.

"The astronauts are genuine people, who are trying to make the world a better place," Rodick said. "We also met UI alum Jeff Ashby." Ashby received a bachelor of science in mechanical engineering from UI in 1976. He has given the Distinguished Flying Cross, Meritorious Service Medal, Navy Air Medals, and many other awards. He graduated from the Naval Test Pilot School in 1988, and the Naval Fighter Weapons School (Top Gun) in 1986. Ashby will be on a future shuttle mission.

"We're going to get Jeff something from the UI to take with him," Daniels said. "We've asked him to come to the UI to speak when he gets back."

Ralph Budwig, the students' advisor, was quite proud.

"This is the best team I've worked with. They've worked very hard. Not only did they work well with one another, they were able to make decisions and adapt to the different contingencies that came up during the flight," Budwig said.

For information on future possibilities like this, contact the Mechanical Engineering Department.

Bill Nye — I love you man!

Without thinking twice about it, comments about personality and physical characteristics are often heard when comparing siblings to each other, parents or other relatives. So, while I've got my mother's short temper, my grandmother's eyes and my father's nose as hereditary characteristics, why wouldn't it be reality to think that I could carry the same gene that made my great-uncle an alcoholic? Perhaps there is a gene common in alcoholics, violent people, those with personality disorders or homosexuals, or so is the belief of scientists studying the nature-nurture aspect of people.

The idea is that it is not overwhelming, especially the way science continuously sheds light on the world every minute. Certain genes have been linked to personality and intelligence already. Though somewhat frightening, a great number of wonderful possibilities could stem from such a gene-linking discovery.

Science is flimsy in itself. There seem to be no limits to possibilities, discoveries, inventions, ideas or cures. These grand minds conjure up what is no less than miraculous science — but so many are as fascinating material.

What else but science is to thank for the advances or discoveries? Some fool is going to get shod of all the wrong material, and the next thing you know, we'll have several more of these psychopaths roaming the earth.

And of course, science brought us nuclear weapons. As they are there to protect our country, they are also there for the destruction of the world in the grasp of the wrong hands. We now have the capacity to treat diseases with pills. A vaccine can now remove what once took the lives of millions only decades ago. I thank God for science in that it enabled my grandmother to combat health complications with drugs. It helped keep my premature brother alive at birth. It eased the pain of a headache. It expands minds. Lives are preserved, saved and cured with the existence of the many sciences of the world.

Once again, an incredible theory opens doors to several inflected people and society as a whole through the wonders of science and experiment. What if that one day comes along when a child born with a gene that promotes violence can be relieved of that burden by a simple medication? Those thousands of violent murders, rapes, robberies and assaults could be stopped before they happened. So many would have the chance to lead full lives. Children could walk the streets safely.

For there to be a world of greater acceptance and less bias because it was discovered a certain gene was the cause of homosexuality is such a grand thought. The persecution that now separates homosexuals could be replaced by understanding and equality.

That dear friend of mine who could not break away from the bottle would be given a chance to start anew by having alcoholic-promoting genes combated. The many lives taken in drunk driving accidents would be reduced. Families that were once torn by alcoholism would have a chance to find the happiness that alcohol took from them.

People with personality disorders could lead lives without the complications they face everyday. Yes, it all seems like a childlike world of make-believe when it's all taken into perspective. I guess having so much happiness can be labeled as but a dream. But with every day, something new comes along and I am never ceased to be amazed. One day, this could be one of those advancements.

As there is still much to consider in the experiments done by scientists, the answers may be far away — or not there at all. Nevertheless, there is still a theory that opens up a great deal of hope for all to think about. Perhaps the promises thrown out by politicians to fix the broken world can be answered by the many brilliant minds of scientists that have already given us so much.

Chicken Little, meet Father Time

This was the week where quite a few things just fell apart.

Right-wing, anti-government conspiracy theorists, who were bored enough with their missile theory in the crash of TWA Flight 800 to ship the story overseas in Paris Match also lost their McDavid-like quest to prove something was rotten in Colorado when that missing A-10 Warthog turned up — not in some militia-man's shed or in the hands of UN anti-American forces— but smashed to bits under new fallen snow.

Ralph Reed announced his departure from the Christian Coalition, along with his intention to start a political consulting firm and perhaps someday run for public office. Whether this is good or bad news only the future will tell.

Businessman Alan Gerry bought the cow pasture which in 1969 played host to the Woodstock music festival and plans to turn the area into a theme to '60s counterculture — grace to the fact Gerry recently sold his shrine of '60s counterculture — a $2.7 billion cable company — to Time-Warner.

Computer gamers worldwide are poised to catapult our entire information society back to 1901, meaning of course we'll all be wearing straw hats, talking like they do in Mary Pickford and the HAL 9000 to be developed at Urbana will be able to sing "Daisy, Daisy" in time with a hip bunch of singers with a name something like "Hunter's Crooners." And Bill Gates will get even richer when some hired flunky of his patches the problem.
Letters to the Editor

Cheers for Greek rights

I want to publicly thank Katie Jolley for distributing her factual letter regarding President Jim Donald’s dictatorial movement, particularly after the attack on her in Tuesday’s Argonaut. Her letter was helpful and balanced out the slandered article regarding the same amendment that appeared in this paper last Tuesday.

To clarify a few points from Brian Davidson’s laughable editorial:

Jolley’s letter had nothing to do with continuing the so-called Greek monopoly, but simply stated opposition to an amendment that would limit the rights of certain students to participate in student government solely based on group status.

Contrary to Dalton’s assertion, his amendment failed not because of misinformation spread by mysterious propaganda but because voters recognized every student currently has the same opportunity to run for a Senate seat but choose not to become involved while Dalton’s amendment would actually have denied students the opportunity of ASUI service.

Jolley’s intentions were to educate potential voters about an important issue — something the Argonaut should consider doing in ways other than biased editorials the day before an election.

Again, cheers to Katie Jolley for her efforts. As for the Argonaut, rather than digging for ways to bring down outstanding student leaders such as Jolley, maybe you could start spending more time thinking of ways to pay for yourself so that your editor doesn’t have to whine to the ASUI Senate for increased funding.

—John Tonsiladick

Kudos to Arg environmental articles

I would like to commend the Argonaut and its staff for printing the articles, in the April 22 issue, on environmental issues at such a crucial moment of our appreciation for the planet Earth.

After reading the Arg from cover to cover — which seems to happen more and more — one particular article caught my attention: “Growing tree activity sets up crowd.”

Now, the reason why I was so enthralled by this article was the fact I attended the presentation put on by John MacGregor of the Idaho Watersheds Project and felt his lecture produced a dire impact on those of us who wanted to hear what MacGregor was trying to transend. “Our true goal for the future of Idaho is to bring healthy living to all people.” This statement could not be any more true. As to the other attendees who sat on the other side of the trace at the lecture, may I suggest a hint of advice for future lectures that you should attend concerning such issues: Try to hold the materials back until the lecture commences and maybe those of us who are trying to speak will cut the screen and try to listen, especially in the School of Law.

—Bennett Barc

Hey, I was that one reader

Well, the obvious has failed John MacGregor. Some of us who are not from this country are not familiar with the purple ribbon as a symbol of support for women victims of violence. That alone would explain that “one reader who doesn’t know.”

Besides that, your assumption that those in the know would be familiar with the symbol smacks of supercilious arrogance. Some of us didn’t have time to become familiar with the various public representations of domestic violence because some of us were busy living it.

As a recovering battered wife, I resent the implication that I am not complete in my victimhood without your artistic recognition. A misplaced sense of superiority is the seedbed for malice.

—Joan Jones
Stacked in the backfield

This season look for Idaho to utilize their running-backs a bit more than in the past with solid returning talent at the position

Byron Jarnagin

Three men, one position, one goal. As spring football continues for the Vandals, a lot of the spotlight shines on the vacant quarterback position. This of course takes attention away from the talent mounting behind that big question mark in the offensive backfield — running-backs.

"I think that we are better up front at this point than we were last year as far as running the ball," running-backs coach Todd Hoiness said. "We’ve got three running backs right now, and they are all doing a fine job."

The talent in the backfield is led by 5-foot-11 senior Joel Thomas who dominated the Big West last season in yards after contact, winning him recognition to the first team all-Big West Conference.

Joel and Jerome Thomas produced some positive numbers this spring at the second Vandal scrimmage. Joel had 12 carries for 46 yards and Jerome had 13 carries for 57 yards. Jerome, a junior, also made good use of his hands gathering three receptions for 71 yards and a touchdown.

"Jerome did a great job last Saturday when the opportunity presented itself, but he is going to have to do it again and again to make it count," Hoiness said. "He continued to do some of the same good things this week during practice, and that is how these guys get better."

Last season the Vandals put a lot of emphasis on throwing the ball and utilizing the running back position primarily for pass protection. By next season the Vandals hope to have revolutionized the running-back position.

During spring practices the trio of running-backs, Joel and Jerome and senior Marcelle Williams, are working on a new look — a second man in the backfield.

"This spring we said that we needed to run the ball more and better against an overloaded front, and so we are occasionally going to put two backs in the backfield to help," Hoiness said. "Sometimes we plan to use two backs, sometimes it will be a tight end and a running back. The backs love it because they get more actual carries and have a little more production in the spring as far as running the ball. Plus it helps their development as far as reading things and vision."

Idaho’s offense has always been dominated by the passing game, but the running game has been successful for the Vandals over the past few years as well.

Over the last five years the Vandals have had the leading rusher in the conference three times (Big Sky and Big West), regardless of the conference Idaho was playing in. "They call us a passing school, but we run the rock here," Hoiness said.

Not only can our boys run, but Idaho backs have continued to add another dynamic to the Vandal passing game being able to effectively catch the ball on the perimeter or out on a screen pass. Combined, Idaho backs had close to 40 catches last year. This aspect proves to be effective in keeping the opponent’s defense honest in pass-coverages.

Combined with a productive running game, Vandal running backs should give Idaho some real offensive power next season.

"We are going to run the ball the same amount or more, because if you can run the ball then you can get some good play-action off of it," Hoiness said.

Joel Thomas

Jerome Thomas

"We have one of the best backs in the conference (Joel Thomas). We have to give him a chance because that guy can win a game for you by himself, so we have to make sure that he gets a lot of opportunities."

The running back situation for the Vandals is only going to get better in the future.

Freshman running back Willie Alderson, a former Idaho State Player of the Year, is missing spring ball due to a knee injury. Alderson comes to UI from Nampa, Idaho, and has the potential to be Idaho’s fastest back.

In the fall Idaho will pick up three more running-backs, all new recruits: Laki Ah-Hi from Lewiston, Ighe Evero from Alta Loma, Calif., and Anthony Tenner from Bremerton, Wash.

"Running-backs are pretty key to an offense, as far as the whole picture is concerned — they make things work," Hoiness said.

Vandal News and Notes

Ryan Fien and Montrell Williams, both former University of Idaho football players, have signed free agent contracts. Fien, a UCLA transfer quarterback who came to Idaho for his senior season, signed with the Oakland Raiders. The 6-foot-2, 215 lb passer passed for 3,674 yards and 27 touchdowns last season.

Williams, a quick defensive back who played for the Vandals in 1995, is rehabilitated from a knee injury and has signed with the Dallas Cowboys.

Annual Palouse Triathlon results

The 14th annual Palouse Triathlon kicked off the 1997 year with a tremendous turnout.

Nick Southwell won the men’s overall division with a 1:29:27 mark in the swim split, 1:31:13 in the bike split, 33:18 in the run split and finished with a final time of 2:23:55.

In the women’s division, Lisa Rachcino won with an overall time of 2:54:53. She finished the swim split in 2:04:48, 1:45:19 in the bike split and 48:46 in the run split.
Idaho women's golf team earn bronze

Through an outstanding effort, the UI women trailed just New Mexico State and North Texas in the final standings of the Big West Conference golf tournament.

Kindra Meyer
Assistant Sports Editor

The University of Idaho women's golf team wrapped up their season Monday with a third place finish at the Big West conference championships.

Following a second place standing during rounds one and two, the Vandals slipped behind North Texas 968 score to finish at 977 with 339-327-336.

North Texas struggled in the first round, recording an average 336, but fired up to finish out the championship with two scores in the teams, 317 and 315.

Fifty-four holes of golf took their toll on the athletes, and stamina could not provide the needed edge to overcome New Mexico State's considerable lead.

The Roadrunners, ranked 20th in the nation, undoubtedly earned the crowns. Their team totals of 308-303-302 added to an impressive 913, boosted by a journey best final round.

Rounding out the tournament were Long Beach State who shot 344-330-336 and Boise State at 347-334-333.

Idaho's top individual Elizabeth Carter held on to a third place title with scores of 78-75-82, Carter, a sophomore from Boise, was named second team all-conference.

Freshman Trisha Einspahr tied for seventh with a 240.

Leading individual results were a NMSU duo of A.J. Furrano at 70-75-74 and Sarah Comstock with 76-75-72. Comstock was also placed on the first team all-Big West list, along with Kate Dann and Rachel Duncan of NMSU, Brook Bell, UNF and Danielle Skinner, LBSU.

NMSU coach Jackie Cotht received Coach of the Year honors.

Since UI graduates no seniors, they look to build on this season for the future. The Vandals return a core of promising young athletes including Carter and Einspahr.

Other returners are junior Darcy Ritz, freshman Sara Thompson and junior Kellee Vosberg. A final addition will be senior Meari Bernhardt, who redshirted this year due to a 12-credit business course.

Meanwhile, the Idaho men's golf season is still in full swing. Currently on the road, the men are competing at Stanford University this week.

Vandal junior Darcy Ritz tries sinking her putt on Tuesday morning.

Vandals still looking for a few recruits

Nate Petersen

Idaho head basketball coach David Farrar hasn't had much time to sit back and relax since being hired to the top spot two and a half weeks ago.

"The official signing date, which is the first day you can actually sign a player, is the second Wednesday of every April," Farrar said. "This year it was April 9, and I took the job on the Monday."

The recruitment of Vandals players was just starting, so Farrar has had much work to do since becoming head coach.

"We really hadn't had any kids in at that time," Farrar said. "So we've been trying to get them in. Most people don't know it, but we're really limited in the number of visits we can give recruiting."

The NCAA allows Division I schools only 12 opportunities to bring players to the campus to meet with academic advisors, talk with players and see the facilities offered.

"We used the majority of our visits during the fall," Farrar said. "So we have had only five or six left, which we are in the process of finishing this weekend."

As many may know, the Vandals are in dire need of players to fill the gaping holes left by senior standouts Jason Jackman, Eddie Turner, and Reggie Rose.

"Three of the four prolific statistical leaders were seniors," Farrar said. "I think right away you realize that you are losing your most valuable players."

The Vandals weren't as successful in the fall signing as they would have liked to have been, thus there is added pressure for the success of the spring signings. With few visits remaining and the clock ticking, Farrar is working vigorously.

"Had the fall signing have gone better it wouldn't be such a big deal," Farrar said. "But we didn't get as much out of the fall signing as we wanted to, maybe one player. So it puts a lot of stress on the spring recruiting."

David Farrar

"Under the circumstances of a coaching change and the late year," Farrar said. "I think the couple of kids that have indicated that they will sign are probably better than what we hoped or should have had to have have signed."

For the most part, Farrar will be looking to sign the players which Idaho worked on during the fall.

"Our goals are basically to capitalize on the people that we spent the most time and energy on," Farrar said.

Recruiting in Idaho is by no means an advantage for Farrar or for coaches at Boise State and Idaho State.

"The one negative of being at Idaho is that we don't have the population base," Farrar said. "For recruiting it's tough, because every year there are only about three players in Idaho who are capable of meeting the athletic and academic requirements of this university. That's not a very big pool for recruitment to deal with."

Various things draw Farrar to a recruit, which begins with the academic standing of the athlete in question.

"There are a number of things," Farrar said. "Firs of all I would like to have a good idea about the player's academic background. From there I would like to have idea of his receptiveness and attitude."

A most important aspect of recruiting is seeing the athlete in action.

"I'm going to sit behind the bench and watch how the kid reacts to his coach," Farrar said. "How does he compete versus perform, and how does he relate to his teamates? What kind of body language does he exhibit, and basically is he the type of person you can depend on?"

During the next few weeks Farrar's work continues, and these visits will be disclosed to the public next week, pending the completion of all necessary paper work.

Local puff daddies set to smoke with the public

Justus Cissken

MOSCOW will see one of its first-ever public cigar smoking events come Wednesday evening, and both the general community and college students are invited. And though cigar smoking was just for old men and stuffy executives.

This smokers' gathering is commonly known as a "smoker" (not to be confused with the person who actually smokes the cigar) and is being put on by the University of Idaho Distinguished Cigar Club. The DCC has acquired sponsorship from UI, but receives no money from the university.

What makes Wednesday's event so appealing is its uniqueness.

"There's never been a pubic one here before," said Sean Wilson, former ASUJ president and current DCC member. "We want to create an event where people can get together and sample a fine cigar.

There will be sampling, indeed, but for a price. Patrons will be charged $35 per person or $65 per couple. In return, each attendee will receive three fine cigars to sample.

"They're all top of the line and hand-rolled," said Jerry Curtis, co-organizer of the smoker and also a DCC member.

One highlight of the smoker will be a talk by Larry Grupp, an author and world traveler who has spent time in Cuba. Grupp will speak on the cigar-making industries and factories in Cuba, a nation considered by most to manufacture some of the best cigars on the planet.

The event will also give the paying patrons a chance to take a blind taste test of the cigars. Then, they can evaluate them based on criteria set forth in the popular smokers' magazine, Cigar Aficionado.

Uncertain to many, the cigar rating system is quite complex. During the judging process, each cigar is evaluated according to its two main components: construction and tobacco in the form category, the style is rated and ranked by its draw, taste, burn aroma, ash, feel and appearance. In the latter, tobacco quality, color evenness and whether or not the cigar is handmade are what count.

The event's judging process will be handled by C.D. McClood, the owner of G & W Cigar & Tobacco in Lewiston. McClood has been in the cigar business for about 25 years.

As this is one of the first such public events in Moscow, DCC members aren't exactly sure what to expect. Above all, though, the rule Wednesday night is to just have fun.

"We'd like a good blend of students and community members," Curtis said. "But we just want to bring people together to let them have a good time."

Tobacco gatherings such as these have lately been springing up at colleges all over the country. Columbia University, Yale University, New York University and Florida State University are just a few of the institutions that have followed this fad from the beginning.

The UI smoker will also feature a variety of hors d'oeuvres, door prizes and a no-host bar.

The smoker will take place at the Moscow Social Club and will run from 7p.m. to 9 p.m. Prospective attendees of the event should send their RSVP to Quill and Pencil Dining Services at the UI Wallace Complex, or call in reservations at 85-6709.

Blue Van Gogh, Cream Cheese Films, superstar

Translation: a band, their label, Caller Music's parent company and a collaborative success

Army-March: Strung up with twisted wire

It's no secret that the music industry is a tough nut to crack for new bands. It would seem that despite efforts to break through, Blue Van Gogh has fallen victim to that very nut. Here is your opportunity to possibly help obscure hardworking artists who deserve it, don't pass them up.

Their debut album, Hi-Fi Junkie Somata, seems to have all the necessary components of a hit in the entertainment field. Yet, they seem to not be enjoying the success they deserve. We, the collaborative consumer, have the power to change that.

About the band: Patt M-Yodlovsky is a blonde bombshell who provides lead vocals and harmonica. Ray Anderson, a pale, short-haired brunette who looks like he just completed a beer-drinking marathon in a London pub, lends his skill at front vocals, guitar, keys and percussion. Ray's vocals are similar to Michael Dianits's - that brief flash of fame who re-made 'Rock On' and also plays Danny Romanoff on The Young and the Restless. Bradley Behrman, another guitarist and back-up vocalist, looks just as rough and ready as the last guy, but also appears to have just smoked a bowl and half. Lockah piled and Alan Dunn complete the five-piece band, and look like they may have even started the/docs fist. Lockah's playing bass and also does back-up vocals. Dunn is the percussionist.

Don't ask how a respectable-looking guy like M-Yodlovsky got mixed-up with these guys. Despite the fact that she doesn't exactly match the others in appearance, the band makes up for it with their quality blend of vocal stylings.

If you want to classify the band's sound, you're going to have to use your imagination. Try to follow me here. Every song has relatively heavy guitar, a little bit of rough sounding, but in leading to their sort of novelty. M-Yodlovsky's voice sounds like a mix between Suzanna Hoffs (of Bangles fame) and Cheryl Crow. If you listen to the songs on the disc, in chronologi-cal order, it seems as though M-Yodlovsky is loving her voice. More and more, as the CFD progresses. Never fear, it's back in full force for No. 3, "Spaceman." Speaking of this song, don't bother writing to it. It's definitely got to be the dumbest one on the whole album.

Favorites of Hi-Fi Junkie Somata are "Butterfly Teeth," "Little Secret," and "Dirty Kat," which is reportedly similar to "Smelly Cat." Phewie from Friends in point.

Fine Arts
Inclined to gossip? The School for Scandal feeds the grapevine

Amy-Marie Smith
Assistant Entertainment Editor

Slated as the final offering in the
Hunting Theatre’s mainstage series ‘97 is
The School for Scandal. Familiar
University of Idaho theatre students will
given their audiences for the last time this
academic year with a sharp-witted, outra-
ginous farce guaranteed to keep the audi-
cence alive with laughter.

“The School for Scandal is a world of
angry, hurt and decaying people within
which wholesomeness and good fun —
and occasionally does — triumph,” Chuck
Ney, the play’s director, said in a prepared
statement.

The production portrays life within 18th
century leisure class. The vintage atmos-
phere sets a plot consisting of two broth-
ers who want to marry the same woman.
One brother wants to marry for love, the
crue for money. Throughout the play
cast members find themselves in sign-
ificant predicaments, providing the
audience with the aforementioned non-
stop laughter.

The production will showcase the
nationally recognized talents of Carolyn
Hin, Jeff Pierce, David Widorski and
Cari Olson.

Hin portrays the lead character Lady
Stonewall. The actress is one of the five
UI students who won the regional
American College Theatre Festival com-
petition in LaGrande this February. Hin
went on to compete for national awards at
the Kennedy Center in Washington, D.C.,
last weekend. Hin and Pierce were among
the 18 finalists in the nation.

Pierce assumes the role of Joseph
Surface in The School for Scandal. Pierce
won Best Classical piece in the ACTF
regional competition, was the second
finalist among the 18 in Washington, D.C.

Kelly Quinnin (Lady Teasle) and Sarah
Haines (Mrs. Candour) are others in the
20-member cast of The School for
Scandal. These two women were honored
last year in the national Kennedy Center
awards for their work in the all-woman
cast of Top Girls. This cast proves to be
experienced not only in major UI theatre-
cal productions, but equally experienced
in competing on the national level.

“It’s a lot for the calibre of our stu-
dents and our program,” David Lee
Painter, theatre faculty member said. “It’s
amazing that there’s a little university in
the mountains of Idaho that has a nationally
recognized theatre department.” Painter
accompanied the student competitors to
Washington, D.C.

The School for Scandal runs May 6-11.
Performance times are 8 p.m. on May 6-
10 and 2 p.m. May 11. Tickets are free to
UI students, $6 for adults, $7 for seniors,
and $5 for youth and non-UI students.

There will be a sign-interpreted perfor-
rance on May 11 sponsored by the UI’s
Student Disability Services, a service run
by Student Advisory Services.

Adult Haircuts
from $12.50
Crash totals auto-erotic

Christopher Clancy
Entertainment Editor

Her hand moves slowly and deliberately down to the rusted crease, trembling slightly as she vigorously fingers the gapping wound left by her hit and run lover's latest assault.

No, this isn't the opening of a porno flick. It's a scene from *Crash*, the latest installment in an ongoing series of psychological affairs by Canadian film director David Cronenberg.

*Crash* is a disturbing story of a group of car crash victims brought together by a common fixation with death, sex, automobiles and a pursuit of ever increasing carnal acrobatics. The film, and the book that it's based on by J.G. Ballard, provide us with an intense shock value that, once again, proves Cronenberg's almost limitless ability to push the envelope of good taste.

Lacking any discernable plot, the film is powered along by a series of explicit sex scenes and gruesome disfigurements that are simultaneously compelling and repulsive. Shards of broken glass, twisted metal, blood and gore permeate the majority of the film. When the characters are not performing some bizarre, ritualistic, sexual act, they are busy chain smoking and looking forlornly into the distance while, presumably, contemplating another demented escape.

James Spader portrays James, a distracted Canadian director (coincidence?) who, with his wife Catherine (Deborah Unger) live out their sexual fantasies driven by mutual speed fetishism. On his way to work James crashes his car and during his recovery meets Vaughan (Elias Koteas) who is instantly fascinated by James' mangled limbs and scar tissue. A former cop turned photographer, Vaughan is erotically obsessed with car crashes. Helen (Holly Hunter) is detached and sometimes manic as the damaged doctor involved in the crash with James who, after her recovery, becomes sexually involved with all of them. Susanne Anquinet plays a lesser role as amputee la token, prosthetic, sex object, Gabrielle.

While the notion that auto accidents should be considered an erotic element has provoked outrage by some critics both in the United States and Canada, Cronenberg sees the film as an "existentialist romance," that explores the dark territory of human sexuality.

"It has that feeling that there's something substantive about it, disturbingly wrong, desperately perverse."

Recently released in the United States, with an NC-17 rating, the film was awarded the controversial Special Jury Prize at Cannes in 1996 for originality, daring and audacity. It was also met by an almost equal mixture of cheers and boos from the audience at Cannes.

Cronenberg's previous film credits underscore his reputation as a risk taker and include such memorable cult films as *Scanners* (1981), *Dead Ringers* (1988), *Naked Lunch* (1991), and *Madame Butterfly* (1993.)

*Crash* is like the road kill that everyone pretends not to see as they pass along side the highway, while privately trying to decide what kind of an animal it used to be. Cronenberg openly dares us to acknowledge it, and then, just as we begin to summon the courage to see it, he picks up the setting cues and rues it in our faces.

Although Cronenberg escalates the violence and sex to ridiculous levels as the story progresses, ultimately it's more desensitizing than anything else. Because it relies so much on shock value, the film loses much of its momentum early on. And, by the end the whole thing takes on a laughably sophomoric character. You may still leave the theatre feeling unnerved, grimy and disgusted, but it will most likely be because of the popcorn.
I say potato, you say spud

Eric Gray

Lately I have been on a potato craze. For some reason I have found new flavor in the humble spud so I thought I would concentrate on our state's famous brown spud.

I haven't really found too many lush potato dishes here in Idaho. Most of the spuds I come across are mashed and served with butter and sour cream. I have not been very impressed with this treatment of the potato.

After a few weeks of consuming spuds in this manner it occurred to me that I should try the spud in a different way.

I decided to try something different, but the only way I could think of doing this would be to make a hash brown.

Hash browns are a combination of many ingredients and are typically served with eggs, bacon, or ham. They are a popular breakfast dish in many parts of the United States.

I decided to try making hash browns at home using a combination of potatoes, onions, and cheese. I also added some butter and sour cream to the mixture.

I found that the hash browns turned out very well and were much better than the入手方式 of mashed potatoes.

I thought that this might be a good time to introduce a new recipe for hash browns to the readers of this column. The recipe follows.
